

Contents

1	Preliminaries	1
1.1	Why we Need the Wavelets?	1
1.2	Wavelet Families	2
	References	6
2	Haar Wavelets	7
2.1	Haar Wavelets and their Integrals.	7
2.2	Haar Matrices	10
2.3	Expanding Functions into the Haar Wavelet Series.	10
2.4	Non-uniform Haar Wavelets	13
2.5	Algorithms and Programs	14
2.6	Related Papers	18
	References	20
3	Solution of Ordinary Differential Equations (ODEs)	21
3.1	Initial Value Problem for n -th Order ODE.	21
3.2	Treatment of Boundary Value Problems	24
3.3	A Modified Solution.	26
3.4	Benefits of the Non-uniform Haar Wavelets	30
3.5	Nonlinear Equations	33
3.6	Method of Segmentation	37
3.7	Related Papers	39
	References	42
4	Stiff Equations	45
4.1	Introduction	45
4.2	Linear Problems	46
4.3	Nonlinear Equations	48
4.4	Robertson's Problem	50
4.5	Singular Perturbation Problems	53
4.6	Related Papers	56
	References	56

5	Integral Equations	59
5.1	Introduction	59
5.2	Fredholm Integral Equation	60
5.3	Eigenvalues and Eigenfunctions	63
5.4	Volterra Integral Equation	65
5.5	Integro-Differential Equation	66
5.6	Weakly Singular Integral Equations	67
5.7	The Case of the Infinite Interval of Integration	69
5.8	Nonlinear Integro-Differential Equation.	70
5.9	Application of the Integro-Differential Equations for Solving Boundary Value Problems of ODE	75
5.10	Nonlinear Fredholm Integral Equation.	78
5.11	Related Papers	79
	References	80
6	Evolution Equations	83
6.1	Problem Statement and Methods of Solution	83
6.2	Diffusion Equation	84
6.3	Burgers Equation	86
6.4	Sine-Gordon Equation.	88
6.5	Related Papers	93
	References	94
7	Solving PDEs with the Aid of Two-Dimensional Haar Wavelets	97
7.1	Problem Statement and Method of Solution.	97
7.2	Diffusion Equation	98
7.3	Poisson Equation	100
7.4	Related Papers	103
	References	104
8	Fractional Calculus	107
8.1	Introduction	107
8.2	About the Fractional Calculus	108
8.3	Fractional Volterra Integral Equation	109
8.4	Fractional Harmonic Vibrations	111
8.5	Fractional Fredholm Integral Equation	115
8.6	Haar Wavelet Operational Method for Solving Fractional ODEs.	117
8.7	Related Papers	120
	References	121

9	Applying Haar Wavelets in the Optimal Control Theory	123
9.1	Basic Elements of Optimal Control.	123
9.2	Method of Solution.	125
9.3	Optimal Control with an Integral Constraint	125
9.4	Optimal Control with a State Inequality Constraint.	128
9.5	Optimal Control with a Control Inequality Constraint.	130
9.6	Related Papers	133
	References	135
10	Buckling of Elastic Beams.	137
10.1	Problem Statement and Method of Solution.	137
10.2	Modelling Cracks	139
10.3	Beam on Intermediate Supports	141
10.4	Buckling of Cracked Beams.	142
10.5	Buckling of Beams of Variable Cross-Section	144
10.6	Buckling of Beams on Elastic Foundation	145
10.7	Related Papers	147
	References	148
11	Vibrations of Cracked Euler-Bernoulli Beams	151
11.1	Governing Equations.	151
11.2	Bending of Multi-cracked Beams	153
11.3	Free Vibrations of Beams with Singularities	154
11.4	Forced Vibrations of the Beam.	157
11.5	Related Papers	160
	References	163
12	Free Vibrations on Non-uniform and Axially Functionally Graded Euler-Bernoulli Beams	167
12.1	Governing Equations.	167
12.2	Beams with Non-uniform Cross-Section and Elastic End Constraints	170
12.3	Non-homogeneous Beams with Variable Flexural Rigidity, Mass Density and Elastic End Constraints	173
12.4	Non-homogeneous Beams with Variable Flexural Rigidity, Mass Density, Elastic End Constraints and Intermediate Rigid Support.	173
12.5	Related Papers	174
	References	175
13	Vibrations of Functionally Graded Timoshenko Beams	177
13.1	Governing Equations.	177
13.2	Numerical Examples.	182
13.3	Related Papers	185
	References	186

14 Applying Haar Wavelets in Damage Detection Using Machine Learning Methods	189
14.1 Dynamic Response of Vibrating Composite Beams with Multiple Delaminations	189
14.2 Modeling of the Artificial Neural Network (ANN) for Delamination Identification.	192
14.3 Numerical Examples	193
14.4 Related Papers	199
References	200
Concluding Remarks	203
Index	205

Haar Wavelets

With Applications

Lepik, Ü.; Hein, H.

2014, X, 207 p. 50 illus., Hardcover

ISBN: 978-3-319-04294-7
