|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Introduction.....</b>   | <b>1</b>  |
| <b>2</b> | <b>Antenna Design Using Electromagnetic Simulations .....</b>                              | <b>5</b>  |
| 2.1      | Antenna Design Task as an Optimization Problem.....  | 5         |
| 2.2      | Gradient-Based Optimization Methods .....  | 7         |
| 2.3      | Derivative-Free Optimization Methods .....   | 9         |
| 2.4      | Metaheuristics and Global Optimization .....   | 10        |
| 2.5      | Challenges of Conventional Optimization Toward Design<br>Using Surrogate Models .....      | 12        |
| <b>3</b> | <b>Surrogate-Based Optimization .....</b>  | <b>13</b> |
| 3.1      | Surrogate-Based Optimization Basics .....  | 13        |
| 3.2      | Surrogate Model Construction: Function Approximation<br>and Physics-Based Surrogates ..... | 15        |
| 3.2.1    | Approximation-Based Surrogate Models.....  | 16        |
| 3.2.2    | Physics-Based Surrogate Models.....  | 20        |
| 3.3      | Exploration Versus Exploitation .....  | 23        |
| <b>4</b> | <b>Methodologies for Variable-Fidelity Optimization<br/>of Antenna Structures.....</b>     | <b>25</b> |
| 4.1      | Antenna-Specific Challenges of Surrogate-Based Optimization .....                          | 25        |
| 4.2      | Space Mapping.....   | 26        |
| 4.2.1    | Space Mapping Concept .....  | 26        |
| 4.2.2    | Aggressive Space Mapping.....  | 27        |
| 4.2.3    | Parametric Space Mapping .....   | 28        |
| 4.2.4    | Space Mapping with Response<br>Surface Approximations.....                                 | 30        |
| 4.3      | Shape-Preserving Response Prediction.....  | 31        |
| 4.3.1    | SPRP Concept .....   | 31        |
| 4.3.2    | SPRP Formulation.....  | 32        |
| 4.3.3    | Illustration Example.....  | 33        |
| 4.3.4    | Practical Issues.....  | 34        |

|           |  |           |
|-----------|--|-----------|
| 4.4       | Adaptive Response Correction.....  | 35        |
| 4.5       | Manifold Mapping .....   | 37        |
| 4.6       | Adaptively Adjusted Design Specifications .....  | 39        |
| 4.7       | Multi-fidelity Design Optimization.....  | 41        |
| <b>5</b>  | <b>Low-Fidelity Antenna Models .....</b>   | <b>45</b> |
| 5.1       | Low-Fidelity Models in Simulation-Driven Optimization .....                              | 45        |
| 5.2       | Coarse-Discretization Antenna Models as a Basis<br>for Low-Fidelity Antenna Models ..... | 47        |
| 5.3       | Additional Simplifications of Low-Fidelity Antenna Models.....                           | 49        |
| 5.4       | Need for Automated Selection of Model Fidelity .....                                     | 52        |
| <b>6</b>  | <b>Simulation-Based UWB Antenna Design.....</b>  | <b>53</b> |
| 6.1       | UWB Monopole Matching with Manifold<br>Mapping and Kriging.....                          | 53        |
| 6.2       | UWB Dipole .....   | 55        |
| 6.3       | UWB Vivaldi Antenna .....  | 56        |
| 6.4       | Discussion .....   | 59        |
| <b>7</b>  | <b>Optimization of Dielectric Resonator Antennas .....</b>                               | <b>61</b> |
| 7.1       | DRA with a Substrate-Integrated Cavity .....   | 61        |
| 7.2       | Suspended Brick DRA.....   | 66        |
| 7.3       | Optimization of DRA for Two Installation Scenarios.....                                  | 68        |
| 7.4       | Conclusions.....   | 72        |
| <b>8</b>  | <b>Surrogate-Based Optimization of Microstrip<br/>Broadband Antennas .....</b>           | <b>73</b> |
| 8.1       | Wideband Microstrip Antenna .....  | 73        |
