1	Introduction	1
1.1	Overview	1
1.2	Electron Accelerators as Short-Wavelength Light Sources	3
1.3	Free-Electron Lasers and Quantum Lasers	5
1.3.1	Stimulated and Spontaneous Emission	5
1.3.2	Is the FEL Really a Laser?	7
1.3.3	Why Does the FEL Need an Undulator?	8
	References	9
2	Undulator Radiation	11
2.1	Magnetic Field of a Planar Undulator	11
2.2	Electron Motion in an Undulator	12
2.2.1	Trajectory in First Order	12
2.2.2	Motion in Second Order	13
2.3	Emission of Radiation	14
2.3.1	Radiation in a Moving Coordinate System	15
2.3.2	Transformation of Radiation into Laboratory System	16
2.4	Lineshape and Spectral Energy of Undulator Radiation	19
2.5	Higher Harmonics	20
	References	23
3	Low-Gain FEL Theory	25
3.1	Energy Transfer from Electron Beam to Light Wave	25
3.1.1	Qualitative Treatment	25
3.1.2	Quantitative Treatment	27
3.2	The FEL Pendulum Equations	30
3.3	Phase Space Representation and FEL Bucket	32
3.3.1	Phase Space Trajectories	32
3.3.2	Definition of the FEL Bucket	33
3.4	FEL Gain and Madey Theorem	35
3.5	Higher Harmonics and Modified Undulator Parameter	36
	References	38

4	One-Dimensional Theory of the High-Gain FEL	39
4.1	General Principles of High-Power FELs	39
4.2	Microbunching	40
4.3	Basic Elements of the One-Dimensional FEL Theory	41
4.4	Electromagnetic Fields	44
4.4.1	Radiation Field	44
4.4.2	Space Charge Field	47
4.5	Corrections Due to the Longitudinal Oscillation	48
4.6	The Coupled First-Order Equations	48
4.7	The Third-Order Equation of the High-Gain FEL	52
4.8	Analytic Solution of the Third-Order Equation	57
4.9	High-Gain FEL with Helical Undulator	60
	References	61
5	Applications of the High-Gain FEL Equations	63
5.1	Gain Function of the High-Gain FEL	63
5.1.1	Third-Order Equation with Energy Detuning	63
5.1.2	Short Undulator: Low-Gain Limit	64
5.1.3	Long Undulator: High-Gain Regime	65
5.2	FEL Bandwidth	65
5.2.1	Detuning Parameter	66
5.2.2	Analytical Determination of the FEL Bandwidth	68
5.3	FEL Startup by a Periodically Modulated Electron Beam Current	69
5.4	Laser Saturation	71
5.5	Linear and Nonlinear Regime of a High-Gain FEL	73
5.6	Simulation of Microbunching	75
5.6.1	Evolution of Phase Space Structures	75
5.6.2	Evolution of Phases in the FEL Gain Process	78
5.6.3	The Onset of Microbunching	82
5.6.4	Higher Harmonics in FEL Radiation	83
	References	84
6	Energy Spread, Space Charge and 3D Effects	85
6.1	Increase of Gain Length by Energy Spread and Space Charge	86
6.1.1	Energy Detuning	86
6.1.2	Energy Spread and Space Charge	87
6.2	Increase of Gain Length by 3D Effects	88
6.3	Overlap Between Electron and Photon Beam	90
6.3.1	Electron Beam Focusing and Emittance	90
6.3.2	Optical Diffraction and Gain Guiding	94

6.4	Parametrization of Gain Length in an X-Ray FEL	95
6.5	FEL Radiation from Short Bunches	97
6.5.1	Velocities	97
6.5.2	Slippage Effects in Short Bunches	101
6.6	Superradiance.	105
	References	105
