

# Contents

<b>Silyl Anions</b> .....	1
Carsten Präsang and David Scheschkewitz	
<b>Substituted Polyhedral Silicon and Germanium Clusters</b> .....	49
Masafumi Unno	
<b>Recent Advances in Silylene Chemistry: Small Molecule Activation En-Route Towards Metal-Free Catalysis</b> .....	85
Burgert Blom and Matthias Driess	
<b>Multiple Bonds with Silicon: Recent Advances in Synthesis, Structure, and Functions of Stable Disilenes</b> .....	125
Takeaki Iwamoto and Shintaro Ishida	
<b>Recent Advances in the <i>N</i>-Heterocyclic Carbene-Supported Chemistry of Silicon</b> .....	203
Eric Rivard	
<b>Index</b> .....	229

Functional Molecular Silicon Compounds II

Low Oxidation States

Scheschkewitz, D. (Ed.)

2014, IX, 232 p. 100 illus., 1 illus. in color., Hardcover

ISBN: 978-3-319-03733-2
