Part I On the Meaning of Probability

1	Interpretations of Probability	3
1.1	Variety of Theories	4
1.2	Pluralists	6
	References	8
2	A Mathematical Approach to the Interpretation Problem	9
2.1	Why I am a Pluralist	9
2.2	Guidelines	10
2.3	An Analytical Approach	11
2.3.1	Theorem of Large Numbers (Strong)	11
2.3.2	Theorem of a Single Number	12
2.4	Two Remarks on Mathematics and Science	12
2.4.1	Physical Mapping	12
2.4.2	Division of Labor	16
2.5	Different Arguments, Different Probabilities	17
	References	21
3	Probability Validation	23
3.1	A Parameter that Cannot be Validated Does Not Exist	23
3.2	Theoretical Proof and Empirical Validation	24
3.3	From Controllability to Realism	25
3.3.1	Statistics of Long-Term Events	26
3.4	From Uncontrollability to Unrealism	27
3.4.1	Statistics of Single Events	30
3.5	Sorry Science	31
3.5.1	Severe Constraint	32
3.5.2	Opponents to Unrealism	32
3.5.3	Things are No Longer the Same	34
3.6	Closing Remarks	35
	References	36

4	About the Compatibility of the Diverging Interpretations	39
4.1	Not Contradictory Approaches	39
4.2	Method of Working	40
4.2.1	Lemma of Obligatory Subjectivism.	40
4.2.2	Mutually Exclusive Tactics	41
	References	44
5	Criticism on the Philosophical Pollution	45
5.1	Analytical Assumptions	45
5.2	Separation of Areas	46
5.3	Inclusiveness	46
5.4	Terms of Comparison	47
5.5	Moderated Debates	50
5.5.1	Death of Dogmatism.	50
5.5.2	Empirical Problem Solving	52
5.6	Open Doors	54
	References	55
 Part II Considerations Around the Probability Axiomatization		
6	Some Remarks on the Argument of Probability.	59
6.1	Abstract Axioms.	59
6.2	System Modeling	60
6.2.1	DFDs	61
6.2.2	ERD	62
6.3	A Negligible Topic?	62
6.3.1	Famous Correspondence	63
6.3.2	Pascal's Conjecture.	63
	References	66
7	Classical Modeling of the Probability Argument	69
7.1	Subset	69
7.2	Sentence	71
7.3	Precise and Generic Arguments	73
	References	76
8	Structural Modeling of the Probability Argument	77
8.1	Structural Model.	77
8.1.1	Graph Model	78
8.1.2	Algebraic Model.	78
8.1.3	Use of the Structural Model.	80
8.2	Compound Structures	81
8.2.1	Meta-Relationships	81
8.2.2	Basic Structural Forms	83

8.3	Structure of Levels	85
8.3.1	A Case	87
	References	88
9	Some Topics on Probability and Structural Models	91
9.1	Demanding Structural Analysis	91
9.2	Illustration of Events.	92
9.2.1	Complete Structure	93
9.2.2	Incomplete Structure	94
9.2.3	Ignorance, Uncertainty and Perfect Knowledge	95
9.2.4	Structures and Probability	96
9.3	In Search of a Precise Argument	97
9.3.1	Experiments.	97
9.3.2	Classical Definition	98
9.3.3	Definitional Arguments of Probability.	99
9.3.4	Useful Arguments of Probability	100
	References	102
10	Exploring into the Essence of Events.	103
10.1	The Core	104
10.1.1	Equivocal Description	104
10.1.2	More or Less Steady.	106
10.1.3	Multiplication Law	108
10.1.4	Addition Law.	109
10.2	About Event's Outcome	110
10.3	Final Remark	111
	References	112
	Appendix A: Interpretations of Probability—An Outline	113
	Appendix B: Pluralist Works—A Partial Bibliography.	135
	Appendix C: Law of Large Numbers—A Proof	139
	Index	145

Janus-Faced Probability

Rocchi, P.

2014, XIII, 147 p. 26 illus., Hardcover
