Contents

1 **Protein Folding Simulations by Generalized-Ensemble Algorithms** .. 1
Takao Yoda, Yuji Sugita, and Yuko Okamoto

2 **Application of Markov State Models to Simulate Long Timescale Dynamics of Biological Macromolecules** 29
Lin-Tai Da, Fu Kit Sheong, Daniel-Adriano Silva, and Xuhui Huang

3 **Understanding Protein Dynamics Using Conformational Ensembles** 67
X. Salvatella

4 **Generative Models of Conformational Dynamics** 87
Christopher James Langmead

5 **Generalized Spring Tensor Models for Protein Fluctuation Dynamics and Conformation Changes** 107
Hyuntae Na, Tu-Liang Lin, and Guang Song

6 **The Joys and Perils of Flexible Fitting** 137
Niels Volkmann

7 **Coarse-Grained Models of the Proteins Backbone Conformational Dynamics** 157
Tap Ha-Duong

8 **Simulating Protein Folding in Different Environmental Conditions** .. 171
Dirar Homouz

9 **Simulating the Peptide Folding Kinetic Related Spectra Based on the Markov State Model** 199
Jian Song and Wei Zhuang

10 The Dilemma of Conformational Dynamics in Enzyme Catalysis: Perspectives from Theory and Experiment 221
Urmi Doshi and Donald Hamelberg

11 Exploiting Protein Intrinsic Flexibility in Drug Design 245
Suryani Lukman, Chandra S. Verma, and Gloria Fuentes

12 NMR and Computational Methods in the Structural and Dynamic Characterization of Ligand-Receptor Interactions..... 271
Michela Ghitti, Giovanna Musco, and Andrea Spitaleri

13 Molecular Dynamics Simulation of Membrane Proteins..... 305
Jingwei Weng and Wenning Wang

14 Free-Energy Landscape of Intrinsically Disordered Proteins Investigated by All-Atom Multicanonical Molecular Dynamics 331
Junichi Higo and Koji Umezawa

15 Coordination and Control Inside Simple Biomolecular Machines.... 353
Jin Yu

16 Multi-state Targeting Machinery Govern the Fidelity and Efficiency of Protein Localization 385
Mingjun Yang, Xueqin Pang, and Keli Han

17 Molecular Dynamics Simulations of F_1-ATPase 411
Yuko Ito and Mitsunori Ikeguchi

18 Chemosensorial G-proteins-Coupled Receptors: A Perspective from Computational Methods..... 441
Francesco Musiani, Giulia Rossetti, Alejandro Giorgetti, and Paolo Carloni

Index..... 459
