Contents

1 Flow Dynamics, Heat and Mass Transfer in Two-Phase Laminar and Turbulent Boundary Layer on a Flat Plate with and without Heat Transfer Between Solid Wall and Flow: The State-of-the-Art 1
1.1 Dusty Flow in a Laminar and Turbulent Boundary Layer 1
References 5

2 Laminar Mist Flows Over a Flat Plate with Evaporation 9
References 11

3 Flow and Heat and Mass Transfer in a Laminar Gas-Droplets Boundary Layer 13
3.1 Physical Model 13
3.2 The System of Governing Equations for Two-Phase Laminar Mixture 15
3.3 Boundary Conditions 17
3.4 Numerical Realization 17
3.5 Numerical Results and Discussion 18
3.6 Comparison with Experimental Results 24
References 28

4 Numerical Modeling of Flow and Heat Transfer in a Turbulent Gas-Droplets Boundary Layer 31
4.1 Eulerian Numerical Model for the Two-Phase Flow 31
4.2 Governing Equations for the Gas Phase 33
4.3 Two-Equations Turbulence Model 34
4.4 Dispersed Phase 35
4.5 Boundary Conditions 37
4.6 Numerical Procedure and Model Testing 39
4.7 Numerical Results and Discussions 40
References 48

5 Comparison with Experimental Data in a Flat Plate Turbulent Gas-Particles Boundary Layer 51
References 54

Conclusions 57
