## Part I Introduction

<b>1</b>	<b>Researching the After-sales Services and Warranty Management</b>	<b>3</b>
1.1	Introduction	3
1.2	Objectives of the Book	4
1.3	Rational of the Methodology Followed	6
1.3.1	Origins and Background (Part II)	7
1.3.2	Methodology and Resolution Proposal (Part III)	8
1.3.3	Development of the Proposed Stages (Part IV)	9
1.3.4	Extensions to the Proposed Reference Framework (Part V)	10
1.3.5	The Case Studies	11
1.4	Limitations and Evolution of the Research	12
	References	14

## Part II Current Issues in Warranty Management

<b>2</b>	<b>An Initial Case Study. Understanding Warranty Management Issues</b>	<b>17</b>
2.1	Background	18
2.2	Case Study Scenario	19
2.3	Analysis, Development, and Results of the Case Study	20
2.3.1	Costs Analysis of the Warranty Assistance	21
2.3.2	Quantitative Analysis of the Claims	24
2.3.3	Spare Parts Management for Warranty Assistance	26
	References	31
<b>3</b>	<b>State of the Art</b>	<b>33</b>
3.1	The Importance of a Warranty Management System	34
3.2	Literature Review	36
3.3	Models and Support Tools for Warranty Cost Management	38

3.4	Main Contributions of the Selected Models and Authors . . . . .	39
3.4.1	Warranty and Maintenance . . . . .	39
3.4.2	Warranty and Outsourcing . . . . .	42
3.4.3	Warranty and Quality . . . . .	44
3.4.4	Warranty and Cost Analysis . . . . .	46
	References . . . . .	50

### **Part III A Reference Framework for Warranty Management**

<b>4</b>	<b>Learning from Maintenance Management Models . . . . .</b>	<b>55</b>
4.1	Introduction . . . . .	55
4.2	Maintenance Management Models . . . . .	55
4.3	Process-Oriented Models Versus Declarative Models . . . . .	58
4.4	Maintenance Management Models Comparative Analysis . . . . .	58
4.5	Maintenance Management Model Based on the Standard ISO 9001:2008 . . . . .	61
4.6	Maintenance Management and ICTs . . . . .	62
4.6.1	Concept of Electronic Technology . . . . .	62
4.6.2	Definition of E-Maintenance . . . . .	64
4.7	The Warranty Management Process . . . . .	66
4.7.1	Methodology . . . . .	66
4.7.2	Warranty Management Process . . . . .	67
	References . . . . .	71
<b>5</b>	<b>Reference Framework . . . . .</b>	<b>73</b>
5.1	Management Framework of a Warranty Assistance Program . . . . .	74
5.1.1	First Step: Warranty Program Effectiveness . . . . .	74
5.1.2	Second Step: The Efficiency of the Program . . . . .	77
5.1.3	Third Step: The Evaluation of the Program . . . . .	78
5.1.4	Fourth Step: Program Improvement . . . . .	81
5.2	Integral Representation of the Warranty Management Framework . . . . .	84
5.3	Framework Implementation . . . . .	89
	References . . . . .	91
<b>6</b>	<b>Auditing the Initial Case Study . . . . .</b>	<b>93</b>
6.1	Considerations to the Current Situation . . . . .	93
6.2	Improvement Actions . . . . .	93
6.2.1	Case Study Scenario Effectiveness . . . . .	95
6.2.2	Case Study Scenario Efficiency . . . . .	95
6.2.3	Case Study Assessment . . . . .	98
6.2.4	Case Study Improvement . . . . .	98

6.3	Quality and Maturity Aspects in Warranty Management . . . . .	99
6.3.1	Standards and Best Practices for the Quality of Warranty Management . . . . .	99
6.3.2	Best Practices Applied to the Warranty Management Framework . . . . .	102
6.4	Case Study on the Maturity Assessment . . . . .	107
6.4.1	Valuation of the Maturity of the Initial Scenario . . . . .	107
6.4.2	CMMI and EFQM Practices . . . . .	108
	References . . . . .	113

