1	Advances in Modern Artificial Intelligence	1
	Jeffrey W. Tweeddale and Lakhmi C. Jain	
1.1	Introduction	2
1.2	Artificial Intelligence	3
1.3	Research Directions	4
1.4	Contributions	6
1.4.1	Classifiers	7
1.4.2	Neural Nets	9
1.4.3	Fuzzy Logic	9
1.4.4	Multi-agent Systems	11
1.4.5	Applications	12
	References	14
2	Computing Efficiently Spectral-Spatial Classification of Hyperspectral Images on Commodity GPUs	19
	Pablo Quesada-Barriuso, Francisco Argüello and Dora B. Heras	
2.1	Introduction	20
2.2	GPU Architecture	21
2.3	Spectral–Spatial Classification of Hyperspectral Images	23
2.3.1	Robust Color Morphological Gradient	24
2.3.2	Watershed Transform Based on Cellular Automata	25
2.3.3	Majority Vote	27
2.4	Spectral–Spatial Processing in GPU	28
2.4.1	Robust Color Morphological Gradient	29
2.4.2	Watershed Based on CA	30
2.4.3	Majority Vote	32
2.5	Results	32
2.5.1	SVM Spectral Classification	36
2.5.2	Robust Color Morphological Gradient	37
2.5.3	Asynchronous CA–Watershed	38
2.5.4	Majority Vote	38
2.6	Conclusions	38
	References	40

3	Early Smoke Detection in Outdoor Space by Spatio-Temporal Clustering Using a Single Video Camera.	43
	Margarita Favorskaya and Konstantin Levitin	
3.1	Introduction	43
3.2	Related Work	44
3.3	Spatio-Temporal Analysis of Smoke Detection	46
3.3.1	Proposed Motion Analysis	46
3.3.2	Color-Texture Analysis	47
3.3.3	Estimation of Smoke Turbulence	48
3.3.4	Spatio-Temporal Clustering	49
3.3.5	Intelligent Algorithm of Smoke Detection	51
3.4	Software “Smoke Alarm”	51
3.5	Experimental Results	54
3.6	Conclusion	55
	References	55
4	Using Evolved Artificial Neural Networks for Providing an Emergent Segmentation with an Active Net Model.	57
	Jorge Novo, Cristina V. Sierra, José Santos and Manuel G. Penedo	
4.1	Introduction and Previous Work	58
4.2	Methods	59
4.2.1	Topological Active Nets	59
4.2.2	Artificial Neural Networks for Topological Active Nets Deformation	62
4.2.3	Differential Evolution for the optimization of the Artificial Network	64
4.3	Results	65
4.3.1	Segmentation of CT images	66
4.3.2	Segmentation of CBCT Images.	67
4.3.3	Segmentation of Retinal Images	68
4.4	Conclusions	71
	References	71
5	Shape from SEM Image Using Fast Marching Method and Intensity Modification by Neural Network	73
	Yuji Iwahori, Kazuhiro Shibata, Haruki Kawanaka, Kenji Funahashi, Robert J. Woodham and Yoshinori Adachi	
5.1	Introduction	74
5.2	Characteristics of SEM Image.	75
5.3	Shape from SEM Image with Oblique Light Source	76
5.3.1	Fast Marching Method.	76
5.3.2	Modification to SEM.	77
5.3.3	Intensity Modification for Oblique Light Source Image.	78

5.4	Experiments	79
5.4.1	Simulation	80
5.4.2	Real SEM Image	83
5.5	Conclusion	85
	References	86
6	Fuzzy Evidence Reasoning and Navigational Position Fixing	87
	Włodzimierz Filipowicz	
6.1	Introduction	87
6.2	Uncertain Evidence and its Representation	88
6.2.1	Position Fixing and Evidence Combining.	92
6.3	Proposed Method of Evidence Representation Transformation	98
6.4	Summary and Conclusions	100
	References	102
7	Segmentation of Hyperspectral Images by Tuned Chromatic Watershed	103
	Ramón Moreno and Manuel Graña	
7.1	Introduction	103
7.2	Hyperspherical Coordinates	105
7.3	Chromatic Gradient	107
7.4	Segmentation Method	108
7.4.1	t-Watershed Algorithm	109
7.5	Experimental Results	109
7.6	Conclusion	111
	References	112
8	Impact of Migration Topologies on Performance of Teams of Agents	115
	Piotr Jędrzejowicz and Izabela Wierzbowska	
8.1	Introduction	115
8.2	TA-Teams: Concept, Implementation and Settings.	117
8.2.1	Working Strategy	118
8.3	Computational Experiment Design.	119
8.3.1	Combinatorial Optimization Problem.	120
8.3.2	Optimizing Agents	120
8.3.3	Migration Settings.	121
8.3.4	Other Settings.	122
8.4	Computational Experiment Results	122
8.5	Conclusions	127
	References	128

9 A Cooperative Agent-Based Multiple Neighborhood Search for the Capacitated Vehicle Routing Problem	129
Dariusz Barbucha	
9.1 Introduction	130
9.2 Background	131
9.2.1 Multiple Neighborhood Search	131
9.2.2 Vehicle Routing Problems	132
9.3 A Cooperative Agent-Based Multiple Neighborhood Search for the Capacitated Vehicle Routing Problem	134
9.4 Computational Experiment	137
9.5 Conclusions	140
References	141
 10 Building the “Automatic Body Condition Assessment System” (ABiCA), an Automatic Body Condition Scoring System using Active Shape Models and Machine Learning	 145
Rafael Tedín, José A. Becerra and Richard J. Duro	
10.1 Introduction	146
10.2 Background	147
10.3 Assessing the Error Between Experts and Constructing a BCS Dataset.	149
10.3.1 Reliability of the Experts	149
10.3.2 Dataset and Error Estimation	151
10.4 Finding the Shape of a Cow	152
10.4.1 Active Shape Models.	153
10.4.2 Experimenting with More Local Appearance Models	154
10.4.3 Extension to Multi-Channel Images.	156
10.4.4 The Back Shape of a Cow	157
10.5 Using the Shape of the Cow for Obtaining the BCS	159
10.5.1 BCS Estimation by Classifiers	159
10.5.2 BCS Estimation by Symbolic Regression.	160
10.5.3 Choice of the Estimation Method	161
10.6 The ABiCA Final System.	163
10.6.1 Results.	164
10.7 Conclusions	166
References	167
 11 The Impact of Network Characteristics on the Accuracy of Spatial Web Performance Forecasts	 169
