## Part I Airplane Aerodynamics

|   |           |
|---|-----------|
| <b>Influence of Meshing on Flow Simulation in the Wing-Body Junction of Transport Aircraft . . . . .</b>  | <b>3</b>  |
| Philipp Peter Gansel, Patriz Dürr, Markus Baumann,<br>Thorsten Lutz and Ewald Krämer  |           |
| <b>Numerical Approach Aspects for the Investigation of the Longitudinal Static Stability of a Transport Aircraft with Circulation Control . . . .</b> | <b>13</b> |
| Dennis Keller   |           |
| <b>Numerical Investigation of the Influence of Shock Control Bumps on the Buffet Characteristics of a Transonic Airfoil . . . . .</b>                 | <b>23</b> |
| Steffen Bogdanski, Klemens Nübler, Thorsten Lutz and Ewald Krämer   |           |
| <b>Numerical Investigation of the Flutter Behaviour of a Laminar Supercritical Airfoil . . . . .</b>  | <b>33</b> |
| A. C. L. M. van Rooij and W. Wegner   |           |

## Part II Optimization

|   |           |
|---|-----------|
| <b>Aero-Elastic Multipoint Optimization Using the Coupled Adjoint Approach . . . . .</b>                  | <b>45</b> |
| Mohammad Abu-Zurayk and Joël Brezillon  |           |
| <b>Efficient Global Optimization of a Natural Laminar Airfoil Based on Surrogate Modeling . . . . .</b>   | <b>53</b> |
| Chunna Li, Joël Brezillon and Stefan Görtz  |           |
| <b>Efficient Quantification of Aerodynamic Uncertainty due to Random Geometry Perturbations . . . . .</b> | <b>65</b> |
| Dishi Liu and Stefan Görtz  |           |

|  |            |
|--|------------|
| <b>Fluid-Dynamic Optimization of the Cabin Air Outlet<br/>Do728-KLA with Adjoint Sensitivity Analysis. . . . .</b>                                 | <b>75</b>  |
| Anne Lincke, Gerrit Lauenroth, Thomas Rung and Claus Wagner  |            |
| <br><b>Part III Turbulence Research and Turbulence Modeling</b>  |            |
| <b>Geometrical Features of Streamlines and Streamline<br/>Segments in Turbulent Flows. . . . .</b>   | <b>85</b>  |
| Philip Schaefer, Markus Gampert, Fabian Hennig and Norbert Peters  |            |
| <b>Numerical Investigation of the Combined Effects of Gravity<br/>and Turbulence on the Motion of Small and Heavy Particles . . . . .</b>          | <b>93</b>  |
| Christoph Siewert, Rudie Kunnen, Matthias Meinke<br>and Wolfgang Schröder  |            |
| <b>On “Adaptive Wall-Functions” for LES of Flow<br/>and Heat Transfer. . . . .</b>   | <b>103</b> |
| G. John-Puthenveetil and S. Jakirlić   |            |
| <b>The Influence of the Diffusion Model on the Separation<br/>Sensitivity of Differential Reynolds Stress Models. . . . .</b>                      | <b>113</b> |
| Bernhard Eisfeld   |            |
| <b>DNS and LES of Turbulent Mixed Convection<br/>in the Minimal Flow Unit . . . . .</b>  | <b>123</b> |
| Christian Kath and Claus Wagner  |            |
| <b>Turbulence Resolving Simulations of the Flow About a Tandem<br/>Cylinder and a Rudimentary Landing Gear . . . . .</b>                           | <b>133</b> |
| Dieter Schwamborn, Axel Probst, Roland Kessler,<br>Mariafrancesca Valentino and Keith Weinman  |            |
| <b>Superstructures in a Turbulent Boundary Layer Under the Influence<br/>of an Adverse Pressure Gradient Investigated by Large-Scale PIV . . .</b> | <b>143</b> |
| D. Schanz, T. Knopp, A. Schröder, M. Dumitra and C. J. Kähler  |            |
| <br><b>Part IV Laminar Flow Control and Transition</b>   |            |
| <b>Impact of Forward-Facing Steps on Laminar-Turbulent<br/>Transition in Subsonic Flows. . . . .</b>   | <b>155</b> |
| Christopher Edelmann and Ulrich Rist   |            |

