

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Multiple Input Multiple Output System	1
1.2	Cognitive Radio Network	2
1.3	Energy Harvest Technology	2
1.4	Water-Filling Algorithm	2
	References	3
<b>2</b>	<b>Geometric Water-Filling in RRM</b>	5
2.1	Problem Statement and Water-Filling	5
2.2	Proposed Geometric Water-Filling Approach	6
2.3	Generalize to Weighted Case	8
2.4	Weighted Water-Filling with Individual Peak Power Constraints	12
2.5	Complexity Analysis	13
	References	14
<b>3</b>	<b>RRM in MIMO System</b>	15
3.1	Model of the Single User MIMO Channel	15
3.1.1	Channel Capacity of the Single User MIMO Channel	16
3.1.2	Simplification of the Problem of the Optimal Power Allocation	17
3.1.3	Optimality and Complexity	19
3.2	Multi-user MIMO Channels	21
3.3	Efficient RRM of the Multi-user MIMO MAC Channels	23
3.3.1	Models for the MIMO MAC and Its Sum Capacities	24
3.3.2	Optimality of Power Allocation Algorithm: IGWF-MAC	29
3.4	Efficient RRM of the Multi-user MIMO BC Channels	31
3.4.1	Models for the MIMO BC and Its Sum Capacities	31
3.4.2	Optimality of Power Allocation Algorithm: IGWF-BC	35

3.5	Numerical Examples for RRM in MIMO System .....	37
3.5.1	Examples for RRM in MIMO MAC Wireless Communications .....	38
3.5.2	Examples for RRM in MIMO BC Wireless Communications .....	39
	References .....	43
<b>4</b>	<b>RRM for Cognitive Network</b> .....	<b>45</b>
4.1	Introduction .....	45
4.2	SIMO-MAC in Cognitive Radio Network and Its Weighted Sum-Rate .....	48
4.3	Algorithm IGWF-WCR .....	50
4.3.1	Preparation of IGWF-WCR .....	51
4.3.2	Algorithm IGWF-WCR and Its Implementation .....	55
4.4	Optimality of the Proposed Algorithm .....	56
4.5	Numerical Examples for RRM in Cognitive Radio Network .....	60
	References .....	61
<b>5</b>	<b>RRM in Wireless Communications with Energy Harvest Technology</b> .....	<b>63</b>
5.1	Introduction .....	63
5.2	Extended GWF for Transmission with Energy Harvest .....	65
5.3	Maximizing Throughput in Fading Channel and Algorithm RGWF.....	68
5.3.1	Problem Statement and Conventional Approach .....	68
5.3.2	Recursive Geometric Water-Filling and Its Optimality.....	69
5.4	Numerical Examples for RRM with Energy Harvest Transmission .....	72
	References .....	73
<b>Appendix A</b>	.....	<b>75</b>
A.1	Appendix-I: Complex Gaussian Random Vectors .....	75
A.2	Appendix-II: Maximum of Entropy .....	78
A.3	Appendix-III: Proofs of the Lemmas in Sect. 3.1.3 .....	85
	References .....	87

Radio Resource Management Using Geometric  
Water-Filling

He, P.; Zhao, L.; Zhou, S.; Niu, Z.

2014, XI, 87 p. 18 illus., 10 illus. in color., Softcover

ISBN: 978-3-319-04635-8
