<b>1</b>	<b>Intervals</b>	1
1.1	Introduction: The Classical Interval System	1
1.1.1	Real Numbers and Numerical Computation	7
1.1.2	Essential Reason for Computation with Intervals	7
1.1.3	Why Intervals?	8
1.1.4	Specificity of the System of Intervals	9
1.2	Limitations of System $I(\mathbb{R})$	10
1.2.1	Equations $A + X = [0, 0]$ and $A * X = [1, 1]$	11
1.2.2	Solution of the Equation $A + X = B$	11
1.2.3	Interpretation of the Relations on Intervals	12
1.2.4	Standards, Specifications and Quantifiers	13
1.2.5	Semantic Vacuity of the Solution of $A + X = B$	13
1.2.6	Logical Insufficiency of the Digital Outer Rounding	14
1.2.7	Arithmetical Limitation of Digital Outer Rounding	15
1.2.8	Semantic Drawbacks	15
<b>2</b>	<b>Modal Intervals</b>	17
2.1	Introduction	17
2.2	Construction of the Modal Intervals	18
2.2.1	Concepts, Definitions and Notations	18
2.2.2	Set of Predicates Accepted by $A \in I^*(\mathbb{R})$	20
2.2.3	Canonical Coordinates of the Modal Intervals	21
2.2.4	Modal Inclusion and Equality	23
2.2.5	Duality and Co-predicates on $I^*(\mathbb{R})$	26
2.2.6	Rounding on $(I^*(\mathbb{R}), I^*(\mathbb{D}))$	27
2.2.7	Operations in the Lattice $(I^*(\mathbb{R}), \subseteq, \leq)$	28
2.2.8	Interval Predicates and Co-predicates	31
2.2.9	The $k$ -Dimensional Case	33
2.3	Concluding Remarks	35

<b>3</b>	<b>Modal Interval Extensions</b> .....	39
3.1	Introduction.....	39
3.1.1	Poor Computational Extension .....	41
3.1.2	Modal Interval Extension .....	42
3.2	Semantic Functions .....	43
3.2.1	Properties of the Semantic Extensions.....	45
3.2.2	Characterization of <i>JM</i> -Commutativity .....	48
3.3	Semantic Theorems .....	53
3.4	Syntactic Functions .....	59
3.4.1	Syntactic Extensions .....	59
3.4.2	Modal Syntactic Operators.....	62
3.4.3	Modal Syntactic Computations with Rounding .....	70
3.5	Concluding Remarks .....	71
<b>4</b>	<b>Interpretability and Optimality</b> .....	73
4.1	Introduction.....	73
4.2	Interpretability and Optimality .....	73
4.2.1	Uni-incidence and Multi-incidence .....	74
4.2.2	Interpretability in the Uni-incidence Case.....	75
4.2.3	Optimality in the Uni-incidence Case .....	78
4.2.4	Tree-Optimality .....	82
4.2.5	Interpretability in the Multi-incidence Case.....	83
4.2.6	Optimality in the Multi-incidence Case .....	93
4.3	Conditional Optimality.....	98
4.3.1	Conditional Tree-Optimality .....	104
4.4	<i>m</i> -Dimensional Computations .....	106
4.5	Additional Examples .....	115
<b>5</b>	<b>Interval Arithmetic</b> .....	121
5.1	Introduction.....	121
5.2	One-Variable Function .....	122
5.3	Arithmetic Operators.....	122
5.3.1	Properties of the Arithmetic Operations .....	125
5.3.2	Inner-Rounding and Computations .....	128
5.3.3	Sub-distributivity of the Operations $*$ and $+$ .....	128
5.3.4	Metric Functions.....	129
5.4	Interval Arithmetic for the C++ Environment .....	131
5.4.1	About the Library.....	132
5.4.2	Available Functions and Operators .....	133
<b>6</b>	<b>Equations and Systems</b> .....	143
6.1	Introduction.....	143
6.2	Linear Equation .....	143
6.3	Formal Solutions to a Linear System.....	144
6.3.1	Solving a Linear System .....	146
6.3.2	Algorithm with Rounding .....	147

