

# Contents

## Part I Techniques and Technologies for Software Engineering Education

<b>E-learning for Employability: A Case Study from a UK Master’s Programme</b> . . . . .	3
Jenny Carter and Ian Pettit	
<b>Introducing Natural Language Examples in a Course on Compiler Principles</b> . . . . .	13
Yin Chen	
<b>How to Introduce SCRUM into Software Engineering Course</b> . . . . .	21
Shaomin Zhu	
<b>Computational Thinking and Its Impact on Software Engineering Education</b> . . . . .	29
Dechen Zhan, Lanshun Nie and Xiaofei Xu	
<b>Electronic Online Marking of Software Assignments</b> . . . . .	41
Gary Hill and Scott Turner	
<b>Learning in the Context of an Ambient Assisted Living Apartment: Including Methods of Serious Gaming</b> . . . . .	49
Sven Leonhardt, Stephan Kassel, Anne Randow and Tobias Teich	

## Part II Software Engineering Education Versus Industry Demand

<b>Encouraging Transformational Learning and Reflective Practice with 2nd Year IT Students Using a Skills Inventory</b> . . . . .	59
Clive C. H. Rosen	

<b>Social Demand-Oriented Education Model for Software Engineering. . . . .</b>	<b>65</b>
Shu Liu, Lina Zhou, Peijun Ma, Dong Li and Shengchun Deng	
<b>Innovation and Practice of Engineering-Typed Talents Training Mode . . . . .</b>	<b>73</b>
Yi Qu, Xue-Qing Li, Ti Zhou and Li-Xin Li	
<b>Enterprise Oriented Software Engineering Education: A Framework for Employability . . . . .</b>	<b>83</b>
Gianmario Motta, Daniele Sacco and Linlin You	
<b>Rethinking the Talents Cultivation Mode of Software Engineering . . .</b>	<b>93</b>
Dongming Chen, Zhiliang Zhu and Dongqi Wang	
<b>An Initiative to Apply the Concept and Philosophy of Industry-Oriented Higher Education to Technician Level Software Programmes . . . . .</b>	<b>101</b>
Jenny Munnelly, Sharon Feeney, Bing Wu, Matt Hussey, Tom Duff, Pat O'Neill and Robert Burns	
<b>From the Rise of CDIO (Conceive, Design, Implement and Operate) Process and “Modern Apprenticeship” to Exam the Direction of Reforming the Vocational Education in China. . . . .</b>	<b>109</b>
MinYing Xu	
 <b>Part III Curricula for Software Engineering Education</b>	
<b>To Cultivate Engineering Leadership of Excellent Undergraduate Students in HIT-NPSS. . . . .</b>	<b>119</b>
Dong Li, Guo-Xiang Fan, Pei-Jun Ma and Xiao-Fei Xu	
<b>The Solutions to Strengthening the Construction of Computer Experimental Teaching Faculty . . . . .</b>	<b>125</b>
Chun He, Hang Lei, Qihua Wang and Xinyuan Gong	
<b>Concentrating on Innovation Education to Facilitate Engineering Education . . . . .</b>	<b>133</b>
Zufeng Wu, Guobin Zhu, Qihua Wang and Xinyuan Gong	

**Student-Centered Course Development of Digital Media Technology . . . . . 141**  
Tonghua Su, Peijun Ma, Shengchun Deng, Dong Li and Hujie Huang

**International Master on Manufacturing Service Ecosystem: A Proposal . . . . . 147**  
David Chen and Jean-Paul Bourrieres

**Service Science and Scholarship: Experiences from a Pragmatist Perspective . . . . . 153**  
Gianluigi Viscusi, Marco Cremaschi and Carlo Batini

Software Engineering Education for a Global E-Service  
Economy

State of the Art, Trends and Developments

Motta, G.; Wu, B. (Eds.)

2014, XV, 162 p. 36 illus., Hardcover

ISBN: 978-3-319-04216-9
