

# Contents

## Part I Decision Making and Decision Support (in Transportation)

<b>A Decision Support Tool for Evaluating Maintenance Strategies on Roads Networks with Incomplete Data . . . . .</b>	<b>3</b>
Pierre Hankach and Philippe Lepert	

<b>Models for Train Load Planning Problems in a Container Terminal . . . . .</b>	<b>15</b>
Daniela Ambrosino and Silvia Siri	

<b>Application of a Rule-Based Decision Support System for Improving Energy Efficiency of Passive Temperature-Controlled Transports . . . .</b>	<b>27</b>
Hans-Dietrich Haasis, Hendrik Wildebrand, Andreas Barz, Guido Kille, Anna Kolmykova, Lydia Schwarz and Axel Wunsch	

<b>An Eco-Traffic Management Tool . . . . .</b>	<b>41</b>
Jorge M. Bandeira, Sérgio R. Pereira, Tânia Fontes, Paulo Fernandes, Asad J. Khattak and Margarida C. Coelho	

<b>Evaluating Changes in the Operational Planning of Public Transportation . . . . .</b>	<b>57</b>
João Mendes-Moreira and Jorge Freire de Sousa	

## Part II Energy and Environmental Impacts (of Transportation)

<b>A Service Station Location Model to Explore Prospects and Policies for Alternative Transport Fuels: A Case of CNG Distribution in Italy. . . . .</b>	<b>71</b>
Damiana Chinese, Piera Patrizio and Monica Bonotto	

<b>Electric Vehicles Charging Network Planning . . . . .</b>	<b>85</b>
Joana Cavadas, Gonalo Correia and Joo Gouveia	
<b>Charging-Stations for Electrical Vehicles: Analysis and Model to Identify the Most Convenient Locations . . . . .</b>	<b>101</b>
Diego-Alejandro Gim�nez, Anabela Ribeiro, Javier Guti�rrez-Puebla and Antonio Pais-Antunes	
<b>A Joint Probability Density Function for Reducing the Uncertainty of Marginal Social Cost of Carbon Evaluation in Transport Planning . . . . .</b>	<b>113</b>
Silvio Nocera and Stefania Tonin	
<b>An Environmental Approach to Optimize Urban Freight Transport Systems. . . . .</b>	<b>127</b>
Juan P. Romero, Juan Benavente, Jose L. Moura, Angel Ibeas and Borja Alonso	
 <b>Part III (Urban) Network Design</b>	
<b>A Road Network Design Model for Large-Scale Urban Network. . . . .</b>	<b>139</b>
Ernesto Cipriani, Andrea Gemma and Marialisa Nigro	
<b>A Method for Topological Transit Network Design in Urban Area . . . . .</b>	<b>151</b>
Antonio Polimeni and Antonino Vitetta	
<b>Determining On-Street Parking Places in Urban Road Networks Using Meta-Heuristic Harmony Search Algorithm . . . . .</b>	<b>163</b>
Huseyin Ceylan, Ozgur Baskan, Cenk Ozan and Gorkem Gulhan	
 <b>Part IV Optimization and Simulation (in Transportation)</b>	
<b>Global Optimisation of Signal Settings: Meta-Heuristic Algorithms for Solving Real-Scale Problems . . . . .</b>	<b>177</b>
Mariano Gallo, Luca D’Acierno and Bruno Montella	
<b>Bid-Price Heuristics for Unrestricted Fare Structures in Cargo Revenue Management . . . . .</b>	<b>195</b>
Lorenzo Castelli, Raffaele Pesenti and Desir�e Rigonat	

<b>A Rail Network Optimization Model Designed for Freight Traffic. . . .</b>	<b>209</b>
Luís Couto Maia and António Fidalgo do Couto	

<b>An Integrated Approach for the Design of Demand Responsive Transportation Services . . . . .</b>	<b>223</b>
Rui Gomes, Jorge Pinho de Sousa and Teresa Galvão	

<b>Simulation of Crowd Dynamics in Panic Situations Using a Fuzzy Logic-Based Behavioural Model . . . . .</b>	<b>237</b>
Mauro Dell’Orco, Mario Marinelli and Michele Ottomanelli	