|   |            |
|---|------------|
| <b>Interaction of a Cylindrical Roughness Element<br/>and a Two-Dimensional TS-Wave . . . . .</b>   | <b>163</b> |
| Benjamin Plogmann, Werner Würz and Ewald Krämer   |            |
| <b>Effects of a Discrete Medium-Sized Roughness in a Laminar<br/>Swept-Wing Boundary Layer. . . . .</b>                                   | <b>173</b> |
| Holger B. E. Kurz and Markus J. Kloker  |            |
| <b>Wing Design Based on a Tapered Wing Natural Laminar<br/>Flow Airfoil Catalogue . . . . .</b>   | <b>183</b> |
| Judith Frfr. von Geyr, Fedime von Knoblauch zu Hatzbach,<br>Arne Seitz, Thomas Streit and Georg Wichmann                                  |            |
| <b>Experimental and Numerical Investigations<br/>of the Laminar Airfoil NLF9 . . . . .</b>  | <b>193</b> |
| René-Daniel Cécora and Henning Rosemann   |            |
| <b>Reconstruction of a Disturbance Flow Field from Wall<br/>Measurements of Tollmien-Schlichting Waves . . . . .</b>                      | <b>203</b> |
| Arne Seitz  |            |
| <b>Flight Measurements Under Turbulent Atmospheric Conditions . . . . .</b>   | <b>213</b> |
| Andreas Reeh, Michael Weismüller and Cameron Tropea   |            |
| <b>Part V Rotorcraft Aerodynamics</b>   |            |
| <b>Numerical Investigation of the Influence of the Model Installation<br/>on Rotor Blade Airfoil Measurements . . . . .</b>               | <b>225</b> |
| K. Richter, A. D. Gardner and S. H. Park  |            |
| <b>Flow Simulation of a Five: Bladed Rotor Head . . . . .</b>   | <b>235</b> |
| Moritz Grawunder, Roman Reiß, Victor Stein, Christian Breitsamter<br>and Nikolaus A. Adams  |            |
| <b>Blade Shape Design: Trim Acceleration for Fluid-Structure<br/>Coupled Simulations of an Isolated Rotor in Forward Flight . . . . .</b> | <b>245</b> |
| Martin Hollands, Manuel Keßler and Ewald Krämer   |            |
| <b>Numerical Investigations of a Back-Flow Flap<br/>for Dynamic Stall Control . . . . .</b>   | <b>255</b> |
| K. Kaufmann, A. D. Gardner and K. Richter   |            |

|   |            |
|---|------------|
| <b>Adaptation of the Dynamic Rotor Blade Modelling in CAMRAD for Fluid-Structure Coupling Within a Blade Design Process . . . . .</b> | <b>263</b> |
| Christian Stanger, Martin Hollands, Manuel Keßler and Ewald Krämer  |            |

## **Part VI Convective Flows**

|  |            |
|--|------------|
| <b>Flight Testing of Alternative Ventilation Systems for Aircraft Cabins . . . . .</b> | <b>275</b> |
| J. Bosbach, A. Heider, T. Dehne, M. Markwart, I. Gores and P. Bendfeldt                |            |

|   |            |
|---|------------|
| <b>Large-scale Coherent Structures in Turbulent Mixed Convective Air Flow . . . . .</b> | <b>285</b> |
| Andreas Westhoff, Johannes Bosbach and Claus Wagner                                     |            |

|  |            |
|--|------------|
| <b>Numerical Simulation of the Air Flow and Thermal Comfort in Aircraft Cabins . . . . .</b> | <b>293</b> |
| Mikhail Konstantinov, Waldemar Lautenschlager, Andrei Shishkin and Claus Wagner              |            |

|   |            |
|---|------------|
| <b>Highly-Resolved Numerical Simulations of High Rayleigh and Reynolds Number Indoor Ventilation in a Generic Room. . . . .</b> | <b>303</b> |
| Olga Shishkina and Claus Wagner   |            |

|   |            |
|---|------------|
| <b>Influence of the Geometry on Rayleigh-Bénard Convection. . . . .</b> | <b>313</b> |
| Sebastian Wagner, Olga Shishkina and Claus Wagner                       |            |

## **Part VII Aerodynamics and Aeroacoustics of Ground Vehicles**

|  |            |
|--|------------|
| <b>An Experimental and Numerical Investigation of the Near Wake Field of a Tractor-Trailer Configuration . . . . .</b> | <b>325</b> |
| Johannes Haff, Joachim Tschech, Hugues Richard, Sigfried Loose and Claus Wagner  |            |

|  |            |
|--|------------|
| <b>Experimental Study of the Pressure Rise due to Tunnel Entry of a High-Speed Train . . . . .</b> | <b>335</b> |
| Daniela Heine and Klaus Ehrenfried   |            |

|   |            |
|---|------------|
| <b>Aerodynamic Loads Induced by Passing Trains on Track Side Objects. . . . .</b> | <b>343</b> |
| Sabrina Rutschmann, Klaus Ehrenfried and Andreas Dillmann                         |            |

|  |            |
|--|------------|
| <b>Flow-Induced Airborne and Structure-Borne Noise at a Simplified Car Model . . . . .</b> | <b>353</b> |
| Stefan Müller, Stefan Becker, Christoph Gabriel, Reinhard Lerch and Frank Ullrich          |            |

