Part I Influence of Quantum Confinement on the DSL in Non-Parabolic Semiconductors

1	The DSL in Quantum Wells of Non-Parabolic Semiconductors	3
1.1	Introduction	3
1.2	Theoretical Background	6
1.2.1	The DSL in QWs of Non-linear Optical Semiconductors	6
1.2.2	The DSL in QWs of III–V Semiconductors	8
1.2.3	The DSL in QWs of II–VI Semiconductors	14
1.2.4	The DSL in QWs of Bismuth	15
1.2.5	The DSL in QWs of IV–VI Semiconductors	21
1.2.6	The DSL in QWs of Stressed Kane Type Semiconductors	25
1.2.7	The DSL in QWs of Tellurium	27
1.2.8	The DSL in QWs of Gallium Phosphide	31
1.2.9	The DSL in QWs of Platinum Antimonide	32
1.2.10	The DSL in QWs of Bismuth Telluride	33
1.2.11	The DSL in QWs of Germanium	34
1.2.12	The DSL in QWs of Gallium Antimonide	37
1.3	Results and Discussion	39
1.4	Open Research Problems	51
	References	57
2	The DSL in NIPI Structures of Non-Parabolic Semiconductors	63
2.1	Introduction	63
2.2	Theoretical Background	63
2.2.1	Formulation of the DSL in NIPI Structures of Non-Linear Optical Materials	63
2.2.2	DSL in the NIPI Structures of III–V, Ternary and Quaternary Semiconductors	64

2.2.3	DSL in the NIPI Structures of II–VI Semiconductors	65
2.2.4	DSL in the NIPI Structures of IV–VI Semiconductors	66
2.2.5	DSL in the NIPI Structures of Stressed Semiconductors	68
2.3	Results and Discussion	68
2.4	Open Research Problems	74
	References	75
3	The DSL in Inversion Layers of Non-Parabolic Semiconductors	77
3.1	Introduction	77
3.2	Theoretical Background.	78
3.2.1	Formulation of the DSL in n-Channel Inversion Layers of Non-Linear Optical Semiconductors	78
3.2.2	Formulation of the DSL in n-Channel Inversion Layers of III–V, Ternary and Quaternary Semiconductors	80
3.2.3	Formulation of the DSL in n-Channel Inversion Layers of II–VI Semiconductors	84
3.2.4	Formulation of the DSL in n-Channel Inversion Layers of IV–VI Semiconductors	86
3.2.5	Formulation of the DSL in n-Channel Inversion Layers of Stressed Kane type Semiconductors	88
3.2.6	Formulation of the DSL in n-Channel Inversion Layers of Germanium	90
3.2.7	Formulation of the DSL in n-Channel Inversion Layers of GaSb	91
3.3	Results and Discussion	92
3.4	Open Research Problems.	104
	References	105
 Part II Influence of Light Waves on the DSL in Opto-Electronic Semiconductors		
4	The DSL for III–V, Ternary and Quaternary Semiconductors Under External Photo-Excitation	109
4.1	Introduction	109
4.2	Theoretical Background.	110
4.2.1	The Formulation of the Electron Dispersion Law in the Presence of Light Waves in III–V, Ternary and Quaternary Semiconductors	110

4.2.2	The Formulation of the DSL in the Presence of Light Waves in III–V, Ternary and Quaternary Semiconductors	120
4.3	Results and Discussion	121
4.4	Open Research Problems.	130
	References	131
5	The DSL for Ultra-Thin Films of III–V, Ternary and Quaternary Semiconductors Under External Photo-Excitation.	133
5.1	Introduction	133
5.2	Theoretical Background.	133
5.2.1	Formulation of the 2D DSL in the Presence of Light Waves in Ultra-Thin Films of III–V, Ternary and Quaternary Semiconductors	133
5.3	Results and Discussion	137
5.4	Open Research Problems.	148
	Reference	149
6	The Opto-DSL in III–V, Ternary and Quaternary Semiconductors Under Magnetic Quantization	151
6.1	Introduction	151
6.2	Theoretical Background.	151
6.3	Results and Discussion	154
6.4	Open Research Problem	162
	Reference	162
7	The Opto-DSL of III–V, Ternary and Quaternary Semiconductors Under Cross-Fields Configuration.	163
7.1	Introduction	163
7.2	Theoretical Background.	163
7.3	Results and Discussion	166
7.4	Open Research Problem	176
	Reference	176
Part III	Influence of Intense Electric Field on the DSL in Opto-Electronic Semiconductors	
8	The DSL for III–V, Ternary and Quaternary Semiconductors Intense Electric Field	179
8.1	Introduction	179
8.2	Theoretical Background.	179

