Contents

Part I Biomedicine

Augmented Reality in Robotic Assistance for the Elderly 3
Francisco J. Lera, Víctor Rodríguez, Carlos Rodríguez and Vicente Matellán

HENUFOOD: Development of New Methodologies and Emergent Technologies for Showing Food with Health Claims on Chronic Diseases Risk Reduction in the Middle Age of Life 13
G. Anzaldi, X. Domingo, A. Moreno and P. De La Peña

Part II Energy Efficiency

Big Data Technology to Exploit Climate Information/Consumption Models and to Predict Future Behaviours 25
A. Cortés, A. E. Téllez, M. Gallardo and J. J. Peralta

Identification of Electrical Devices Applying Big Data and Machine Learning Techniques to Power Consumption Data 37
M. Rodriguez, I. González and E. Zalama

Knoholem: Knowledge-Based Energy Management for Public Buildings Through Holistic Information Modeling and 3D Visualization 47
G. Anzaldi, A. Corchero, H. Wicaksono, K. McGlinn, A. Gerdelan and M. J. Dibley

Part III Home Automation and Robotics

Uniovi RoboCup Team's Retractile and Compact Robot for RoboCup@Home 59
Jose F. Díaz, Ricardo Mayo, Yorel Moreda and Víctor San Juan

Uniovi RoboCup Team Software Components for RoboCup@Home 67
Ignacio González, Natalia Navas, Luis F. Pérez, Juan J. Romero and Víctor Sánchez

Novel Method for Vehicle and Pedestrian Detection Based on Information Fusion 79
Fernando García, Arturo de la Escalera and José María Armingol

Knowledge Management by Means of the Digital Home Compliant Intelligence 89
Rubén González and Ignacio González

An Integrated Autonomous Navigation and Decision-Making Architecture for Planetary Exploration Rovers 97
A. Medina, G. Binet and P. Colmenarejo

Springer
