

Contents

1	Introduction	1
1.1	North East India	1
1.2	Statement of the Problem	3
1.3	Data Used	3
1.4	Implications	4
1.5	Organization of the Study	4
	References	5
2	The Study Area	7
2.1	The Land	7
2.2	Climate and Vegetation	9
2.3	Population and Resources	10
2.4	The Extent of Deforestation	14
	References	16
3	Conceptualizing Drivers of Forest Loss	19
3.1	Conceptualizing Deforestation	19
3.2	Proximate and Underlying Drivers	21
3.3	Summing Up	22
	References	22
4	Data and Methods	25
4.1	Introduction	25
4.2	Classification of Land-Use/Land-Cover	26
	References	28
5	Land-Use Land-Cover Change	29
5.1	Introduction	29
5.2	Land Use/Land Cover Change in Hamren, Karbi Anglong	30
5.2.1	LUCC and NDVI Variability	39
5.3	Land Use/Land Cover Change in the Rani-Garbhanga Reserved Forest	44

5.4	Land Use/Land-Cover Change in the Nandapha National Park.	47
5.5	Summing Up	51
	References	52
6	Landscape Metrics	53
6.1	Habitat Loss and Fragmentation.	53
6.2	Landscape Metrics in Hamren	54
6.3	Landscape Metrics in Rani-Garbhangha	56
6.4	Landscape Metrics in Namdapha	58
6.5	Forest Fragmentation	59
	References	59
7	Drivers of Forest Loss	61
7.1	Jhum Cultivation	61
7.2	Forest Loss: Beyond Shifting Cultivation	62
7.2.1	Encroachment of Forest Areas	62
7.2.2	Timber Consumption Within the Region	63
7.3	Drivers of Forest Loss in Hamren, Rani-Garbhangha and Namdapha	64
	References	65
8	Conclusions	67
8.1	Human Domination in the Anthropocene.	67
8.2	Hotspot Under Duress	69
	References	70

Over-Exploitation of Forests

A Case Study from North East India

Saikia, A.

2014, VIII, 72 p. 35 illus., 28 illus. in color., Softcover
