

Contents

1	Plantation Forests	1
1.1	Plantation Forests Around the World	1
1.2	Purposes of Plantation Forests	3
1.3	About This Book	5
2	Biology of Plantation Growth.	9
2.1	Basic Plant Biology	9
2.1.1	Tree Requirements and Characteristics	9
2.1.2	Photosynthesis and Water Use	11
2.1.3	Temperature	12
2.1.4	Nutrients.	12
2.2	Principles of Plantation Growth	14
2.3	An Example of Plantation Growth.	15
2.3.1	Leaf Development	17
2.3.2	Root, Branch and Stem Growth	19
2.3.3	Growth Variations and Leaf and Root Turnover	20
2.4	Growth of Individual Trees	22
3	Growth Rates and Wood Quality	25
3.1	Expressing Growth Rates of Plantations	26
3.2	How Fast Do Plantations Grow?	28
3.3	Wood Quality	32
3.3.1	Tracheid and Fibre Length	33
3.3.2	Microfibril Angle	34
3.3.3	Wood Density	35
3.3.4	Grain Angle	38
3.3.5	Sapwood and Heartwood	38
3.3.6	Reaction Wood	39
3.3.7	Growth Stresses	40
3.3.8	Knots	41
3.4	Silviculture and Wood Quality	41

4	Choosing the Species and Site	45
4.1	Land Availability	45
4.2	Selecting the Species	46
4.3	Site Productive Capacity	48
4.4	Predicting Site Productive Capacity	49
4.4.1	Site Classification Approach	49
4.4.2	Regression Approach	50
4.4.3	Process-Based Model Approach	52
5	Establishment	55
5.1	Cultivation	56
5.2	Seedlings	61
5.2.1	Nurseries	61
5.2.2	Factors Determining Seedling Survival and Growth	62
5.2.3	Achieving Seedling Specifications	64
5.3	Planting	69
5.4	Weed Control	72
5.4.1	Loss of Growth due to Weeds	72
5.4.2	Causes of Growth Losses	75
5.4.3	Controlling Weeds	77
5.5	Coppice	78
5.5.1	Wood Production by Coppice	79
5.5.2	Silviculture of Coppice	81
6	Nutrient Management	83
6.1	Early Growth in Relation to Nutrient Supply	84
6.1.1	Ingestad's Theory	84
6.1.2	Conclusions for Fertilisation Practice	86
6.2	A Fertiliser Regime for Sweetgum in North America	88
6.2.1	Example Details	88
6.2.2	Growth Response to Fertilisation	89
6.2.3	Nutrient Budget	90
6.2.4	Fertiliser Regime	92
6.3	Long-Term and Later Age Fertilisation	92
6.4	Assessing the Need for Fertilisation	94
6.5	Sustaining Nutrients on the Site	96
7	Stand Density and Initial Spacing	99
7.1	Stand Density	99
7.1.1	Maximum Density	100
7.1.2	Measuring Density	102
7.1.3	Stand Development in Relation to Density	102
7.2	Initial Spacing	106
7.2.1	Effects on Stand Wood Yields and Tree Sizes	107
7.2.2	Effects on Branch Size	109

7.2.3	Effects of Rectangularity of Spacing on Trees and Stands	111
7.2.4	Initial Spacing in Practice	112
8	Thinning.	115
8.1	Growth Following Thinning.	116
8.2	Hazards of Thinning.	119
8.3	Tree Selection.	121
8.4	Developing Thinning Regimes.	123
8.5	Thinning in Practice.	127
9	Pruning.	131
9.1	Natural Pruning	132
9.2	Knots and Wood Quality	133
9.3	Branch Development	134
9.4	Effects of Pruning.	135
9.5	Pruning Regime	137
9.5.1	When to Prune	138
9.5.2	Height of Pruning.	139
9.5.3	Trees to be Pruned	140
9.6	Pruning Method	141
9.7	Examples of Pruning Regimes.	143
9.7.1	Eucalypts in Australia	143
9.7.2	Teak in Costa Rica	145
9.7.3	Western White Pine in Northwestern USA	145
9.7.4	Spanish Red Cedar in Costa Rica.	146
10	Pests	147
10.1	Principles of Pest and Disease Management	147
10.1.1	Natural Occurrence of Pests and Diseases.	148
10.1.2	Control Strategies.	148
10.2	Insects.	150
10.3	Examples of Insect Pests	152
10.3.1	Leaf Beetles in Eucalypts.	153
10.3.2	Pine Weevil in Coniferous Plantations.	154
10.3.3	Transmission of Disease of Douglas Fir by Beetles	157
10.4	Mammal Pests	158
10.4.1	Control Measures	162
10.4.2	Integrated Pest Management Approach	164
11	Diseases.	169
11.1	Fungi	169
11.2	Fungal Diseases	170
11.3	Examples of Fungal Disease	171
11.3.1	Pine Needle Blight in Australasia	171

11.3.2	White Pine Blister Rust in North America	174
11.3.3	Chryphonectria Canker of Eucalypts in South Africa	176
11.3.4	Damping-Off in Nurseries	178
11.4	Other Diseases	179
12	Tree Breeding	183
12.1	Genetics	183
12.1.1	Genotype and Phenotype	184
12.1.2	Qualitative and Quantitative Traits	185
12.2	Breeding Programme Strategy	186
12.2.1	Principles	187
12.2.2	Provenance Selection and Testing	189
12.2.3	Selection	190
12.2.4	Mating	193
12.2.5	Gains	196
12.2.6	Genotype \times Environment Interactions	199
12.2.7	Interspecific Hybrids	199
12.3	Propagation	200
12.3.1	Seed Orchards	201
12.3.2	Clonal Propagation	202
12.4	Genetic Engineering	206
13	Mixed-Species Plantations	211
13.1	Growth and Development of Mixed-Species Plantations	212
13.2	Examples of Mixed-Species Plantations	215
13.2.1	Sydney Blue Gum– <i>Falcataria</i> in Hawaii	215
13.2.2	Black Alder–Poplar in Quebec	217
13.2.3	<i>Cedrela</i> – <i>Cordia</i> – <i>Hyeronima</i> in Costa Rica	219
13.2.4	Red Cedar–Silky Oak in Queensland	221
14	Silviculture and Sustainability	223
	Appendix 1: Glossary	229
	Appendix 2: Conversion Factors	239
	About the Author	241
	References	243