<b>Bilevel O/D Matrix Adjustment Formulation Using High Convergence Assignment Methods . . . . .</b>	<b>251</b>
A. Reyes, L. M. Romero and F. G. Benitez	

## **Part V Traffic Modelling, Control and Network Traffic Management**

<b>Comparison of Importance Indices for Highway Network Reliability Improvement Combined with Cost–Benefit Analysis. . . . .</b>	<b>265</b>
Hiroshi Wakabayashi and Shuming Fang	

<b>Fuzzy Logic Models of Gap-Acceptance Behavior at Roundabouts . . .</b>	<b>281</b>
Riccardo Rossi, Massimiliano Gastaldi, Gregorio Gecchele and Claudio Meneguzzer	

<b>The Influence of the Volume–Delay Function on Uncertainty Assessment for a Four-Step Model. . . . .</b>	<b>293</b>
Olga Petrik, Filipe Moura and João de Abreu e Silva	

<b>Hybrid Calibration of Microscopic Simulation Models . . . . .</b>	<b>307</b>
Luís Vasconcelos, Álvaro Seco and Ana Bastos Silva	

<b>Signal Setting Design at a Single Junction Through the Application of Genetic Algorithms . . . . .</b>	<b>321</b>
Giulio Erberto Cantarella, Stefano de Luca, Roberta Di Pace and Silvio Memoli	

## Part VI Transportation Planning

<b>Testing a Heuristic for a Flexible Transport System . . . . .</b>	<b>335</b>
Pasquale Carotenuto and Leonardo Paradisi	

<b>Rescheduling Railway Timetables in Presence of Passenger Transfers Between Lines Within a Transportation Network . . . . .</b>	<b>347</b>
Juan A. Mesa, Francisco A. Ortega, Miguel A. Pozo and Justo Puerto	

<b>The Fuzzy System Sensitivity Analysis: An Example of Air Travel Demand Models . . . . .</b>	<b>361</b>
Milica Kalić, Slavica Dožić and Jovana Kuljanin	

<b>Stochastic User Equilibrium and Analysis of Users' Benefits . . . . .</b>	<b>375</b>
Claudia Castaldi, Paolo Delle Site, Francesco Filippi and Marco Valerio Salucci	

## Part VII Mobility, Accessibility and Travel Behavior

<b>Modelling Daily Mobility Satisfaction Using a Structural Equation Model . . . . .</b>	<b>391</b>
Tomás Eiró and Luis M. Martínez	

<b>Advanced Trip Planners for Transit Networks: Some Theoretical and Experimental Aspects of Pre-Trip Path Choice Modeling . . . . .</b>	<b>405</b>
Agostino Nuzzolo, Umberto Crisalli, Antonio Comi and Luca Rosati	

<b>Sensing Bluetooth Mobility Data: Potentials and Applications . . . . .</b>	<b>419</b>
João Filgueiras, Rosaldo J. F. Rossetti, Zafeiris Kokkinogenis, Michel Ferreira, Cristina Olaverri-Monreal, Marco Paiva, João Manuel R. S. Tavares and Joaquim Gabriel	

<b>The Driver Behaviour Questionnaire: An Investigation Study Applied to Chinese Drivers . . . . .</b>	<b>433</b>
Jie Li, Henk van Zuylen and Elisabeth van der Horst	

## Part VIII Vehicle Routing

<b>Solving Non-smooth Arc Routing Problems Throughout Biased-Randomized Heuristics . . . . .</b>	<b>451</b>
Sergio Gonzalez-Martin, Albert Ferrer, Angel A. Juan and Daniel Riera	

<b>A Hybrid Algorithm for Solving the General Vehicle Routing Problem in the Case of the Urban Freight Distribution . . . . .</b>	<b>463</b>
Juan-Antonio Sicilia, David Escuín, Beatriz Royo, Emilio Larrodé and Jesús Medrano	
<b>A Parallel Matheuristic for Solving the Vehicle Routing Problems . . .</b>	<b>477</b>
Umman Mahir Yıldırım and Bülent Çatay	

Computer-based Modelling and Optimization in  
Transportation

Freire de Sousa, J.; Rossi, R. (Eds.)

2014, XI, 489 p. 135 illus., 13 illus. in color., Softcover