## **Part IV Development of the Framework Stages**

<b>7</b>	<b>Management Effectiveness . . . . .</b>	<b>117</b>
7.1	The Balanced Score Card in After-sales Management. . . . .	117
7.1.1	Alignment of Strategy with Global Objectives . . . . .	117
7.1.2	BSC Principles in Global Warranty Management . . . . .	119
7.1.3	Application to Improve Effectiveness in Warranty Management . . . . .	119
7.2	Hierarchical Analysis in the Decision-Making Process During Warranty. . . . .	120
7.2.1	General Features of the Analytic Hierarchy Process. . . . .	121
7.3	Root Cause Analysis in Warranty Management . . . . .	124
7.3.1	Root Cause Analysis for the Identification of Physical Causes . . . . .	124
7.3.2	Root Cause Analysis Models . . . . .	126
7.3.3	Advantages and Inconveniences . . . . .	131
7.4	Case Study on Balanced Score Card. . . . .	133
7.4.1	Application from a Financial Perspective . . . . .	133
7.4.2	Results in the Practical Application . . . . .	137
7.5	Case Study on an Analytic Hierarchy Process . . . . .	139
7.5.1	Practical Application of AHP. . . . .	139
	References . . . . .	144
<b>8</b>	<b>Management Efficiency. . . . .</b>	<b>147</b>
8.1	The Logistic Support in the Technical Assistance. . . . .	147
8.1.1	Classification of Elements Candidates for a Logistic Support Analysis . . . . .	148
8.1.2	Choice of Repair Levels . . . . .	149
8.1.3	Task Definition . . . . .	151

8.2	Costs-Risks-Benefits Analysis in the After-sales Management . . . . .	154
8.2.1	The Costs Management in the Technical Assistance . . . . .	154
8.2.2	Risk Management in the Technical Assistance . . . . .	157
8.2.3	The Earned Value Management Applied to the Warranty . . . . .	158
8.3	Practical Case on Customer Risk . . . . .	165
8.3.1	Application Scenario . . . . .	165
8.3.2	Initial Hypotheses and Quantification of Consequences . . . . .	167
8.3.3	Results of Application . . . . .	170
	References . . . . .	172
<b>9</b>	<b>On the Assessment and Control . . . . .</b>	<b>175</b>
9.1	General Characteristics of a RAMS Analysis . . . . .	175
9.1.1	Subsystems in Series Connection . . . . .	176
9.1.2	Subsystems in Parallel Connection . . . . .	177
9.1.3	Case of n Identical Subsystems in Parallel . . . . .	179
9.1.4	Summary of Formulas and Results . . . . .	181
9.2	Influence of Warranty on the Life Cycle Cost of a Product . . . . .	182
9.2.1	Background to Techniques of Life Cycle Costs Analysis . . . . .	182
9.2.2	Basic Aspects of LCCA . . . . .	183
9.2.3	Development of the Stochastic Model . . . . .	185
9.2.4	Proposed NHPP Model for Warranty Assessment . . . . .	189
9.2.5	Proposed GRP Model for the Warranty Assessment . . . . .	191
9.3	Case Study on a RAMS Analysis . . . . .	193
9.3.1	Study Scenario . . . . .	193
9.3.2	Application of RAMS Variables to the Practical Case . . . . .	194
9.3.3	Application of Numerical Data and Results . . . . .	196
9.4	Case Study on the Life Cycle Cost Analysis . . . . .	199
9.4.1	Application Scenario . . . . .	199
9.4.2	Results and Conclusions . . . . .	207
	References . . . . .	209
<b>10</b>	<b>Continuous Improvement . . . . .</b>	<b>213</b>
10.1	Application of ICTs in the Process of Warranty Management . . . . .	213
10.1.1	The E-technology Concept in the Warranty Management . . . . .	213
10.1.2	Technologies Applied to the Technical Assistance . . . . .	214

10.1.3	Influence on the Proposed Management Framework . . . . .	215
10.1.4	Advantages and Future Utilizations. . . . .	217
10.2	Management of Customer Relations in After-sales Service . . .	218
10.2.1	Importance of Customer Relations . . . . .	218
10.2.2	Contractual Aspects on Warranty . . . . .	220
10.3	The Methodology Six Sigma in After-sales Warranty . . . . .	224
10.3.1	Brief Description of the Method. . . . .	225
10.3.2	Interaction of the Six Sigma with Other Tools and Methodologies . . . . .	227
10.4	Case Study on Six Sigma Methodology. . . . .	230
10.4.1	Application Scenario. . . . .	231
10.4.2	Set Out and Application of the Methodology. . . . .	232
10.4.3	Example and Results of the Application . . . . .	236
	References . . . . .	238

