

Contents

1	Mechanical Testing of Ceramics	1
1.1	Introduction.	1
1.2	Tension Test	3
1.2.1	Tension of Ductile Ceramics	10
1.2.2	Stress Tensor.	13
1.2.3	Stress on an Inclined Plane	14
1.2.4	Principal Stresses.	19
1.2.5	Plain Stress: Two-Dimensional Stress.	24
1.2.6	Mohr's Circle in Two Dimensions	30
1.2.7	Three-Dimensional Mohr's Circles.	36
1.2.8	Strain Tensor.	39
1.2.9	Generalized Hooke's Law	48
1.3	Poisson Ratio	53
1.4	Volume Strain (Dilatation)	61
1.5	Principal Strain	62
1.6	Thermal Strains	64
1.7	Relations Among Some Elastic Constants	66
1.8	Compression of Ceramics	72
1.9	Bend (Flexural) Tests of Ceramics	76
1.10	Hardness Tests in Ceramics.	83
1.10.1	Introduction.	83
1.10.2	Vickers Hardness Test (VHT)	84
1.10.3	The Knoop Hardness Test: Microhardness	91
1.11	Impact Testing of Ceramics.	95
1.12	Weibull Statistical Distribution	105
	References	111
2	Ductile Ceramics	113
2.1	Introduction.	113
2.1.1	Ceramics at Elevated Temperatures	114
2.1.2	Ductile Ceramics at Low or Ambient Temperatures.	139
2.1.3	Superplasticity in Ceramics	148

2.2	Ductility in Single Crystal Ceramics	164
2.3	Summary	171
	References	171
3	Imperfections (Defects) in Ceramics	173
3.1	Introduction.	173
3.2	Point Defects.	175
3.2.1	Schematic Illustration of Point Defects.	175
3.2.2	Thermodynamics of Vacancy Formation.	176
3.2.3	Strengthening (Hardening) in Ceramics by Point Defects.	180
3.2.4	Point Defects in Amorphous Ceramics and Their Strengthening (Effect).	186
3.3	Introduction to Dislocations.	193
3.3.1	Introduction.	193
3.3.2	Deformation or No Deformation in Crystals	196
3.3.3	The Theoretical Strength of Crystals	197
3.3.4	The Geometric Characterization of Dislocations	199
3.3.5	Producing Dislocations in an Elastic Body (Schematic).	204
3.3.6	The Motion of Dislocations.	206
3.3.7	The Energy of Dislocations.	213
3.3.8	Line Tension	220
3.3.9	The Stress Field of a Dislocation.	221
3.3.10	Forces Acting on Dislocations.	224
3.3.11	Forces Between Dislocations.	228
3.3.12	Intersection of Dislocations.	230
3.3.13	Dislocation Multiplication.	233
3.3.14	Partial Dislocations	236
3.3.15	Dislocation Pile-Ups.	244
3.3.16	Low- (Small)-Angle Grain Boundaries	246
3.3.17	Experimental Observations of Dislocations in Ceramics.	248
3.3.18	Section Summary.	276
	References	278
4	Deformation in Ceramics	281
4.1	Introduction.	281
4.2	Elastic Deformation	282
4.3	Plastic Deformation	283
4.3.1	Deformation at Low Temperatures.	284
4.3.2	Plastic Deformation at Elevated Temperatures.	287
4.4	The Critical Resolved Shear Stress (CRSS) in Ceramics.	293
4.5	Slip in Ceramics	301

4.6	Slip in Polycrystalline Ceramics	306
4.7	Twinning in Ceramics	312
4.7.1	Deformation (Mechanical) Twins	312
4.7.2	Annealing (Growth) Twins	316
4.7.3	Serrated Stress–Strain Curves	319
4.8	Yield Phenomena in Ceramics	322
4.8.1	Introduction	322
4.8.2	Sharp Yield	322
4.8.3	Strain Aging	324
4.8.4	Portevin–Le Chatelier (PLC) Effect	326
4.9	Deformation in Polycrystalline Ceramics	330
4.9.1	Introduction	330
4.9.2	Preferred Orientation (Texture)	330
4.9.3	Texture by Templating	331
4.9.4	Spark Plasma Sintering (SPS)	333
4.10	Grain Size	334
4.11	Closing Remarks	347
	Appendix	347
	References	349
5	The Strength and Strengthening of Ceramics	351
5.1	Introduction	351
5.2	Strain Hardening	352
5.2.1	Brittle Ceramics	354
5.2.2	Ductile Ceramics	354
5.2.3	Superplastic Ceramics	361
5.3	Solid Solution Strengthening	370
5.4	Second Phase Strengthening	379
5.4.1	Addition of a Ceramic Second Phase	380
5.4.2	Second Phase Formation During Some Stage of the Processing (Precipitation or Phase Transformation)	384
5.5	Transformation Hardening	390
5.6	Grain Boundaries and Grain-Size Strengthening	399
5.7	Concluding Remarks to this Chapter	414
	References	414
6	Time-Dependent Deformation: Creep	417
6.1	Introduction	417
6.2	Basic Concepts	419
6.3	Creep in Brittle Ceramics (Ductile at High Temperature Where Deformation is Possible)	424
6.3.1	Creep in Single Crystals	426
6.3.2	Creep in Polycrystalline Ceramics	429

6.4	Creep in RT Ductile Ceramics.	437
6.4.1	Single Crystal Ceramics	438
6.4.2	Polycrystalline Ceramics.	443
6.5	Superplastic Ceramics.	452
6.6	Mechanisms of Creep.	458
6.6.1	Nabarro-Herring Creep	460
6.6.2	Dislocation Creep and Climb.	466
6.6.3	Climb-Controlled Creep	466
6.6.4	Thermally-Activated Glide via Cross-Slip.	469
