

# Contents

<b>Introduction</b>	xvii
<b>1 Wildlife Tracking Data Management: Chances Come from Difficulties</b>	1
Holger Dettki, Ferdinando Urbano, Mathieu Basille and Francesca Cagnacci	
Introduction	2
Requirements	3
Chances	4
Spatial and Spatiotemporal Extensions	6
References	6
<b>2 Storing Tracking Data in an Advanced Database Platform (PostgreSQL)</b>	9
Ferdinando Urbano and Holger Dettki	
Introduction	10
Create a New Database	12
Create a New Table and Import Raw GPS Data	14
Finalise the Database: Defining GPS Acquisition Timestamps, Indexes and Permissions	21
Export Data and Backup	23
Reference	24
<b>3 Extending the Database Data Model: Animals and Sensors</b>	25
Ferdinando Urbano	
Introduction	25
Import Information on GPS Sensors and Add Constraints to the Table	27
Import Information on Animals and Add Constraints to the Table	29
First Elements of the Database Data Model	32

<b>4</b>	<b>From Data to Information: Associating GPS Positions with Animals</b>	<b>35</b>
	Ferdinando Urbano	
	Introduction.	35
	Storing Information on GPS Sensor Deployments on Animals.	38
	From GPS Positions to Animal Locations.	40
	Timestamping Changes in the Database Using Triggers	41
	Automation of the GPS Data Association with Animals	44
	Consistency Checks on the Deployments Information.	45
	Synchronisation of gps_sensors_animals and gps_data_animals	47
<b>5</b>	<b>Spatial is not Special: Managing Tracking Data in a Spatial Database</b>	<b>53</b>
	Ferdinando Urbano and Mathieu Basille	
	Introduction.	53
	Spatially Enable the Database	55
	Exploring Spatial Functions	57
	Transforming GPS Coordinates into a Spatial Object	62
	Automating the Creation of Points from GPS Coordinates	65
	Creating Spatial Database Views	68
	Vector Data Import and Export	72
	Connection from Client Applications	72
	Reference	73
<b>6</b>	<b>From Points to Habitat: Relating Environmental Information to GPS Positions</b>	<b>75</b>
	Ferdinando Urbano, Mathieu Basille and Pierre Racine	
	Introduction.	76
	Adding Ancillary Environmental Layers	77
	Importing Shapefiles: Points, Lines and Polygons	78
	Importing Raster Files	81
	Querying Spatial Environmental Data.	83
	Associate Environmental Characteristics with GPS Locations	88
	References	93
<b>7</b>	<b>Tracking Animals in a Dynamic Environment: Remote Sensing Image Time Series</b>	<b>95</b>
	Mathieu Basille, Ferdinando Urbano, Pierre Racine, Valerio Capecchi and Francesca Cagnacci	
	Introduction.	96
	MODIS NDVI Data Series	98
	Dealing with Raster Time Series	99
	Time Ranges in PostgreSQL	100
	Import the Raster Time Series	103

Intersection of Locations and NDVI Rasters . . . . .	106
Automating the Intersection . . . . .	110
References . . . . .	113
<b>8 Data Quality: Detection and Management of Outliers . . . . .</b>	<b>115</b>
Ferdinando Urbano, Mathieu Basille and Francesca Cagnacci	
Introduction. . . . .	116
Review of Errors that Can Affect GPS Tracking Data . . . . .	116
A General Approach to the Management of Erroneous Locations . . . . .	118
Missing Records . . . . .	121
Records with Missing Coordinates . . . . .	121
Multiple Records with the Same Acquisition Time . . . . .	122
Records with Different Values When Acquired Using Different	
Acquisition Sources . . . . .	123
Records Erroneously Attributed to Animals. . . . .	124
Records Located Outside the Study Area . . . . .	124
Records Located in Impossible Places . . . . .	128
Records that Would Imply Impossible Movements. . . . .	128
Records that Would Imply Improbable Movements . . . . .	133
Update of Spatial Views to Exclude Erroneous Locations. . . . .	134
Update Import Procedure with Detection of Erroneous Positions . . . . .	135
References . . . . .	137
<b>9 Exploring Tracking Data: Representations, Methods</b>	
<b>and Tools in a Spatial Database . . . . .</b>	<b>139</b>
Ferdinando Urbano, Mathieu Basille and Pierre Racine	
Introduction. . . . .	140
Extraction of Statistics from the GPS Data Set . . . . .	141
A New Data Type for GPS Tracking Data . . . . .	142
Representations of Trajectories . . . . .	143
Regularisation of GPS Location Data Sets . . . . .	148
Interpolation of Missing Coordinates . . . . .	152
Detection of Sensors Acquisition Scheduling. . . . .	156
Representations of Home Ranges. . . . .	160
Geometric Parameters of Animal Movements . . . . .	166
An Alternative Representation of Home Ranges . . . . .	171
Dynamic Age Class . . . . .	175
Generation of Random Points . . . . .	177
References . . . . .	180
<b>10 From Data Management to Advanced Analytical Approaches:</b>	
<b>Connecting R to the Database. . . . .</b>	<b>181</b>
Bram Van Moorter	
Introduction: From Data Management to Data Analysis . . . . .	181

Background for the Analysis of Animal Space Use Data . . . . .	182
The Tools: R and Adehabitat. . . . .	183
Connecting R to the Database . . . . .	186
Data Inspection and Exploration . . . . .	190
Home Range Estimation . . . . .	200
Habitat Use and Habitat Selection Analysis. . . . .	204
References . . . . .	212
 <b>11 A Step Further in the Integration of Data Management and Analysis: PI/R . . . . .</b>	 213
Mathieu Basille, Ferdinando Urbano and Joe Conway	
Introduction. . . . .	214
Getting Started with PI/R . . . . .	215
Sample Median and Quantiles . . . . .	216
In the Middle of the Night . . . . .	219
Extending the Home Range Concept . . . . .	222
Conclusions and Perspectives . . . . .	228
 <b>12 Deciphering Animals' Behaviour: Joining GPS and Activity Data . . . . .</b>	 231
Anne Berger, Holger Dettki and Ferdinando Urbano	
Introduction. . . . .	232
Import the Activity Data into the Database . . . . .	234
Exploring Activity Data and Associating with GPS Positions . . . . .	239
References . . . . .	243
 <b>13 A Bigger Picture: Data Standards, Interoperability and Data Sharing . . . . .</b>	 245
Sarah Cain Davidson	
Introduction. . . . .	246
Describing Data . . . . .	247
Data and Metadata Standards . . . . .	248
Interoperability . . . . .	250
Publish Your Metadata . . . . .	251
Publish and Share Your Data . . . . .	253
Share Your Data Without Publishing . . . . .	253
References . . . . .	256

Spatial Database for GPS Wildlife Tracking Data  
A Practical Guide to Creating a Data Management  
System with PostgreSQL/PostGIS and R  
Urbano, F.; Cagnacci, F. (Eds.)  
2014, XXIII, 257 p. 47 illus., 32 illus. in color., Hardcover  
ISBN: 978-3-319-03742-4
