|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Importance of Optimization Analysis</b>                                     | <b>1</b>  |
| 1.1      | Introduction   | 1         |
| 1.2      | Challenges Facing Water Management and Policy Professionals                    | 3         |
| 1.3      | Local, Regional, and International Competition for Water and Ensuing Conflicts | 4         |
| 1.4      | Urban and Agricultural Water Supply Challenges                                 | 7         |
| 1.5      | Global Climate Change Impacts on Integrated Regional Water Management          | 11        |
| 1.6      | The Incentive for this Book  | 12        |
|          | References   | 15        |
| <b>2</b> | <b>Linear Optimization</b>   | <b>17</b> |
| 2.1      | Linear Programming   | 17        |
| 2.2      | Graphical Method   | 19        |
| 2.3      | Simplex Method   | 22        |
| 2.3.1    | Optimization of Water Distribution Networks                                    | 35        |
| 2.3.2    | Optimization of One-Dimensional Confined Aquifers                              | 41        |
| 2.3.3    | Optimization of Two-Dimensional Confined Aquifers                              | 46        |
| 2.4      | Problems   | 51        |
|          | References   | 53        |
| <b>3</b> | <b>Nonlinear Optimization</b>  | <b>55</b> |
| 3.1      | Introduction   | 55        |
| 3.2      | One-Dimensional Search Methods   | 62        |
| 3.2.1    | Fibonacci Method (Elimination Technique)                                       | 64        |
| 3.2.2    | Golden Section Method (Elimination Technique)                                  | 72        |
| 3.2.3    | Newton Method (Approximation Technique)  | 76        |
| 3.3      | Unconstrained Optimization Methods   | 79        |
| 3.3.1    | Random Search Method   | 80        |
| 3.3.2    | Univariate Method  | 84        |
| 3.3.3    | Steepest Descent Method  | 89        |

|          |  |            |
|----------|--|------------|
| 3.4      | Constrained Optimization Methods. . . . .                          | 92         |
| 3.4.1    | Lagrange Multiplier Method . . . . .                               | 92         |
| 3.4.2    | Generalized Reduced Gradient Method. . . . .                       | 95         |
| 3.5      | Problems. . . . .  | 107        |
|          | References . . . . .   | 109        |
| <b>4</b> | <b>Multiobjective Optimization . . . . .</b>                       | <b>111</b> |
| 4.1      | Basic Concepts . . . . .   | 111        |
| 4.2      | Weighted Method . . . . .  | 114        |
| 4.2.1    | Optimization of Hydropower and Turbine. . . . .                    | 120        |
| 4.2.2    | Optimization of Broad-Crested Weirs. . . . .                       | 130        |
| 4.3      | $\varepsilon$ -Constraint Method. . . . .                          | 136        |
| 4.3.1    | Optimization of Marine Outfalls . . . . .                          | 140        |
| 4.4      | Problems. . . . .  | 146        |
|          | References . . . . .   | 147        |
