

Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 1.1 | Historical Perspective | 1 |
| 1.2 | Current Technology is Conditioned by our History | 2 |
| 1.3 | The Danger of Myths and the Public | 4 |
| 1.4 | Defects in Components, Ductile and Brittle Materials | 6 |
| 1.5 | The Industrial Revolution and Failures in Pressure Components | 7 |
| 1.6 | The Advent of Fracture Mechanics | 9 |
| 1.7 | Scope of the Failure Analysis | 10 |
| 1.7.1 | Example 1.A Expert Analysis After a Traffic Accident | 13 |
| 1.8 | Concluding Remarks | 15 |
| | References | 18 |
| 2 | Tools for Preliminary Analysis of a Mechanical Failure | 19 |
| 2.1 | Methodologies for Field Investigation After a Failure | 19 |
| 2.2 | Collecting Data and History | 21 |
| 2.3 | Visual Inspection Techniques and Field Photography | 21 |
| 2.4 | How to Detect the Site of Initiation of Mechanical Failure | 25 |
| 2.4.1 | Fractographic | 25 |
| 2.4.2 | Example 2.A Identification of Failure Origin | 28 |
| 2.4.3 | Initiation Site of a Fracture | 29 |
| 2.4.4 | Example 2.B Detection of Previous In-Service Damage | 32 |
| 2.5 | Failure of Threaded and Rotating Elements | 33 |
| 2.5.1 | Example 2.C Failure of a Bolted Structure | 36 |
| 2.6 | Extraction and Storage of Samples | 39 |
| 2.7 | Inspection by NDT Techniques | 42 |
| 2.8 | Organization of Work Teams | 48 |
| | References | 51 |

| | | |
|----------|---|------------|
| 3 | Tools for the Microscopic Analysis of a Mechanical Failure | 53 |
| 3.1 | Microstructural and Metallographic Characterizations of Metallic Parts | 53 |
| 3.2 | Cutting and Preparation of Samples | 54 |
| 3.3 | The Polycrystalline Nature of Metals | 58 |
| 3.4 | Microscopic Examination of the Structure of Metals | 60 |
| 3.4.1 | Example 3.A Metallographic Analysis of a Welded Pipe | 65 |
| 3.5 | Microscopic Examination of Fracture Surfaces | 66 |
| 3.5.1 | Example 3.B Fractographic Analysis of a Thick-Walled Tube | 68 |
| 3.6 | Identification of Subcritical Growth Surfaces | 71 |
| 3.6.1 | Example 3.C Failure of a Flexible Connection | 73 |
| 3.7 | High Magnification Tools, Electron Microscopy | 75 |
| 3.7.1 | Example 3.D SEM Analysis | 76 |
| 3.8 | Extra-High Definition Fractographic Analyses, Nano Devices | 80 |
| | References | 83 |
| 4 | Mechanisms of Damage and Failure | 85 |
| 4.1 | Introduction | 85 |
| 4.2 | Failure Mechanisms | 87 |
| 4.3 | Mechanisms of In-service Damage | 89 |
| 4.4 | Corrosion | 90 |
| 4.4.1 | Example 4.A Corrosion in Exchanger Tubes | 96 |
| 4.5 | Propagation of Cracks, Fatigue | 100 |
| 4.5.1 | Example 4.B Fatigue Failure in a Pipeline | 100 |
| 4.6 | Hydrogen Damage | 104 |
| 4.7 | Damage by Prolonged Exposure to High Temperature | 106 |
| 4.7.1 | Example 4.C Fire in a Hydrocarbon Furnace | 107 |
| 4.8 | Environment Assisted Cracking | 111 |
| 4.8.1 | Example 4.D Cracks in a Heat Exchanger Tube Plate | 114 |
| 4.9 | Discontinuities or Defects Introduced During Manufacture | 116 |
| | References | 120 |
| 5 | Damage Resistance Tests of Materials | 121 |
| 5.1 | Tensile Testing | 122 |
| 5.1.1 | Example 5.A A Stainless Steel Tube at High Temperature | 125 |
| 5.2 | Ductile–Brittle Transition Temperature | 126 |
| 5.3 | Experimental Determination of Fracture Toughness | 129 |
| 5.4 | Spectrometry Analysis and Hardness Tests | 132 |

