|---|---------------|
| <b>1 Infobiotics Workbench: A P Systems Based Tool for Systems and Synthetic Biology</b>  | <b>1</b>      |
| Jonathan Blakes, Jamie Twycross, Savas Konur,<br>Francisco Jose Romero-Campero, Natalio Krasnogor<br>and Marian Gheorghe                                  |               |
| 1.1 Introduction  | 1             |
| 1.2 Overview  | 2             |
| 1.2.1 Mathematical Continuous Models  | 3             |
| 1.2.2 Stochastic Discrete Models  | 3             |
| 1.2.3 Executable Modeling Formalisms  | 4             |
| 1.3 Lattice Population P Systems  | 8             |
| 1.4 Infobiotics Workbench   | 14            |
| 1.4.1 Modelling in LPP Systems  | 16            |
| 1.4.2 Simulation  | 16            |
| 1.4.3 Model Checking  | 20            |
| 1.4.4 Optimisation  | 22            |
| 1.5 Case Study  | 25            |
| 1.5.1 LPP Model   | 26            |
| 1.5.2 Simulations   | 27            |
| 1.5.3 Model Checking  | 28            |
| 1.5.4 Supplementary Material  | 32            |
| 1.6 Discussions and Conclusions   | 33            |
| References  | 36            |
| <br><b>2 Statistical Model Checking of Membrane Systems with Peripheral Proteins: Quantifying the Role of Estrogen in Cellular Mitosis and DNA Damage</b> | <br><b>43</b> |
| Matteo Cavaliere, Tommaso Mazza and Sean Sedwards   |               |
| 2.1 Membrane Systems with Peripheral Proteins   | 43            |
| 2.1.1 Formal Language Preliminaries   | 46            |
| 2.1.2 Membrane Systems with Peripheral<br>and Integral Proteins   | 47            |
| 2.2 Statistical Model Checking for Membrane Systems<br>with Peripheral Proteins   | 53            |
