|----------|--|-----------|
| <b>1</b> | <b>Fundamentals and Design Guides for Optical Waveguides . . . . .</b>                 | <b>1</b>  |
| 1.1      | State-of-the-Art and Challenges . . . . .  | 2         |
| 1.1.1    | Rationale and Challenges for Optical Interconnects<br>to Electronic Circuits . . . . . | 2         |
| 1.1.2    | Evolution of Optical Interconnects . . . . .   | 7         |
| 1.1.3    | Waveguide Component and Integration Technologies . . . .                               | 13        |
| 1.2      | Fundamental Theory and Design Methodology . . . . .                                    | 20        |
| 1.2.1    | Classification of Optical Waveguides . . . . .   | 21        |
| 1.2.2    | Fundamental Waveguide Theory . . . . .   | 24        |
| 1.2.3    | Optical Waveguide Design Methodology . . . . .   | 28        |
| 1.3      | Waveguide Materials Selection and Fabrication Techniques . . . .                       | 34        |
| 1.4      | Environmental Compliance of Optical Waveguide Materials . . . .                        | 46        |
| 1.4.1    | RoHS . . . . .   | 47        |
| 1.4.2    | WEEE . . . . .   | 48        |
| 1.5      | Summary . . . . .  | 49        |
|          | References . . . . .   | 50        |
| <b>2</b> | <b>Characterization Methodologies of Optical Waveguides . . . . .</b>                  | <b>53</b> |
| 2.1      | Geometrical Inspection . . . . .   | 53        |
| 2.2      | Refractive Index Measurements . . . . .  | 55        |
| 2.2.1    | Reflectometry and Ellipsometry . . . . .   | 56        |
| 2.2.2    | Surface Plasmon Resonance . . . . .  | 58        |
| 2.2.3    | Prism Coupling . . . . .   | 60        |
| 2.2.4    | Propagation-Mode Near-Field Technique . . . . .  | 61        |
| 2.2.5    | Refracted Near-Field Technique . . . . .   | 62        |
| 2.2.6    | M-Line Spectroscopy (MLS) . . . . .  | 63        |
| 2.3      | Coupling Techniques . . . . .  | 65        |
| 2.3.1    | Prism Coupling Method . . . . .  | 66        |
| 2.3.2    | End-Coupling Method . . . . .  | 68        |
| 2.3.3    | Lunch and Tapered-Coupling Method . . . . .  | 69        |
| 2.3.4    | Grating Coupling Method . . . . .  | 71        |

|          |  |            |
|----------|--|------------|
| 2.4      | Optical Loss .....   | 72         |
| 2.4.1    | Propagation Losses by Radiation .....                                  | 73         |
| 2.4.2    | Propagation Losses by Absorption<br>and Mode Conversion .....          | 73         |
| 2.4.3    | Propagation Losses by Diffusion .....                                  | 75         |
| 2.4.4    | Measurement of Propagation Losses .....                                | 75         |
| 2.5      | Optoelectronic Characterization .....                                  | 79         |
| 2.5.1    | Optical Power Meters .....   | 79         |
| 2.5.2    | Optical Time-Domain Reflectometers (OTDRs) .....                       | 80         |
| 2.5.3    | Spectrum Analyzers .....   | 80         |
| 2.5.4    | Eye Diagrams .....   | 82         |
| 2.6      | Electro-optic Effects .....  | 83         |
| 2.7      | Thermo-optic Effects .....   | 89         |
| 2.8      | Acousto-optic Effects .....  | 90         |
| 2.9      | Nonlinear Optic Effects .....  | 93         |
| 2.9.1    | Self-phase Modulation .....  | 95         |
| 2.9.2    | Cross-Phase Modulation .....   | 95         |
| 2.9.3    | Four-Wave Mixing .....   | 96         |
| 2.9.4    | Stimulated Raman Scattering .....                                      | 96         |
| 2.9.5    | Stimulated Brillouin Scattering .....                                  | 97         |
| 2.10     | Reliability Evaluation .....   | 97         |
| 2.10.1   | Failure Modes and Mechanisms .....                                     | 97         |
| 2.10.2   | Reliability Qualifications .....                                       | 99         |
