

# Contents

<b>1</b>	<b>Methods Describing the Interaction of Laser Radiation with Biological Tissues</b>	<b>1</b>
1.1	Introduction	1
1.2	The Structure and Optical Properties of Biological Tissues	2
1.3	Structure and Optical Properties of Blood	7
	References	8
<b>2</b>	<b>Overview of Theoretical Approaches to the Analysis of Light Scattering</b>	<b>9</b>
2.1	Introduction	9
2.2	Optical Properties of Tissues with Multiple Scattering	11
2.3	Stationary Theory of Radiative Transfer	12
2.4	Approximate Methods for Solving the Transport Equation	13
2.5	The Nonstationary Theory of Radiative Transfer	20
2.6	Methods for Measuring Optical Parameters of Biological Tissues	22
2.7	Methods for Solving Inverse Problems of Scattering Theory	23
2.8	Resume	23
	References	24
<b>3</b>	<b>Modeling of Optical Characteristics of Spherical Particles in the Optical Resonator Cavity</b>	<b>27</b>
3.1	Introduction	27
3.2	Vector Spherical Harmonics	28
3.3	Expressions for the Internal, Scattered, Incident Fields at an $j$ th Particle	30
3.4	Scattering of a Plane Electromagnetic Wave by a Three-Layer Spherical Particle	37
3.5	Numerical Study of the Algebraic Equations	39
3.6	Scattering Matrix	42

3.7	Eigenmodes of the Optical Cavity Containing a Cell of Spherical Particles . . . . .	43
3.8	Numerical Calculations for the Resonator with a Simulated Medium Conclusions . . . . .	44
	References . . . . .	46
<b>4</b>	<b>Mathematical Models of the Interaction of Laser Radiation with Turbid Media . . . . .</b>	<b>47</b>
4.1	Introduction . . . . .	47
4.2	An Electrodynamic Model of the Optical Characteristics of Blood and Capillary Blood Flow Rate. . . . .	49
4.3	Reflection of a Plane Wave from a Layer with a Slowly Varying Thickness . . . . .	50
4.4	Reflection of a Gaussian Beam from a Layer with a Slowly Varying Thickness . . . . .	57
4.5	The Reflected Field . . . . .	60
4.6	Calculation of the Rate of Blood Flow in a Capillary . . . . .	63
4.7	Numerical Calculations for a Model Medium and Conclusions . . . . .	64
	References . . . . .	65
<b>5</b>	<b>Study of the Optical Characteristics of a Biotissue with Large-Scale Inhomogeneities . . . . .</b>	<b>67</b>
5.1	Introduction . . . . .	67
5.2	Scattering of a Plane Wave from the Rough Surface . . . . .	68
5.3	The Scattered Field on the Fractal Surface . . . . .	72
5.4	Reflection of a Plane Wave from a Layer with Allowance for Surface Roughness . . . . .	74
5.5	Numerical Calculations for a Model Medium and Conclusions . . . . .	77
	References . . . . .	79
<b>6</b>	<b>Light Scattering by Dielectric Bodies of Irregular Shape in a Layered Medium . . . . .</b>	<b>81</b>
6.1	Introduction . . . . .	81
6.2	Matrix Formulation of Scattering for the $j$ th Particle of an Arbitrary Shape . . . . .	82
6.3	Explicit Expressions for the Integrals with Vector Products of Vector Spherical Functions. . . . .	86
6.4	Matrix Formulation of Scattering for the $j$ th Bilayer Particle of an Arbitrary Shape . . . . .	89
6.5	Reflection of a Plane Wave from a Layer with a Slowly Varying Thickness . . . . .	98

6.6	Spectrum of Action of Laser Radiation on the Hemoglobin Derivatives . . . . .	99
6.7	Numerical Calculations for a Model Medium and Conclusions . . . . .	101
	References . . . . .	104
<b>7</b>	<b>Modeling of the Optical Characteristics Fibrillar Structure . . . . .</b>	<b>107</b>
7.1	Introduction . . . . .	107
7.2	Scattering on a Parallel Cylinders . . . . .	108
7.3	Reflection of a Plane Wave from a Layer with the Fibrillar Structure. . . . .	114
7.4	Numerical Calculations for a Model Medium and Conclusions . . . . .	116
	References . . . . .	119
<b>8</b>	<b>Study of Optical Properties of Biotissues by the Intracavity Laser Spectroscopy Method . . . . .</b>	<b>121</b>
8.1	Introduction . . . . .	121
8.2	Integral Equation for Natural Oscillations of Field in a Resonator . . . . .	122
8.3	Numerical Calculations for a Model Medium and Conclusions . . . . .	125
	References . . . . .	127
<b>9</b>	<b>Study of the Optical Characteristics of Thin Layer of the Biological Sample . . . . .</b>	<b>129</b>
9.1	Introduction . . . . .	129
9.2	Scattering of a Plane Wave from a Rough Surface . . . . .	130
9.3	Numerical Calculations for a Resonator with Chosen Parameters and Conclusions . . . . .	136
	References . . . . .	137
<b>10</b>	<b>Simulation of the Thermal Processes . . . . .</b>	<b>139</b>
10.1	Introduction . . . . .	139
10.2	Mathematical Model for Heating of Biological Tissue by Laser Radiation . . . . .	140
10.3	Numerical Calculations Using a Model Medium and Conclusions . . . . .	142
10.4	The Mathematical Model of Thermo-Chemical Denaturation of Biological Structure . . . . .	144
	References . . . . .	145
	<b>Index . . . . .</b>	<b>147</b>

Laser Interaction with Biological Material  
Mathematical Modeling

Kulikov, K.

2014, XI, 149 p. 30 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-01738-9
