

Contents

1	Introduction to Modeling Problems	1
1.1	The Modeling Problem	2
1.2	Review of Machine Learning	3
1.2.1	Learning Algorithms	4
1.2.2	Classification Algorithms	6
1.3	Nature-Inspired Computing	7
1.3.1	Metaheuristic Algorithms	8
1.3.2	Evolutionary Algorithms	9
1.3.3	Biologically Inspired Algorithms	9
1.3.4	Chemically Inspired Algorithms	14
1.4	Comparison of Algorithms for Modeling Problems	17
1.4.1	Complexity and Stability in Modeling Problems	17
1.4.2	Artificial Organic Networks and Modeling Problems	20
1.5	Motivation of Artificial Organic Networks	24
	References	29
2	Chemical Organic Compounds	31
2.1	The Importance of Organic Chemistry	32
2.2	Basic Concepts of Organic Compounds	33
2.2.1	Structural Definitions	34
2.2.2	Chemical Definitions	36
2.3	Covalent Bonding	40
2.3.1	Characterization of Covalent Bonds	40
2.4	Energy in Organic Compounds	42
2.4.1	Energy Level Scheme	42
2.4.2	Measures of Energy	43
2.5	Classification of Organic Compounds	45
2.5.1	Hydrocarbons	45
2.5.2	Alcohols, Ethers, and Thiols	46
2.5.3	Amines	47
2.5.4	Aldehydes, Ketones, and Carboxylic Acids	47
2.5.5	Polymers	48
2.5.6	Carbohydrates, Lipids, Amino Acids, and Proteins	48
2.5.7	Nucleic Acids	49

2.6	Organic Compounds as Inspiration	49
2.6.1	Motivation	49
2.6.2	Characteristics	50
	References	52
3	Artificial Organic Networks	53
3.1	Overview of Artificial Organic Networks	53
3.1.1	The Metaphor	54
3.1.2	Objectives	55
3.2	Artificial Organic Compounds	56
3.2.1	Components	56
3.2.2	Interactions	63
3.3	Networks of Artificial Organic Compounds	66
3.3.1	The Structure	66
3.3.2	The Behavior	66
3.3.3	Mixtures of Compounds	66
3.4	The Technique of Artificial Organic Networks	67
3.4.1	Levels of Energy in Components	67
3.4.2	Formal Definition of Artificial Organic Networks	68
3.4.3	Model of Artificial Organic Networks	69
3.5	Implementation Issues	70
3.5.1	The Search Topological Parameters Problem	70
3.5.2	The Build Topological Structure Problem	71
3.5.3	Artificial Organic Networks-Based Algorithms	72
	References	72
4	Artificial Hydrocarbon Networks	73
4.1	Introduction to Artificial Hydrocarbon Networks	73
4.1.1	Chemical Inspiration	73
4.1.2	Objectives and Scope	74
4.2	Basics of Artificial Hydrocarbon Networks	75
4.2.1	Components	75
4.2.2	Interactions	81
4.2.3	The Algorithm	85
4.2.4	Mathematical Formulation	101
4.3	Metrics of Artificial Hydrocarbon Networks	102
4.3.1	Computational Complexity	102
4.3.2	Stability	105
4.4	Artificial Hydrocarbon Networks Practical Features	108
4.4.1	Partial Knowledge Representation	108
4.4.2	Practical Issues in Partial Knowledge Extraction	110
	References	111

5 Enhancements of Artificial Hydrocarbon Networks	113
5.1 Optimization of the Number of Molecules	113
5.1.1 The Hess' Law	113
5.1.2 Boiling and Melting Points in Hydrocarbons	114
5.1.3 Enthalpy in Artificial Hydrocarbon Networks	115
5.2 Extension to the Multidimensional Case	119
5.2.1 Components and Interactions	120
5.2.2 Multidimensional AHN-Algorithm	124
5.3 Recursive Networks Using Aromatic Compounds	127
References	129
6 Notes on Modeling Problems Using Artificial Hydrocarbon Networks	131
6.1 Approximation Problems	131
6.1.1 Approximation of Univariate Functions	132
6.1.2 Approximation of Multivariate Functions	137
6.2 Clustering Problems	142
6.2.1 Linear Classifiers	142
6.2.2 Nonlinear Classifiers	145
6.3 Guidelines for Real-World Applications	149
6.3.1 Inheritance of Information	150
6.3.2 Catalog Based on Artificial Compounds	152
6.3.3 Using Metadata	152
References	153
7 Applications of Artificial Hydrocarbon Networks	155
7.1 Filtering Process in Audio Signals	155
7.1.1 Background and Problem Statement	156
7.1.2 Methodology	157
7.1.3 Results and Discussion	159
7.2 Position Control of DC Motor Using AHN-Fuzzy Inference Systems	165
7.2.1 Background and Problem Statement	166
7.2.2 Methodology	172
7.2.3 Results and Discussion	177
7.3 Facial Recognition Based on Signal Identification Using AHNs	183
7.3.1 Background and Problem Statement	183
7.3.2 Methodology	185
7.3.3 Results and Discussion	187
References	189

Appendix A: Brief Review of Graph Theory	191
Appendix B: Experiment of Signal-Molecule Correlation	195
Appendix C: Practical Implementation of Artificial Hydrocarbon Networks	201
Appendix D: Artificial Organic Networks Toolkit Using LabVIEWTM	211
Appendix E: Examples of Artificial Hydrocarbon Networks in LabVIEWTM	221

Artificial Organic Networks

Artificial Intelligence Based on Carbon Networks

Ponce Espinosa, H.E.; Ponce-Cruz, P.; Molina, A.

2014, XII, 228 p. 192 illus., 56 illus. in color. With online files/update., Hardcover

ISBN: 978-3-319-02471-4
