

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1	Introduction	1
1.1	The Manufacturing Cycle	3
1.2	Basic Concepts and Objectives	7
1.3	Reviewing and Evaluating: The Traditional Approach	10
1.4	Introduction to the Management Control System	12
1.5	Notions for an Industrial Organizational System	15
 <b>Part I Management Control Engineering</b>		
<b>2</b>	<b>Product Design</b>	<b>23</b>
1	Introduction	23
1.1	Manufacturing—Product Specifications	24
1.2	Manufacturing—Product Design	26
1.3	Production Design and Process Planning	38
<b>3</b>	<b>Process Planning</b>	<b>45</b>
1	Introduction	45
2	Process Planning and Product Design	46
2.1	Selection of Primary Production Processes	47
2.2	Forming from Solid by Material Removal	61
3	Process Planner Expert Method	63
3.1	Process Planning Decisions	64
3.2	CAPP—Computer Aided Process Planning	67
	Appendix	71
	Hyper—Rcapp Demo	71
<b>4</b>	<b>Production Lot Size &amp; Maximum Profit</b>	<b>77</b>
1	Production Economic Lot Size	77
1.1	Determining Lot Size	79
1.2	Determining Lot Size by the Roadmap Method	80
2	Maximum Profit Process Plan	84
2.1	Constricting RTPP Table	87

2.2	Market Research .....	88
2.3	Setting Selling Price and Maximum Profit .....	88
2.4	Testing the Algorithm .....	90
2.5	Management Control .....	90
<b>5</b>	<b>Traditional Production Planning .....</b>	<b>91</b>
1	Introduction .....	91
1.1	Survey of Production Planning Methods .....	91
1.2	Production Planning Dilemma .....	95
2	Traditional Method .....	95
2.1	Master Production Schedule .....	95
2.2	Requirement Planning System—RPS .....	99
2.3	Capacity Planning and Order Release .....	105
2.4	Order Release .....	113
2.5	Shop Floor Control .....	116
<b>6</b>	<b>Flexible Production Planning .....</b>	<b>121</b>
1	Introduction .....	121
2	Production Planning .....	122
3	Stock Allocation .....	123
3.1	Determine Allocation Priorities .....	123
3.2	Stock Allocation Method .....	126
3.3	Capacity Planning: Resource Loading .....	128
3.4	Job Release for Execution .....	132
4	Shop Floor Control .....	133
4.1	Concept and Terminology .....	134
4.2	Algorithm and Terminology .....	135
	Appendix .....	141
	Shop Floor Planning and Control .....	141
	The Strategy .....	141
	Example .....	142
<b>7</b>	<b>Quality Control: SQC &amp; SPC .....</b>	<b>145</b>
1	Introduction .....	145
2	Statistical Quality Control—SQC .....	146
2.1	Management Control .....	147
3	Statistical Process Control—SPC .....	147
3.1	Introduction to SPC .....	147
3.2	Goals and Benefits of SPC .....	148
3.3	Basic Statistical Concepts .....	150
3.4	Probability of Distribution .....	152
3.5	Prerequisites for SPC—Process Capability .....	153
3.6	Control Charts .....	157
3.7	Control Chart Parameter Selection .....	160
3.8	Interpreting Control Chart Analysis .....	161
3.9	Cause and Effect Analysis—Troubleshooting .....	163

3.10	Management Control .....	165
3.11	Process Capability .....	166
3.12	SPC Parameters .....	166

## **Part II Engineering Support Management**

<b>8</b>	<b>Inventory Management and Control.....</b>	<b>169</b>
1	Introduction .....	169
2	Inventory Control .....	174
2.1	Classification, Coding and Unit of Measure .....	175
2.2	Inventory Value—Pricing .....	175
2.3	Material Order Point .....	176
2.4	Reduce Inventory Size .....	183
2.5	Reduce Inventory Size .....	184
2.6	Classification, Coding and Unit of Measure .....	185
2.7	Reduce Inventory Size .....	185
2.8	Left Over .....	186
2.9	Extra Order Quantity Size .....	186
3	Inventory System as Management Control Tool .....	190
	Appendix .....	193
<b>9</b>	<b>Resource Planning.....</b>	<b>195</b>
1	Introduction .....	195
2	Engineering Support of Management .....	197
2.1	Step 1: Request for Quotation—RFQ .....	197
2.2	Step 2: Constructing a Roadmap .....	198
2.3	Step 3: Solving the Roadmap .....	201
2.4	Resource Planning .....	202
3	Evolution of Resources and Manufacturing Methods .....	207
3.1	Group Technology—Work Cell .....	207
3.2	NC, CNC, DNC .....	210
3.3	Machining Center .....	211
3.4	Flexible Manufacturing System .....	212
3.5	Automatic Factory .....	213
3.6	Production Line (Transfer Line) .....	213
<b>10</b>	<b>Master Production Planning.....</b>	<b>215</b>
1	Introduction .....	215
2	Management Control and Finance Planning .....	221
2.1	Facility Requirement Planning .....	221
2.2	Manpower Requirement Planning .....	222
3	Cash Flow Planning .....	222
3.1	Profit Forecasting .....	224
3.2	Budget and Management Control .....	224

4	Improve Master Production .....	225
4.1	Product Review .....	226
4.2	Profile Load Balancing .....	226
4.3	Profile Load Balancing—Roadmap Method .....	229
4.4	Management and Engineering .....	232
<b>11</b>	<b>Determining Delivery Date and Cost.....</b>	<b>233</b>
1	Introduction .....	233
2	Generating Alternatives for Cost-Delivery Date: New Order .....	235
2.1	Cost-Delivery Date with Minimum Cost Process Plan .....	235
2.2	Cost-Delivery Date with Maximum Routing .....	242
2.3	Cost-Delivery Date: Improved Maximum Production Routine .....	243
2.4	Cost Delivery Dates: Other Alternatives .....	244
2.5	Cost-Delivery Date: Improved Cost with Minimum Cost Process Plan .....	244
2.6	Cost-Delivery Data: Loading Profile for Improved Minimum Cost Process Plan .....	244
2.7	Generating Alternatives for Cost-Delivery Date: Working Overtime Shifts, and Splitting .....	245
2.8	Management Control .....	245
	Appendix .....	247
	Roadmap Method: Example .....	247
<b>12</b>	<b>Company's Level of Performance .....</b>	<b>257</b>
1	Introduction .....	257
2	Performance Measurement .....	258
3	Reference Point .....	259
3.1	Basic (Theoretical) Process .....	259
3.2	Practical Process .....	259
3.3	Practical Optimum .....	259
3.4	Actual Performance (AP) .....	260
4	Machine Level Competitiveness .....	260
4.1	Multiple Parts .....	260
4.2	Machine Level of Competitiveness Variations .....	263
5	Example of Machine Level Competitiveness .....	263
5.1	Management Control .....	266
5.2	The Quantity Effect .....	266
6	Improvement of Competitiveness Level .....	267
7	Management Control .....	270
	<b>Index.....</b>	<b>271</b>