6.3.3	Sufficient Conditions for Convergence .....	150
6.3.4	Sufficient Condition for Non-convergence .....	152
6.3.5	Solution in the Case of Non-convergence .....	152
6.4	Logical Meaning of the Solution .....	155
6.4.1	Semantics in the General Case .....	156
6.5	System Solution Sets .....	157
<b>7</b>	<b>Twins and <math>f^*</math> Algorithm</b> .....	159
7.1	Introduction .....	159
7.2	Twins .....	160
7.2.1	Twins Associated to the Relations $\leq$ and $\subseteq$ .....	160
7.2.2	Proper Twins .....	166
7.2.3	The Set of Twins .....	169
7.3	Symmetries .....	170
7.4	Semantic Extension of a Function to $I^*(I^*(\mathbb{R}))$ .....	172
7.5	The $f^*$ Algorithm .....	172
7.5.1	Approximate *-Semantic Extension .....	173
7.5.2	Basic Algorithm .....	177
7.5.3	Improvements .....	179
7.5.4	Termination, Soundness and Completeness .....	183
<b>8</b>	<b>Marks</b> .....	185
8.1	Introduction .....	185
8.2	Marks .....	186
8.2.1	Real Line, Digital Line and Interval Analysis .....	186
8.2.2	From the Set-Theoretical Interval System to Modal Intervals .....	187
8.2.3	Deficiencies in the System $I^*(\mathbb{R})$ .....	187
8.2.4	The System of Marks .....	189
8.3	Marks and Associated Intervals .....	190
8.3.1	Mark on a Digital Scale .....	191
8.3.2	Imprecision and Validity of a Mark .....	193
8.3.3	Associated Intervals to a Mark .....	193
8.4	Relations in the Set of the Marks .....	195
8.4.1	Equality Relations .....	195
8.4.2	Inequality Relations .....	196
8.4.3	Strict Inequality Relations .....	197
8.5	Mark Operators .....	197
8.5.1	Mark Operators over $I^*(\mathbb{R})$ .....	198
8.5.2	Mark Operators over $\mathbb{M}(t, n)$ .....	199
8.6	Max and Min Operators .....	201
8.6.1	Maximum .....	201
8.6.2	Minimum .....	203
8.7	Arithmetic Operators .....	204
8.7.1	Product Operator .....	204
8.7.2	Quotient Operator .....	205

8.7.3	Sum of Operands Having the Same Sign .....	207
8.7.4	Sum with Operators of Different Signs (Subtraction) ....	208
8.8	Semantic Interpretations .....	219
8.9	Functions of Marks .....	221
8.10	Remarks About Granularity .....	227
<b>9</b>	<b>Intervals of Marks</b> .....	229
9.1	Introduction .....	229
9.2	Intervals of Marks .....	230
9.3	Relations in the Set of Intervals of Marks .....	234
9.3.1	Material Relations .....	234
9.3.2	Weak Relations .....	235
9.3.3	Interval Lattices .....	238
9.3.4	Interval Predicates and Co-predicates .....	240
9.3.5	$k$ -Dimensional Intervals of Marks .....	241
9.4	Interval Extensions of Functions of Marks .....	242
9.4.1	Semantic Functions .....	244
9.4.2	Properties of the $*$ - and $**$ -Semantics Functions .....	246
9.4.3	Semantic Theorems .....	251
9.5	Syntactic Extensions .....	254
9.5.1	Arithmetic Operations for Intervals of Marks .....	259
<b>10</b>	<b>Some Related Problems</b> .....	265
10.1	Introduction .....	265
10.2	Minimax .....	268
10.2.1	Solution of Unconstrained Problems .....	269
10.2.2	Minimax Algorithm .....	272
10.2.3	Solution of Constrained Problems .....	276
10.3	Solution Sets .....	279
10.3.1	Pavings .....	281
10.3.2	Interval Estimations .....	290
10.4	A Semantic View of Control .....	298
10.4.1	Measurements and Uncertainty .....	301
10.4.2	An Application to Temperature Control .....	302
10.5	Concluding Remarks .....	305
	<b>References</b> .....	307
	<b>Index</b> .....	313

Modal Interval Analysis

New Tools for Numerical Information

Sainz, M.A.; Armengol, J.; Calm, R.; Herrero, P.; Jorba

Jorba, L.; Vehi, J.

2014, XVI, 316 p. 37 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-01720-4