## **Part VIII Aeroelasticity and Structural Dynamics**

|  |            |
|--|------------|
| <b>Prediction of Transonic Flutter Behavior of a Supercritical Airfoil Using Reduced Order Methods . . . . .</b> | <b>365</b> |
| Nagaraj K. Banavara and Diliانا Dimitrov   |            |

|  |            |
|--|------------|
| <b>Partitioned Fluid-Structure Interaction on Solution-Adaptive Hierarchical Cartesian Grids . . . . .</b> | <b>375</b> |
| Gonzalo Brito Gadeschi, Matthias Meinke and Wolfgang Schröder  |            |

|  |            |
|--|------------|
| <b>An Assessment of the Influence of Fuselage Deformations on the Numerical Prediction of High-Lift Performance. . . . .</b> | <b>385</b> |
| Stefan Keye  |            |

|   |            |
|---|------------|
| <b>Combined Time-Resolved PIV and Structure Deformation Measurements for Aeroelastic Investigations . . . . .</b> | <b>395</b> |
| Hauke Ehlers, Reinhard Geisler, Sebastian Gesemann and Andreas Schröder   |            |

## **Part IX Numerical Simulation**

|  |            |
|--|------------|
| <b>CTAU, A Cartesian Grid Method for Accurate Simulation of Compressible Flows with Convected Vortices . . . . .</b> | <b>405</b> |
| Philip Kelleners and Frank Spiering  |            |

|   |            |
|---|------------|
| <b>Coupling of Flow Solvers with Variable Accuracy of Spatial Discretization. . . . .</b> | <b>415</b> |
| Frank Spiering and Philip Kelleners   |            |

|  |            |
|--|------------|
| <b>Overlapping Grids in the DLR THETA Code . . . . .</b> | <b>425</b> |
| Roland Kessler and Johannes Löwe                         |            |

|  |            |
|--|------------|
| <b>Detached Eddy Simulation Using the Discontinuous Galerkin Method. . . . .</b> | <b>435</b> |
| Michael Wurst, Manuel Keßler and Ewald Krämer                                    |            |

|   |            |
|---|------------|
| <b>Application of Point and Line Implicit Preconditioning Techniques to Unsteady Flow Simulations . . . . .</b> | <b>443</b> |
| Dian Li and Stefan Langer   |            |

|  |            |
|--|------------|
| <b>Validation of a Time-Domain TAU-Flight Dynamics Coupling<br/>Based on Store Release Scenarios. . . . .</b>                  | <b>455</b> |
| Lars Reimer, Ralf Heinrich and Rosemarie Meuer   |            |
| <b>Implementation of Flow Through Porous Media into a Compressible<br/>Flow Solver. . . . .</b>                                | <b>465</b> |
| Michael Mößner and Rolf Radespiel  |            |
| <b>Evaluation of Hybrid RANS/LES Methods for Computing<br/>Flow over a Prolate Spheroid . . . . .</b>                          | <b>475</b> |
| Sunil Lakshmipathy   |            |
| <b>RANS-based Aerodynamic Drag and Pitching Moment Predictions<br/>for the Common Research Model. . . . .</b>                  | <b>485</b> |
| Olaf Brodersen and Simone Crippa   |            |
| <b>Aerodynamic Effects of Tip Tanks on a Swept Wing<br/>Wind-Tunnel Model . . . . .</b>  | <b>495</b> |
| Claus-Philipp Hühne, Peter Scholz and Rolf Radespiel   |            |
| <b>Simulation of Interaction of Aircraft and Gust Using<br/>the TAU-Code. . . . .</b>  | <b>503</b> |
| Ralf Heinrich  |            |
| <b>Numerical Investigation of the Magnus Effect of a Generic<br/>Projectile at Mach 3 up to 90° Angle of Attack . . . . .</b>  | <b>513</b> |
| Daniel Klatt, Robert Hruschka and Friedrich Leopold  |            |
| <b>Part X Experimental Simulation and Test Techniques</b>  |            |
| <b>Large Scale Tomographic Particle Image Velocimetry<br/>of Turbulent Rayleigh-Bénard Convection . . . . .</b>                | <b>525</b> |
| Daniel Schiepel, Johannes Bosbach and Claus Wagner   |            |
| <b>Pressure Measurement on Rotating Propeller Blades by Means<br/>of the Pressure-Sensitive Paint Lifetime Method. . . . .</b> | <b>535</b> |
| C. Klein, U. Henne, W. E. Sachs, S. Hock, N. Falk, V. Ondrus,<br>U. Beifuss and S. Schaber                                     |            |
| <b>Optical In-Flight Wing Deformation Measurements with the Image<br/>Pattern Correlation Technique . . . . .</b>              | <b>545</b> |
| Ralf Meyer, Tania Kirmse and Fritz Boden   |            |