## **Part V Extensions to the Framework**

<b>11</b>	<b>Intellectual Capital in the Technical Assistance . . . . .</b>	<b>243</b>
11.1	Background . . . . .	243
11.2	After-sales Service Contribution in a Company . . . . .	245
11.3	The Technical Assistance as Intellectual Capital . . . . .	247
11.4	Proposed Methodology . . . . .	248
11.4.1	Generated Value Regarding Staff . . . . .	249
11.4.2	Generated Value Regarding Quality . . . . .	250
11.4.3	Generated Value Regarding the Company Structure . . . . .	251
11.5	Case Study on the Intellectual Capital in Technical Services . . . . .	252
11.5.1	Scenario and Initial Considerations. . . . .	252
11.5.2	Results of the Practical Application . . . . .	254
	References . . . . .	256
<b>12</b>	<b>Maintainability and the After-sales Service . . . . .</b>	<b>259</b>
12.1	Brief Review of the State of the Art. . . . .	260
12.1.1	Introduction . . . . .	260
12.1.2	Summary of the Reviewed Bibliography . . . . .	260
12.1.3	Conclusions of the Literature Review . . . . .	262
12.2	Definitions and Requirements for the Assessment. . . . .	263
12.3	Maintainability Indicators and Maintenance Levels Description . . . . .	264

12.4	Classification of the Maintainability Attributes. . . . .	265
12.4.1	Attributes Related to the Device Design . . . . .	265
12.4.2	Attributes Related to the Maintenance Staff and Work Conditions . . . . .	266
12.4.3	Attributes Related to the Necessity of Logistics Support . . . . .	266
12.5	Maintainability Attributes and Maintenance Level . . . . .	267
12.5.1	General Attributes and Their Assessment . . . . .	267
12.5.2	Specific Attributes (Maintenance Level Dependent) and Their Assessment . . . . .	268
12.6	Maintainability Indicators Assessment. . . . .	269
12.7	Case Study on Maintainability . . . . .	271
12.7.1	Scenario and Previous Considerations . . . . .	271
12.7.2	Application of the Evaluation Sheets . . . . .	272
12.7.3	Discussion of the Results. . . . .	283
	References . . . . .	283
<b>13</b>	<b>Dynamic Modeling and Bayesian Networks in the After-sales Service . . . . .</b>	<b>285</b>
13.1	Dynamic Systems Modeling. . . . .	286
13.2	Case of Dynamic Modeling in the Farm Machinery Industry. . . . .	287
13.2.1	Study Scenario. . . . .	287
13.2.2	Modeling and Results . . . . .	288
13.3	Bayesian Networks in the After-sales Service . . . . .	292
13.3.1	Planning of Disassembly . . . . .	293
13.3.2	Bayesian Networks in Dismantling Planning . . . . .	294
13.3.3	Integration of Warranty in a Disassembly Model . . . . .	296
	References . . . . .	298
 <b>Part VI Results and Conclusions</b>		
<b>14</b>	<b>Summary of Results and Conclusions . . . . .</b>	<b>303</b>
14.1	Summary of Results of this Work and Research. . . . .	303
14.1.1	Origins and Background (Part II) . . . . .	303
14.1.2	Methodology and Resolution Proposal (Part III). . . . .	304
14.1.3	Development of the Proposed Stages (Part IV). . . . .	305
14.1.4	Extensions to the Proposed Reference Framework (Part V) . . . . .	308
14.1.5	Case Studies . . . . .	310
14.2	Conclusions Extracted from the Different Parts . . . . .	311
14.3	Future Lines of Research. . . . .	314
	References . . . . .	315

After-sales Service of Engineering Industrial Assets

A Reference Framework for Warranty Management

González-Prida Díaz, V.; Crespo Marquez, A.

2014, XXII, 318 p. 106 illus., 4 illus. in color., Hardcover

ISBN: 978-3-319-03709-7
