

# Contents

## Part I Invited Speakers

<b>Exploiting Chaos for Quantum Control . . . . .</b>	<b>3</b>
Ying-Cheng Lai	
<b>Random Vibration of a Nonlinear Autoparametric System . . . . .</b>	<b>11</b>
Kristjan Onu, Nishanth Lingala and N. Sri Namachchivaya	
<b>Nonlinear Dynamics of an Array of Nano Spin Transfer Oscillators. . . . .</b>	<b>25</b>
B. Subash, V. K. Chandrasekar and M. Lakshmanan	
<b>Interactive Ensembles of Imperfect Models: Lorenz 96 System . . . . .</b>	<b>39</b>
Lasko Basnarkov and Ljupčo Kocarev	
<b>Synthetic Computation: Chaos Computing, Logical Stochastic Resonance, and Adaptive Computing . . . . .</b>	<b>51</b>
Behnam Kia, K. Murali, Mohammad-Reza Jahed Motlagh, Sudeshna Sinha and William L. Ditto	
<b>Delay Differential Equation Models of Normal and Diseased Electrocardiograms. . . . .</b>	<b>67</b>
Claudia Lainscek and Terrence J. Sejnowski	
<b>Voltage Response of Non-Uniform Arrays of Bi-SQUIDS . . . . .</b>	<b>77</b>
Patrick Longhini, Susan Berggren, Anna Leese de Escobar, Antonio Palacios, Sarah Rice, Benjamin Taylor, Visarath In, Oleg A. Mukhanov, Georgy Prokopenko, Martin Nisenoff, Edmond Wong and Marcio C. De Andrade	
<b>A Bistable Microelectronic Circuit for Sensing Extremely Low Electric Field. . . . .</b>	<b>91</b>
Andy Kho, Visarath In, Patrick Longhini, Daniel Leung, Norman Liu, Antonio Palacios, Joseph Neff and Adi Bulsara	

<b>Asynchronous Cellular Automaton Based Modeling of Nonlinear Dynamics of Neuron . . . . .</b>	<b>101</b>
Hiroyuki Torikai and Takashi Matsubara	
<b>Nonlinear Behaviour of Vital Physiological Systems . . . . .</b>	<b>113</b>
Eugenijus Kaniusas	
<b>Fabrication of Bistable MEMS Systems for Energy Harvesting. . . . .</b>	<b>123</b>
Teresa Emery	
<b>Symbolic Toolkit for Chaos Explorations . . . . .</b>	<b>129</b>
Tingli Xing, Jeremy Wojcik, Roberto Barrio and Andrey Shilnikov	
<b>Enhancing Signal Resolution in a Noisy Nonlinear Sensor. . . . .</b>	<b>141</b>
Alexander P. Nikitin, Nigel G. Stocks and Adi R. Bulsara	
<b>Distributed Bandpass Filtering and Signal Demodulation in Cortical Network Models. . . . .</b>	<b>155</b>
Mark D. McDonnell	
<b>Majority Rule in Nonlinear Opinion Dynamics. . . . .</b>	<b>167</b>
Michael Gabbay and Arindam K. Das	
<b>Recent Advances on Information Transmission and Storage Assisted by Noise. . . . .</b>	<b>181</b>
P. I. Fierens, G. A. Patterson, A. A. García and D. F. Grosz	
<b>Transmission of Packets on a Hierarchical Network: Avalanches, Statistics and Explosive Percolation. . . . .</b>	<b>193</b>
Neelima Gupte and Ajay Deep Kachhvah	
<b>A Chaos MIMO-OFDM Scheme for Mobile Communication with Physical-Layer Security . . . . .</b>	<b>203</b>
Eiji Okamoto	
<b>Acoustic Detection and Ranging Using Solvable Chaos . . . . .</b>	<b>213</b>
Ned J. Corron, Mark T. Stahl, Jonathan N. Blakely and Shawn D. Pethel	
<b>Using Phase Space Methods for Target Identification . . . . .</b>	<b>225</b>
Thomas L. Carroll and Frederic J. Rachford	
<b>Effect of Voltage Oscillations on Response Properties in a Model of Sensory Hair Cell . . . . .</b>	<b>237</b>
Rami M. Amro and Alexander B. Neiman	

<b>Low-Pass Filtering of Information in the Leaky Integrate-and-Fire Neuron Driven by White Noise . . . . .</b>	<b>249</b>
Benjamin Lindner	
<b>Application of High Performance Computing for Simulating the Unstable Dynamics of Dilute Spark-Ignited Combustion . . . . .</b>	<b>259</b>
Charles E. A. Finney, Miroslav K. Stoyanov, Sreekanth Pannala, C. Stuart Daw, Robert M. Wagner, K. Dean Edwards, Clayton G. Webster and Johnney B. Green	
<b>Investigating the Use of Manifold Embedding for Attractor Reconstruction from Time Series . . . . .</b>	<b>271</b>
Lucas A. Overbey and Colin C. Olson	
<b>The Dynamics of Coupled Spin-Torque Nano Oscillators: An Initial Exploration . . . . .</b>	<b>285</b>
J. Turtle, A. Palacios, V. In and P. Longhini	
 <b>Part II Posters</b>	
<b>Elaboration of a Multispecies Model of Solid Tumor Growth with Tumor-Host Interactions . . . . .</b>	<b>295</b>
A. Konstorum, S. A. Sprowl, A. D. Lander, M. L. Waterman and J. S. Lowengrub	
<b>Resistive Switching Assisted by Noise . . . . .</b>	<b>305</b>
G. A. Patterson, P. I. Fierens and D. F. Grosz	
<b>Topology Independent SIS Process: Theory and Application. . . . .</b>	<b>313</b>
Igor Tomovski, Igor Trpevski and Ljupčo Kocarev	
<b>The Role of Duty Cycle in a Three Cell Central Pattern Generator . .</b>	<b>319</b>
Jeremy Wojcik, Robert Clewley and Andrey Shilnikov	
<b>On the Approach of Ensemble of Interacting Imperfect Models . . . . .</b>	<b>327</b>
Miroslav Mirchev and Ljupco Kocarev	
<b>Synchronization in Coupled MEMS Resonators . . . . .</b>	<b>333</b>
Suketu Naik and Takashi Hikiyara	

International Conference on Theory and Application in  
Nonlinear Dynamics (ICAND 2012)

In, V.; Palacios, A.; Longhini, P. (Eds.)

2014, XI, 341 p. 152 illus., 22 illus. in color., Hardcover

ISBN: 978-3-319-02924-5
