

Contents

1	General Introduction	1
1.1	Research Context	1
1.1.1	From Real-World to Vision-based Animation	3
1.1.2	High-Level Research Directions	4
1.1.3	Domains of Application	7
1.2	The Problem: Non-rigid Parametrization for Video-based Animation	9
1.3	Motivation, Objectives and Novelty	10
1.4	Major Challenges	11
1.5	Our Original Contributions	12
1.6	Thesis Organization	14
	References	15
2	Sparse Constraints Over Animatable Subspaces	17
2.1	Introduction	17
2.2	Related Works on Interactive Deformable Surface	19
2.2.1	Deformable Models	19
2.2.2	Surface-based Parameterization	21
2.2.3	Skeleton-based Parameterization	22
2.2.4	Space-based Parameterization	23
2.2.5	Cage-based Parameterization	24
2.3	Our Approach: Cage-based Shape Inverse kinematics	28
2.3.1	Laplacian-based Mean-Value Cage	30
2.3.2	Dual-Laplacian Surface Regularization	33
2.3.3	Screen-space Surface Constraints	34
2.3.4	Indirect Dual-Laplacian Cage-based Fitting	36
2.3.5	Experimental Results and Evaluation	38
2.3.6	A Mathematical Study	40
2.4	Beyond the Cage: A Generalization to Skeletal Structures	42
2.4.1	Differential Skeletal Editing	43
2.4.2	Rigidity-Breaking Skeletal Optimization	43
2.4.3	Experimental Results	45
2.5	Discussion and Conclusions	47
	References	48

3	Reusing Performance Capture Data	53
3.1	Introduction	53
3.2	Related Works from Capture to Re-Use of Dynamic Surfaces.	55
3.2.1	Acquiring Surface in Motion	55
3.2.2	Performance Capture Reuse	61
3.3	Our Approach: Cage-based Animation Fitting.	65
3.3.1	Non-rigid Dynamic Shape Analysis.	65
3.3.2	Cage-based Conversion from Performance Mesh Animation	67
3.3.3	Estimation of Space-Time Cages for Non-rigid Surfaces	69
3.3.4	Experimental Results and Video-based Evaluation	71
3.4	Beyond the Cage: Animation Cartoonization.	77
3.4.1	Foundation of Animation Cartoonization	77
3.4.2	Cartoonization of Multi-View Data	78
3.4.3	Space-Time Exaggerating of Life-Like Surfaces	80
3.4.4	Depicting Video-Infused Appearance.	84
3.4.5	Experimental Results.	86
3.5	Discussion	87
3.6	Conclusions	89
	References	90
4	Toward Non-rigid Dynamic Cage Capture	93
4.1	Introduction	93
4.2	Related Works from Reconstruction to Registration.	96
4.2.1	Image-based Shape Reconstruction	96
4.2.2	Non-rigid Shape Registration	101
4.3	Our Approach: Handle-Aware Detached Registration.	108
4.3.1	Non-rigid Registration Setup	108
4.3.2	Target Point-Clouds Reconstruction	109
4.3.3	Normal-Guided Pairwise Correspondences	113
4.3.4	Iterative Elasto-Plastic Optimization	115
4.3.5	Weight-Control Update Rules.	119
4.3.6	Experimental Results.	121
4.4	Beyond The Cage: Toward Captured RGB-Images	123
4.5	Discussions.	125
4.6	Conclusions	128
	References	129
5	Conclusions	135
5.1	Summary of Contributions	135
5.2	Overall Discussion.	140
5.3	Perspectives and Future Directions	141

Cage-based Performance Capture

Savoye, Y.

2014, X, 141 p. 86 illus., 85 illus. in color., Hardcover

ISBN: 978-3-319-01537-8
