Dynamic Hedging of Counterparty Exposure	47
Tomasz R. Bielecki and Stéphane Crépey	
1 Introduction	48
1.1 General Set-up	48
2 Cashflows	49
2.1 Re-hypothecation Risk and Segregation	51
2.2 Cure Period	52
3 Pricing	53
3.1 CVA	54
3.2 Collateral Modeling	57
4 Common Shock Model of Counterparty Credit Risk	59
4.1 Unilateral Counterparty Credit Risk	59
4.2 Model of Default Times	60
4.3 Credit Derivatives Prices and Price Dynamics in the Common Shocks Model	63
5 Hedging Counterparty Credit Risk in the Common Shocks Model	64
5.1 Min-Variance Hedging by a Rolling CDS on the Counterparty	64
5.2 Multi-instruments Hedge	69
References	70