| | | |
|----------|--|------------|
| 5.5 | Experimental Measurement of Residual Stresses. | 135 |
| 5.6 | Experimental Determination of the Resistance to In-service Damage | 137 |
| 5.7 | Testing of Fatigue Life | 138 |
| 5.8 | Techniques for Corrosion Monitoring | 140 |
| 5.9 | Estimation of SCC Propagation Rates and Threshold Stress | 142 |
| 5.10 | Creep Resistance and Monitoring of In-service Damage | 144 |
| | References | 148 |
| 6 | Modeling Tools Applied to the Analysis of Mechanical Failures | 149 |
| 6.1 | Introduction | 149 |
| 6.2 | Numerical Modeling Tools | 152 |
| 6.2.1 | Example 6.A Modeling of Soil-Pipeline Interaction | 155 |
| 6.3 | Criteria for Modeling Pressure Components. | 158 |
| 6.3.1 | Example 6.B Stress Analysis of Damper Vessel | 161 |
| 6.4 | Stress Analysis of Cracked Components | 162 |
| 6.5 | Calculation of the Load Required for Brittle Fracture | 164 |
| 6.6 | Calculation of the Conditions for Ductile Fracture | 168 |
| 6.6.1 | Example 6.C Calculation of Applied Stress at a Pre-existing Defect | 170 |
| 6.7 | Mechanical Modeling of Longitudinal Cracks in Pipes | 172 |
| 6.8 | Mechanical Modeling of Fatigue Crack Propagation | 174 |
| 6.8.1 | Example 6.D Modeling of Fatigue Crack Growth in Compressor | 177 |
| 6.9 | Determination of Fracture Toughness in Post-failure Samples | 178 |
| | References | 180 |
| 7 | Root Cause Analyses | 183 |
| 7.1 | Introduction | 183 |
| 7.2 | The Explosion of the Challenger Space Shuttle | 184 |
| 7.3 | Methodology for Root Cause Analysis | 187 |
| 7.3.1 | Example 7.A Is a Blown Fuse a Failure?. | 189 |
| 7.4 | The Cause-Effect Tree | 189 |
| 7.5 | Data Collection: Interviews and Statements | 191 |
| 7.5.1 | Example 7.B Causal Tree in a “Hot Tap” Repair. . . | 193 |
| 7.6 | Data Collection: Documents and Records | 198 |
| 7.7 | Rebuttal, Iteration, Coincidence, and Causality. | 199 |
| 7.7.1 | Example 7.C RCA of Failure in Directional River Crossing | 202 |
| 7.8 | Levels in Failure Analyses. | 209 |

| | | |
|----------|--|------------|
| 7.9 | Alternative Formats for a Failure Investigation. | 212 |
| 7.9.1 | Example 7.D RCA of Fire in a Heater at a Petrochemical Plant | 214 |
| | References | 217 |
| 8 | Damage and Failure Mechanisms in Machinery | 219 |
| 8.1 | Definition of Failure in Machinery | 219 |
| 8.2 | Modes of Failure in Shafts. | 220 |
| 8.2.1 | Example 8.A Failure of Shaft in a Hydraulic Pump | 220 |
| 8.3 | Failures of Bearings | 221 |
| 8.3.1 | Example 8.B Failure of Bearing in A.C. Generator | 225 |
| 8.4 | Failure in Sliding or Plain Bearings | 227 |
| 8.4.1 | Example 8.C Failure of Sliding Bearing in a Large Gas Engine. | 228 |
| 8.5 | Failure of Transmission Elements: Gears and Couplings | 230 |
| 8.5.1 | Gears. | 230 |
| 8.5.2 | Couplings | 233 |
| 8.5.3 | Example 8.D Failure of a Flexible Coupling | 234 |
| 8.6 | Failure of Fasteners, Bolts, and Other Threaded Elements . . . | 237 |
| 8.6.1 | Example 8.E Failure of an Allen Type Fastening Bolt in a Compressor Piston Head | 241 |
| 8.7 | Characteristic Failures in Turbo Machines | 244 |
| 8.7.1 | Steam Turbines. | 244 |
| 8.7.2 | Example 8.F Failure in the Rotor of a Steam Turbine | 246 |
| 8.7.3 | Gas Turbines | 247 |
| | References | 250 |
| 9 | Failure Mitigation and Extension of Service Life | 251 |
| 9.1 | Introduction and Historical Perspective | 251 |
| 9.2 | Failure Mode and Effect Assessment. | 253 |
| 9.3 | Procedures for Assessing Fitness for Service | 255 |
| 9.4 | Evaluation of General and Local Loss of Thickness | 257 |
| 9.5 | Evaluation of Geometrical Discontinuities and Cracks. | 259 |
| 9.6 | The Leak Before Break Criterion for Pressurized Components | 264 |
| 9.7 | Monitoring Damage and Stresses During Service | 264 |
| 9.8 | Strength Tests Using Instrumented Indentation. | 270 |
| 9.9 | Monitoring of Machines | 271 |
| 9.9.1 | Vibration Analysis | 273 |
| 9.9.2 | Lubricant Analyses | 274 |
| 9.9.3 | Acoustic Emission Analysis | 275 |
| 9.9.4 | Analysis by Infrared Thermography | 276 |

| | | |
|-----------|---|------------|
| 9.10 | Estimation of Residual Life Against Damage Mechanisms | 276 |
| 9.10.1 | Example 9.A Fatigue Life Prediction in a Pipeline. | 278 |
| | References | 281 |
| 10 | Consequences of a Failure Analysis. | 283 |
| 10.1 | Writing Reports After a Failure Analysis. | 283 |
| 10.2 | Failure Analysis in Potentially Litigious Cases. | 285 |
| 10.3 | Learning or not Learning from Accidents, Here the Question. | 288 |
| 10.4 | On Human Error. | 291 |
| 10.5 | Human Errors at Different Levels, the Chernobyl Case. | 293 |
| 10.5.1 | The Worst Nuclear Disaster | 293 |
| 10.5.2 | Levels in the Chain of Human Errors | 295 |
| 10.6 | Business Impositions and Political Decision-Making. | 297 |
| 10.6.1 | Example 10.A Incident on a Water Pumping Plant | 298 |
| 10.7 | The Rules are Relaxed: The Case of the Macondo Oil Well | 301 |
| 10.8 | Underestimating Consequences of Natural Events, the Fukushima Event. | 305 |
| 10.9 | Management of Old Plants and Equipment | 307 |
| 10.10 | Causes and Consequences of the Most Famous Accident. | 310 |
| | References | 313 |

Failure Analysis
Fundamentals and Applications in Mechanical
Components

Otegui, J.L.

2014, XIX, 313 p. 236 illus., Hardcover
