Contents

Part I Robust Topological Analysis

Robust Detection of Singularities in Vector Fields 3
Harsh Bhatia, Attila Gyulassy, Hao Wang, Peer-Timo Bremer, and Valerio Pascucci

Interpreting Feature Tracking Through the Lens of Robustness 19
Primoz Skraba and Bei Wang

Simplification of Morse Decompositions Using Morse Set Mergers 39
Levente Sipeki and Andrzej Szymczak

Toward the Extraction of Saddle Periodic Orbits 55
Jens Kasten, Jan Reininghaus, Wieland Reich, and Gerik Scheuermann

Part II Efficient Computation of Topology

Computational Topology via Functional Programming: A Baseline Analysis 73
David Duke and Hamish Carr

Distributed Contour Trees 89
Dmitriy Morozov and Gunther H. Weber

Clear and Compress: Computing Persistent Homology in Chunks 103
Ulrich Bauer, Michael Kerber, and Jan Reininghaus

Parallel Computation of Nearly Recurrent Components of Piecewise Constant Vector Fields 119
Nicholas Brunhart-Lupo and Andrzej Szymczak

Part III Simplification, Approximation, and Distance Measures

Notes on the Simplification of the Morse-Smale Complex 135
David Günther, Jan Reininghaus, Hans-Peter Seidel, and Tino Weinkauf

Measuring the Distance Between Merge Trees 151
Kenes Beketayev, Damir Yeliussizov, Dmitriy Morozov, Gunther H. Weber, and Bernd Hamann

Topological Integrity for Dynamic Spline Models During Visualization of Big Data 167
Hugh P. Cassidy, Thomas J. Peters, Horea Ilies, and Kirk E. Jordan

Part IV Time-Dependent Analysis

A Comparison of Finite-Time and Finite-Size Lyapunov Exponents 187
Ronald Peikert, Armin Pobitzer, Filip Sadlo, and Benjamin Schindler

Development of an Efficient and Flexible Pipeline for Lagrangian Coherent Structure Computation 201
Siavash Ameli, Yogin Desai, and Shawn C. Shadden

Topological Features in Time-Dependent Advection-Diffusion Flow..... 217
Filip Sadlo, Grzegorz K. Karch, and Thomas Ertl

Part V Applications

Definition, Extraction, and Validation of Pore Structures in Porous Materials 235
Ulrike Homberg, Daniel Baum, Alexander Wiebel, Steffen Prohaska, and Hans-Christian Hege

Visualization of Two-Dimensional Symmetric Positive Definite Tensor Fields Using the Heat Kernel Signature..... 249
Valentin Zobel, Jan Reininghaus, and Ingrid Hotz

Topological Features in Glyph-Based Corotation Visualization 263
Sohail Shafii, Harald Obermaier, Bernd Hamann, and Kenneth I. Joy

Index..... 277

Topological Methods in Data Analysis and Visualization
III
Theory, Algorithms, and Applications
Bremer, P.-T.; Hotz, I.; Pascucci, V.; Peikert, R. (Eds.)
2014, X, 279 p. 98 illus., 69 illus. in color., Hardcover
ISBN: 978-3-319-04098-1