| 8.2       | Double-Ring Antenna .....  | 76        |
| 8.3       | Microstrip Antenna with U-Shape Parasitic Patches .....                                  | 79        |
| 8.4       | Conclusions.....   | 80        |
| <b>9</b>  | <b>Simulation-Driven Antenna Array Optimization .....</b>                                | <b>83</b> |
| 9.1       | 5×5 Antenna Array .....  | 83        |
| 9.2       | Optimization of a 7×7 Array Using Analytical<br>and Discrete Models .....                | 87        |
| 9.3       | Discussion and Conclusion .....  | 90        |
| <b>10</b> | <b>Antenna Optimization with Surrogates and Adjoint Sensitivities .....</b>              | <b>93</b> |
| 10.1      | Surrogate-Based Optimization with Adjoint Sensitivity.....                               | 94        |
| 10.1.1    | Generic Surrogate-Based Optimization Algorithm .....                                     | 94        |
| 10.1.2    | Robustness of the SBO Process.....   | 94        |
| 10.2      | SBO with First-Order Taylor Model and Trust Regions.....                                 | 95        |
| 10.2.1    | Planar Inverted-F Antenna (PIFA).....  | 96        |
| 10.2.2    | Wideband Hybrid Antenna .....  | 98        |
| 10.3      | SBO with Space Mapping and Manifold Mapping.....   | 99        |
| 10.3.1    | Surrogate Construction Using SM<br>and Sensitivity Data .....                            | 99        |

|           |  |            |
|-----------|--|------------|
| 10.3.2    | Surrogate Construction Using MM<br>and Sensitivity Data .....                                  | 100        |
| 10.3.3    | Fast Parameter Extraction and Surrogate<br>Model Optimization .....                            | 101        |
| 10.3.4    | UWB Monopole Optimization Using SM<br>and MM Surrogates .....                                  | 101        |
| 10.4      | SPRP with Adjoint Sensitivity .....  | 103        |
| 10.5      | Discussion and Conclusion .....  | 104        |
| <b>11</b> | <b>Simulation-Based Multi-objective Antenna Optimization<br/>with Surrogate Models .....</b>   | <b>105</b> |
| 11.1      | Multi-objective Antenna Design Using Surrogate Modeling<br>and Evolutionary Algorithms .....   | 106        |
| 11.1.1    | Multi-objective Antenna Design Problem .....   | 106        |
| 11.1.2    | Optimization Algorithm .....   | 106        |
| 11.2      | Application: A UWB Monopole .....  | 108        |
| 11.2.1    | UWB Monopole: Geometry and Problem Statement .....   | 108        |
| 11.2.2    | UWB Monopole: Results .....  | 108        |
| 11.3      | Application: A Planar Yagi Antenna .....   | 112        |
| 11.3.1    | Planar Yagi Antenna: Geometry, Models,<br>and Problem Statement .....                          | 112        |
| 11.3.2    | Planar Yagi Antenna: Surrogate Models .....  | 113        |
| 11.3.3    | Planar Yagi Antenna: Results .....   | 115        |
| 11.4      | Summary .....  | 115        |
| <b>12</b> | <b>Practical Aspects of Surrogate-Based Antenna Design:<br/>Selecting Model Fidelity .....</b> | <b>119</b> |
| 12.1      | Selecting Model Fidelity: Speed Versus<br>Accuracy Trade-Offs .....                            | 119        |
| 12.2      | Case Study 1: Design of Broadband Slot Antenna<br>Using Output Space Mapping .....             | 120        |
| 12.3      | Case Study 2: Model Management for Hybrid DRA .....  | 121        |
| 12.4      | Discussion and Recommendations .....   | 123        |
| <b>13</b> | <b>Discussion and Recommendations .....</b>  | <b>125</b> |
| 13.1      | SBO Methods Highlights .....   | 125        |
| 13.2      | Discussion and Recommendations .....   | 128        |
| 13.3      | Prospective Look .....   | 129        |