8.2.1	The DSL in Bulk Optoelectronic Semiconductors Under Strong Electric Field	179
8.2.2	The Magneto DSL in Optoelectronic Semiconductors Under Strong Electric Field	183
8.2.3	The DSL in Quantum Wells of Optoelectronic Semiconductors Under Strong Electric Field	186
8.2.4	The DSL in NIPI Structures of Optoelectronic Semiconductors Under Strong Electric Field	188
8.2.5	The DSL in n-Channel Inversion Layers of Optoelectronic Semiconductors.	189
8.2.6	The DSL in Effective Mass Super-Lattices of Optoelectronic Semiconductors Under Magnetic Quantization.	194
8.2.7	The DSL in Super-Lattices of Optoelectronic Semiconductors with Graded Interfaces Under Magnetic Quantization.	197
8.3	Results and Discussion	202
8.4	Open Research Problems.	207
	References	211
9	Suggestion for Experimental Determinations of 2D and 3D DSLs and Few Related Applications	213
9.1	Introduction	213
9.2	Suggestion for the Experimental Determinations of the 3D and 2D DSLs for Semiconductors Having Arbitrary Dispersion Laws.	213
9.3	Different Related Applications	216
9.4	Open Research Problem	245
	References	246
10	Conclusion and Scope for Future Research	251
	References	254
 Part IV Appendices		
11	DSL in Bulk Specimens of Non-Parabolic Materials	257
11.1	Introduction	257
11.2	Theoretical Background.	258
11.2.1	Formulation of 3D DSL in Non-Linear Optical and Tetragonal Semiconductors	258
11.2.2	III–V Materials.	258
11.2.3	II–VI Materials.	261

11.2.4	Bismuth.	261
11.2.5	IV–VI Semiconductors	262
11.2.6	Stressed Materials.	265
11.2.7	n-Te	266
11.2.8	n-Type Gallium Phosphide.	266
11.2.9	Platinum Antimonide	267
11.2.10	n-Ge	268
11.2.11	n-GaSb	269
11.3	Open Research Problem	270
	Reference	270
12	DSL in Non-Parabolic Semiconductors Under	
	Magnetic Quantization	271
12.1	Introduction	271
12.2	Theoretical Background.	272
12.2.1	The DSL in Non-Linear Optical Semiconductors Under Magnetic Quantization.	272
12.2.2	The DSL in Kane Type III–V Semiconductors Under Magnetic Quantization.	274
12.2.3	The DSL in II–VI Semiconductors Under Magnetic Quantization.	279
12.2.4	The DSL in Bismuth Under Magnetic Quantization.	281
12.2.5	The DSL in IV–VI Semiconductors Under Magnetic Quantization.	285
12.2.6	The DSL in Stressed Semiconductors Under Magnetic Quantization.	288
12.2.7	The DSL in Tellurium Under Magnetic Quantization.	289
12.2.8	The DSL in n- Gallium Phosphide Under Magnetic Quantization.	290
12.2.9	The DSL in Platinum Antimonide Under Magnetic Quantization.	290
12.2.10	The DSL in Bismuth Telluride Under Magnetic Quantization.	291
12.2.11	The DSL in Germanium Under Magnetic Quantization.	292
12.2.12	The DSL in Gallium Antimonide Under Magnetic Quantization.	293
12.2.13	The DSL in II–V Semiconductors Under Magnetic Quantization.	294
12.3	Open Research Problems.	295
	References	297

13	DSL in Compound Semiconductors and Their Nano-Structures Under Cross-Fields Configuration	299
13.1	Introduction	299
13.2	Theoretical Background.	300
13.2.1	Non-linear Optical Materials	300
13.2.2	Special Cases for III–V, Ternary and Quaternary Materials.	303
13.2.3	II–VI Semiconductors	305
13.2.4	Formulation of DSL in Bi	306
13.2.5	IV–VI Materials	311
13.2.6	Stressed Kane Type Semiconductors	311
13.2.7	Ultrathin Films of Non-linear Optical Materials	313
13.2.8	Special Cases for Ultrathin Films of III–V, Ternary and Quaternary Materials.	313
13.2.9	Ultrathin Films of II–VI Materials	315
13.2.10	The Formulation of DSL in Ultrathin Films of Bismuth.	315
13.2.11	Ultrathin Films of IV–VI Materials.	318
13.2.12	Ultrathin Films of Stressed Semiconductors.	318
13.3	Open Research Problems.	319
	References	319
14	DSL in Heavily Doped Compound Semiconductors	321
14.1	Introduction	321
14.2	Theoretical Background.	322
14.2.1	Study of the DSL in Heavily Doped Tetragonal Materials Forming Gaussian Band Tails	322
14.2.2	Study of the DSL in Heavily Doped III–V, Ternary and Quaternary Materials Forming Gaussian Band Tails	330
14.2.3	Study of the DSL in Heavily Doped II–VI Materials Forming Gaussian Band Tails	333
14.2.4	Study of the DSL in Heavily Doped IV–VI Materials Forming Gaussian Band Tails	334
14.2.5	Study of the DSL in Heavily Doped Stressed Materials Forming Gaussian Band Tails	335
14.3	Open Research Problems.	338
	References	341