|   |            |
|---|------------|
| <b>Development of a Rotating Camera for In-flight Measurements of Aircraft Propeller Deformation by Means of IPCT. . . . .</b>                  | <b>555</b> |
| Fritz Boden and Boleslaw Stasicki   |            |
| <b>Impact of Forced High Frequency Airfoil Oscillations on the Shock Motion at Transonic Buffet Flows . . . . .</b>                             | <b>563</b> |
| Antje Feldhusen, Axel Hartmann, Michael Klaas and Wolfgang Schröder   |            |
| <b>Total Pressure Measurements Behind an Axial Ventilator Using a Kiel Probe Array . . . . .</b>  | <b>573</b> |
| Till Heinemann, Claus Bakeberg, Hermann Lienhart and Stefan Becker  |            |
| <b>Experimental Study on Wave Drag Reduction at Slender Bodies by a Self-aligning Aerospike . . . . .</b>                                       | <b>583</b> |
| Oliver Wysocki, Erich Schüleln and Christian Schnepf  |            |
| <b>Part XI Aeroacoustics</b>  |            |
| <b>Aeroacoustic and Aerodynamic Importance of Unequal Rotor Rotation Speeds of a CROR. . . . .</b>  | <b>593</b> |
| R. A. D. Akkermans, J. W. Delfs, C. O. Márquez, A. Stuermer, C. Richter, C. Clemen, B. Caruelle and M. Omais                                    |            |
| <b>Computational Aeroacoustics of a Counter-Rotating Open Rotor at Different Angles of Attack . . . . .</b>                                     | <b>601</b> |
| Eirene Rebecca Busch, Manuel Keßler and Ewald Krämer  |            |
| <b>Assessment of Front Rotor Trailing Edge Blowing for the Reduction of Open Rotor Interaction Noise . . . . .</b>                              | <b>609</b> |
| A. Stuermer, R. A. D. Akkermans and J. W. Delfs   |            |
| <b>Examination of the Influence of Flow Speed on the Coherence Lengths in Turbulent Boundary Layers at High Subsonic Mach Numbers . . . . .</b> | <b>619</b> |
| Stefan Haxter, Klaus Ehrenfried and Stefan Kröber   |            |
| <b>Sound Generation by Low Mach Number Flow Through Pipes with Diaphragm Orifices. . . . .</b>  | <b>629</b> |
| Frank Obermeier, Mikhail Konstantinov, Andrei Shishkin and Claus Wagner   |            |
| <b>A Separated Flow Model for Semi-Empirical Prediction of Trailing Edge Noise. . . . .</b>   | <b>639</b> |
| Chan Yong Schuele and Karl-Stéphane Rossignol   |            |

## **Part XII Biofluid Mechanics**

|  |            |
|--|------------|
| <b>Computational Analysis of a Three-dimensional Flapping Wing . . . . .</b> | <b>651</b> |
| Nadine Buchmann, Rolf Radespiel and Ralf Heinrich                            |            |
| <b>Combined Flow and Shape Measurements of the Flapping</b>                  |            |
| <b>Flight of Freely Flying Barn Owls . . . . .</b>                           | <b>661</b> |
| Thomas Doster, Thomas Wolf and Robert Konrath                                |            |
| <b>Numerical Investigation of the Aerodynamic Forces Induced</b>             |            |
| <b>by the Flow around Free Flying Fruit Fly . . . . .</b>                    | <b>671</b> |
| Andrei Shishkin and Claus Wagner   |            |
| <b>Author Index . . . . .</b>  | <b>681</b> |

New Results in Numerical and Experimental Fluid  
Mechanics IX

Contributions to the 18th STAB/DGLR Symposium,  
Stuttgart, Germany, 2012

Dillmann, A.; Heller, G.; Krämer, E.; Kreplin, H.-P.;  
Nitsche, W.; Rist, U. (Eds.)

2014, XVI, 683 p. 427 illus., 105 illus. in color.,  
Hardcover
