

Contents

1	Introduction	1
1.1	Engineers, Engineering and Ethics	1
1.2	A Statement of Ethical Principles	3
1.3	An Approach to Ethics: Persons in Communities	5
1.4	Engineering and Technology: Contrasts and Some Illustrative Ethical Aspects	7
1.5	Outline of the Development in this Book	11
	Appendix	15
	References	17
2	A Philosophical Analysis of the Nature of Engineering	19
2.1	Introduction	19
2.2	The Practice of Engineering	19
2.2.1	End or Goal	20
2.2.2	Internal Goods	21
2.2.3	External Goods	22
2.2.4	Virtues or Principles	24
2.2.5	Institutions	25
2.2.6	Systematic Extension	27
2.3	An Opportunity of Professional Capabilities	28
2.4	Sidney Loeb: His Engineering Work and an Ethical Analysis	29
	Appendix	32
	References	33
3	Engineering for Peace	35
3.1	Introduction	35
3.2	Victims of Engineering	36
3.3	The Temptations of Military Technology	37
3.4	'Just War' Theory: A Preliminary Perspective	39
3.5	<i>Jus In Bello</i> : An Engineering Perspective	40
3.6	<i>Jus Ad Bellum</i> : An Engineering Perspective	44

3.7	<i>Jus Ante Bellum: An Engineering Proposal</i>	47
3.8	Just Engineering and Active Peacemaking	49
	References	50
4	Engineering for Health	53
4.1	Introduction	53
4.2	Trends of Engineering Innovation in Healthcare	53
4.3	Engineering Innovation in Healthcare: Technological Aspects	54
4.3.1	Assistive Technologies	55
4.3.2	Telehealthcare	55
4.3.3	Quasi-Autonomous Systems	56
4.4	Engineering Innovation in Healthcare: An Ethical Assessment	57
4.4.1	General Considerations	57
4.4.2	Specific Considerations	59
4.5	Overall Assessment of Engineering Innovation in Healthcare	61
4.6	Transport and Health	63
4.6.1	Engineering and Transport	63
4.6.2	Healthcare and Transport	64
4.6.3	Reconsidering Engineering and Transport	66
4.6.4	Transport and Health: A Global Issue	67
	References	68
5	Engineering for Development	71
5.1	Introduction	71
5.2	Energy, Poverty and Development	72
5.3	Engineering, Poverty and Development	76
5.4	Engineering, Poverty and Development: An Ethical Analysis	77
5.5	Learning from African Approaches to Ethics	83
	References	84
6	Personal Responsibility and Supporting Social Structures	87
6.1	Introduction	87
6.2	The Case of J	87
6.3	Arguments Against the Personal Responsibility of Engineers	88
6.4	The Acceptance of Ethical Responsibility	91
6.5	Trade Unions: The Lucas Plan	93
6.6	Faith Communities: Saint Benedict	96
	References	102

7 Convincing Others: Engineering for Human Rights and Engineering Power	105
7.1 Introduction	105
7.2 The International Consensus on Human Rights	106
7.3 Human Rights, Businesses and Engineering	109
7.4 Human Rights and the Practice of Engineering	115
7.5 Politicians, Power and Engineering	116
7.6 Power Resources, Power Conversion and Realised Power	118
7.7 Military Power, Economic Power and Transnational Relations	119
7.8 Engineering Power.	120
References	122
8 Future Perspectives	125
8.1 Introduction	125
8.2 A Philosophical Analysis of the Nature of Engineering	125
8.3 Engineering for Peace	128
8.4 Engineering for Health.	130
8.5 Engineering for Development	131
8.6 Personal Responsibility and Supporting Social Structures.	133
8.7 Convincing Others: Engineering for Human Rights and Engineering Power	136
8.8 Concluding Personal Challenge.	139
References	140
Index	143
