1	Introduction	1
	References	2
Part I Theoretical Basics		
2	Piezoelectric Materials	7
2.1	Short Historical Overview	7
2.2	Types of Piezoelectric Materials	10
2.3	Physical Peculiarities	12
2.4	Field Equations in 3D	17
2.4.1	Constitutive Equations	17
2.4.2	Equations of Motion	21
2.5	Field Equations in 2D	23
2.5.1	In-plane Piezoelectric Equations	23
2.5.2	Anti-plane Piezoelectric Equations	25
2.6	2D Domains with Cracks	26
2.6.1	Wave Propagation	26
2.6.2	Fracture Mechanics Approach	27
2.6.3	Boundary Value Problems	29
	References	31
3	Fundamental Solutions	33
3.1	State of the Art	33
3.1.1	Static Fundamental Solutions	34
3.1.2	Dynamic Fundamental Solutions	35
3.2	Preliminaries	37
3.2.1	Fourier Transform in R^2	37
3.2.2	Radon Transform in R^2	39
3.2.3	Fundamental Solution of ODE	40
3.3	Anti-plane Piezoelectric Case	41
3.3.1	Uncoupled Anti-plane Case	42
3.3.2	Coupled Anti-plane Case	45

3.4	In-plane Piezoelectric Case	47
3.4.1	Uncoupled In-plane Case	47
3.4.2	Coupled In-plane Case	52
	References	55
4	Numerical Realization by BIEM	59
4.1	Introduction Remarks	59
4.2	Traction BIEM	61
4.2.1	Bounded Domain	61
4.2.2	Unbounded Domain	64
4.3	Numerical Realization	67
4.3.1	Discretization	67
4.3.2	Numerical Schemes	71
4.3.3	Solution of the Integrals	74
4.4	Programme Code, Material Constants	76
4.4.1	Programme Code	76
4.4.2	Material Constants	77
	References	78
 Part II Homogeneous PEM		
5	Steady-State Problems in a Cracked Anisotropic Domain	81
5.1	Introduction	81
5.2	Statement of the Problem	82
5.3	Numerical Solution	84
5.3.1	Incident Wave	84
5.3.2	Numerical Results	85
5.4	Conclusion	89
	References	90
6	2D Wave Scattering by Cracks in a Piezoelectric Plane	93
6.1	Introduction	93
6.2	Problem Statement	94
6.3	Numerical Solution	96
6.3.1	Validation Example	96
6.3.2	Parametric Study	97
6.4	Conclusion	102
	References	102
7	Piezoelectric Cracked Finite Solids Under Time-Harmonic Loading	105
7.1	Introduction	105
7.2	Problem Statement	105

7.3	Numerical Solution	108
7.3.1	Validation Study	108
7.3.2	Parametric Study	112
7.4	Concluding Remarks	115
	References	115
8	Dynamic Crack Interaction in Piezoelectric and Anisotropic Solids	117
8.1	Introduction	117
8.2	Problem Statement	118
8.3	Numerical Results	121
8.3.1	Piezoelectric Solids	122
8.3.2	Anisotropic Solids	125
8.4	Conclusion	130
	References	130
9	Different Electric Boundary Conditions	133
9.1	Introduction	133
9.2	Formulation of the Problem	135
9.2.1	In-plane Crack Problem	136
9.2.2	Anti-plane Crack Problem	138
9.3	Numerical Realization	139
9.4	Numerical Results	139
9.5	Concluding Remarks	145
	References	145
Part III Functionally Graded PEM		
10	In-plane Crack Problems in Functionally Graded Piezoelectric Solids	149
10.1	Introduction	149
10.2	Formulation of the BVP	151
10.3	Numerical Procedure	152
10.3.1	Fundamental Solution	152
10.3.2	Non-hypersingular Traction BIEM	154
10.4	Numerical Results	155
10.5	Conclusion	161
	References	162
11	Functionally Graded Piezoelectric Media with a Single Anti-plane Crack	165
11.1	Introduction	165
11.2	Formulation of the BVP	166
11.3	Inhomogeneity and Fundamental Solution	168

11.4 Numerical Realization	172
11.4.1 Incident SH-Waves	173
11.4.2 Validation Example.	174
11.4.3 Parametric Study.	175
11.5 Conclusions	179
References	180
12 Multiple Anti-plane Cracks in Quadratically Inhomogeneous Piezoelectric Finite Solids	183
12.1 Introduction	183
12.2 Statement of the Problem	184
12.3 Numerical Procedure	186
12.4 Numerical Results	188
12.5 Conclusion	196
References	196
13 Anti-plane Cracks in Exponentially Inhomogeneous Finite Piezoelectric Solid	199
13.1 Introduction	199
13.2 Statement of the Problem	201
13.3 Non-hypersingular BIEM	203
13.4 Numerical Solution and Results.	204
13.4.1 Numerical Solution	204
13.4.2 Numerical Results.	204
13.5 Conclusion	212
References	213
14 Exponentially Inhomogeneous Piezoelectric Solid with a Circular Anti-plane Hole	215
14.1 Introduction	215
14.2 Statement of the Problem	216
14.3 Exponential Material Inhomogeneity	218
14.3.1 Electro-Mechanical Load	219
14.3.2 BIEM Formulation	220
14.4 Numerical Results	222
14.4.1 Numerical Solution Procedure	222
14.4.2 Validation Study.	223
14.4.3 Simulation Results	225
14.5 Conclusion	231
References	231

15 Anti-plane Dynamic Crack–Hole Interaction in a Functionally Graded Piezoelectric Medium.	233
15.1 Introduction	233
15.2 Problem Statement.	234
15.3 BIEM Formulation.	237
15.4 Numerical Procedure	238
15.5 Numerical Results	239
15.5.1 Validation Study.	239
15.5.2 Simulation Results	242
15.6 Conclusion	244
References	245
Index	247

Dynamic Fracture of Piezoelectric Materials
Solution of Time-Harmonic Problems via BIEM
Dineva, P.S.; Gross, D.; Müller, R.; Rangelov, T.
2014, XIV, 249 p. 119 illus., Hardcover
ISBN: 978-3-319-03960-2
