1 Introduction	1
References	3
2 Fundamentals	5
2.1 Semiconductor Heterostructures.	5
2.2 Nanostructures	6
2.3 Two-Dimensional Carrier Gases and Field-Effect Transistors	8
2.3.1 Modulation-Doping	8
2.3.2 Modulation-Doped Field-Effect Transistor	9
2.4 Quantum Dots.	10
2.4.1 Fabrication	10
2.4.2 Electronic Structure.	12
2.5 Charge-Based Memories.	14
2.5.1 Semiconductor Memories.	16
2.6 Quantum Dot-Based Flash Memory (QD-Flash)	18
2.7 Summary	21
References	21
3 Charge Carriers in Quantum Dots	25
3.1 Carrier Capture and Emission in Quantum Dots	25
3.1.1 Rate Equation.	25
3.1.2 Capture Processes	28
3.1.3 Emission Processes	29
3.1.4 Tunnel Emission.	33
3.1.5 Total Emission Rate	35
3.1.6 Storage Time in Quantum Dots	35
3.2 Many-Particle Effects in Quantum Dots	37
3.3 Summary	38
References	38
4 Coupling of Quantum Dots to Two-Dimensional Carrier Gases	41
4.1 Coupling Mechanisms	41
4.1.1 Remote Impurity Scattering	42
4.1.2 Capacitive Coupling	43

4.1.3	Quantum Capacitance	45
4.1.4	Temperature Effects in the 2D Detector.	47
4.2	Summary	48
	References	49
5	Measurement Methods	51
5.1	Static Capacitance Spectroscopy	51
5.1.1	Pn Junctions	51
5.2	Time-Resolved Capacitance Spectroscopy	56
5.2.1	Measurement Principle	57
5.2.2	Rate Window and Double-Boxcar Method.	59
5.2.3	Charge-Selective DLTS Measurements	61
5.3	Capacitance and Time-Resolved Conductance Measurements of 2D Gases	62
5.4	Summary	66
	References	66
6	Electronic Properties of and Storage Times in Quantum Dots	69
6.1	GaSb/GaAs Quantum Dots	69
6.1.1	Sample QD-A: QDs	69
6.1.2	Sample QD-B: QDs with a Single Al _{0.1} Ga _{0.9} As Barrier	76
6.1.3	Sample QD-C: QDs.	81
6.1.4	Sample QD-D: QDs With Double Al _{0.3} Ga _{0.7} As Barrier	85
6.2	GaSb/GaAs Quantum Rings	89
6.2.1	Sample Structure.	89
6.2.2	Static Capacitance Measurements	89
6.2.3	Conventional DLTS	90
6.2.4	Charge-Selective DLTS	91
6.3	In _{0.25} Ga _{0.75} As/GaAs/GaP Quantum Dots.	92
6.3.1	Sample Structure.	93
6.3.2	Static Capacitance Measurements and Conventional DLTS	94
6.4	Discussion	96
6.5	Conclusion	99
	References	100
7	Carrier Dynamics in Quantum Dots Coupled to a 2DHG	103
7.1	Samples	103
7.2	Sample A: 5 nm Tunnel Barrier	105
7.2.1	Capacitance-Voltage Measurements.	105
7.2.2	Conductance Measurements	108
7.2.3	Many-Particle Level Splittings	110
7.2.4	Higher Temperatures	113

7.3	Sample B: 10 nm Tunnel Barrier.	113
7.3.1	Current Measurements	114
7.3.2	Emission and Capture Time Constants.	115
7.3.3	Many-Particle Level Splittings	117
7.3.4	Emission and Capture of Integer Number of Holes	117
7.4	Sample C: 15 nm Tunnel Barrier.	120
7.4.1	Hysteresis Measurements	121
7.5	Discussion	122
7.6	Conclusion	124
	References	125
8	Summary and Outlook.	127
