1	Introduction	1
	References	6
2	Surface Flute Waves Propagating in Uniform Magneto-Active Plasma Filled Waveguides	7
2.1	Extraordinary Polarized Surface Flute Waves Propagating in Magneto-Active Plasma Waveguides	8
2.2	Extraordinary Polarized Surface Flute Waves Propagating along Magneto-Active Plasma-Metal Boundary	13
2.3	Surface Flute Waves Propagating in Strongly Magnetized Plasma Waveguides	17
2.4	Ordinary Polarized Flute Electromagnetic Waves	20
2.5	Damping of Surface Flute X-Modes	23
2.6	Long-Wavelength Azimuthally Non-Symmetrical Surface Waves	28
2.7	Conclusions	33
	References	34
3	Coupled Surface Flute Waves Propagating in Current-Carrying Plasma Waveguides	37
3.1	Coupled Low Frequency Surface Flute Waves in Current-Carrying Plasma Waveguide	37
3.2	Coupled High Frequency Surface Flute Waves Propagating Around a Metal Current-Carrying Cylinder Immersed into Magnetized Plasma	44
3.3	Coupled High Frequency Surface Flute Waves Propagating in Waveguide Entirely Filled with Current-Carrying Plasma	50
3.4	Coupled High Frequency Surface Flute Waves in Coaxial Plasma Waveguide Entirely Filled with Current-Carrying Plasma	58
3.5	Conclusions	63
	References	64

4	Surface Flute Waves Propagating in Non-Isotropic Plasma Filled Waveguides	65
4.1	Surface Flute Waves in Waveguides Filled with Plasma Whose Density is Non-Uniform.	66
4.2	Influence of Radial Non-Uniformity of External Magnetic Field on Surface Flute Waves Frequency Spectrum	77
4.3	Influence of Toroidal Magnetic Field Non-Uniformity on Surface Flute Waves Frequency Spectrum in Metal Waveguides Entirely Filled with Plasma	78
4.4	Propagation of Surface Flute Waves Around a Metal Ring in Non-Uniform Toroidal Magnetic Field	85
4.5	Propagation of Surface Flute Waves in Weakly Rippled Magnetic Field	88
4.6	Conclusions	95
	References	96
5	Surface Flute Waves Propagating in Waveguides with Non-Circular Cross-Section.	99
5.1	Propagation of Surface Flute Waves in Corrugated Metal Waveguides Entirely Filled with Plasma	102
5.2	Propagation of Surface Flute Waves in Metal Waveguide with Non-Circular Cross-Section, Partially Filled with Plasma.	110
5.3	Influence of Plasma Column Cross-Section Non-Circularity on Dispersion Properties of Low Frequency Surface Flute Waves Propagating in Magneto-Active Waveguides	111
5.4	Resonant Influence of Plasma-Dielectric Interface Shape on Surface Flute Wave Propagation in Magneto-Active Waveguides	114
5.5	Influence of Plasma Column Cross-Section Non-Circularity on Dispersion Properties of High Frequency Surface Flute Waves Propagating in Magneto-Active Waveguides	116
5.6	Conclusions	126
	References	127
6	Applications of Surface Wave Propagation.	129
6.1	Surface Wave Applications for Plasma Electronics	129
6.2	Surface Wave Applications for Plasma-Antenna Systems	135
6.3	Surface Waves Propagating in the Plasma Periphery of Fusion Devices.	143
6.4	Surface Wave Application in Nano-Technologies	146
6.5	Surface Wave Application for Plasma Production	150
	References	156

Surface Flute Waves in Plasmas

Theory and Applications

Girka, V.; Girka, I.; Thumm, M.

2014, VIII, 163 p. 50 illus., 3 illus. in color., Hardcover

ISBN: 978-3-319-02026-6
