

# Contents

<b>1</b>	<b>Toeplitz Matrices</b>	1
1.1	Introduction	1
1.2	Definitions and Notations	1
1.2.1	Classical Sequence Spaces	1
1.2.2	$\beta$ -Dual	3
1.2.3	Schauder Basis	3
1.2.4	Matrix Transformation	4
1.2.5	Continuous Dual	4
1.3	Conservative and Regular Matrices	5
1.4	Some Special Summability Matrices	9
<b>2</b>	<b>Lambert Summability and the Prime Number Theorem</b>	13
2.1	Introduction	13
2.2	Definitions and Notations	13
2.3	Lemmas	15
2.4	The Prime Number Theorem	22
<b>3</b>	<b>Summability Tests for Singular Points</b>	23
3.1	Introduction	23
3.2	Definitions and Notations	23
3.3	Tests for Singular Points	24
<b>4</b>	<b>Lototski Summability and Analytic Continuation</b>	31
4.1	Introduction	31
4.2	Definitions and Notations	32
4.3	Main Results	34
<b>5</b>	<b>Summability Methods for Random Variables</b>	41
5.1	Introduction	41
5.2	Definitions and Notations	41
5.3	A-Summability of a Sequence of Random Variables	43
5.4	Strong Law of Large Numbers	50

<b>6</b>	<b>Almost Summability</b> .....	53
6.1	Introduction .....	53
6.2	Definitions and Notations .....	53
6.3	Almost Conservative and Almost Regular Matrices .....	55
6.4	Almost Coercive Matrices .....	58
<b>7</b>	<b>Almost Summability of Taylor Series</b> .....	61
7.1	Introduction .....	61
7.2	Geometric Series .....	61
7.3	Taylor Series .....	64
<b>8</b>	<b>Matrix Summability of Fourier and Walsh-Fourier Series</b> .....	67
8.1	Introduction .....	67
8.2	Summability of Fourier Series .....	67
8.3	Summability of Walsh-Fourier Series .....	71
<b>9</b>	<b>Almost Convergence in Approximation Process</b> .....	75
9.1	Introduction .....	75
9.2	Korovkin Approximation Theorems .....	75
9.3	Korovkin Approximation Theorems for Almost Convergence .....	76
<b>10</b>	<b>Statistical Summability</b> .....	83
10.1	Introduction .....	83
10.2	Definitions and Notations .....	83
10.3	Results on Statistical Convergence .....	85
10.4	Strong Cesàro Summability .....	88
10.5	Application to Fourier Series .....	89
10.6	$A$ -Statistical Convergence .....	91
10.7	Statistical $A$ -Summability .....	92
<b>11</b>	<b>Statistical Approximation</b> .....	97
11.1	Introduction .....	97
11.2	Application of Statistical Summability $(C, 1)$ .....	97
11.3	Application of Statistical $A$ -Summability .....	102
11.4	Rate of Statistical $A$ -Summability .....	108
<b>12</b>	<b>Applications to Fixed Point Theorems</b> .....	111
12.1	Introduction .....	111
12.2	Definitions and Notations .....	111
12.3	Iterations of Regular Matrices .....	112
12.4	Nonlinear Ergodic Theorems .....	117
	<b>Bibliography</b> .....	119
	<b>Index</b> .....	123
