1	Holographic Liquid Crystals for Nanophotonics	1
	Timothy D. Wilkinson, Haider Butt and Yunuen Montelongo	
1.1	Introduction	2
1.2	Computer Generated Holography	3
1.2.1	Diffraction Through an Aperture	3
1.2.2	Calculating Computer Generated Holograms	8
1.3	Carbon Nanotubes	11
1.4	The Optics of Nematic Liquid Crystals	12
1.5	Carbon Nanotube Plasmonic Devices	14
1.6	Quasi Crystalline Diffraction from Nanotube Arrays	17
1.7	CNT Based CGH Holograms	21
1.8	Nanophotonic Antennas	25
1.9	Conclusions and Discussion	32
	References	33
2	Directing 3D Topological Defects in Smectic Liquid Crystals and Their Applications as an Emerging Class of Building Blocks	35
	Apiradee Honglawan and Shu Yang	
2.1	Introduction	35
2.2	Engineering Focal Conic Domain Structure Through Confinement	39
2.2.1	Confinement: Chemically Patterned Surfaces	40
2.2.2	Confinement: Topographical Surfaces	42
2.2.3	3D Confinement of Focal Conic Domains	43
2.2.4	Generation of Focal Conic Domains with Non-zero Eccentricity in Thin Films	50
2.3	Applications of Focal Conic Domain Arrays	55
2.4	Conclusions and Perspective	61
2.4.1	Complex Templates	64
2.4.2	Directed Assemblies from Other LC Phases	64
2.4.3	Templating Nanomaterials and Other Applications of SmA LCs	64
	References	65

3	Liquid Crystalline 1D and 2D Carbon Materials	69
	Hari Krishna Bisoyi, Sandeep Kumar and Quan Li	
3.1	Introduction	69
3.2	Carbon Nanotube Based LCs	71
3.2.1	Acid Functionalized CNTs.	73
3.2.2	Protonated CNTs	74
3.2.3	Biopolymer Functionalized CNTs.	74
3.2.4	Polymer Functionalized CNTs	77
3.2.5	Other Methods of Fabricating Liquid Crystalline Phase of CNTs	79
3.3	Graphene Based LCs	81
3.3.1	Protonated Graphenes	83
3.3.2	Graphene Oxide Based LCs.	83
3.3.3	Reduced Graphene Oxide Based LCs	89
3.3.4	Thermotropic LCs of Synthetic Nanographenes	91
3.4	Conclusions and Outlook.	91
	References	93
4	Liquid Crystal-Gold Nanoparticle Hybrid Materials	101
	Chenming Xue and Quan Li	
4.1	Introduction	101
4.2	Fundamentals of LCs and GNPs.	103
4.3	LC/GNP Hybrid Materials.	106
4.3.1	Overview.	106
4.3.2	Rod-Like Mesogen Coated GNPs.	108
4.3.3	Bent-Core Mesogen Coated GNPs	113
4.3.4	Mesogenic Dendron Coated GNPs	113
4.3.5	Disc-Like Mesogen Coated Gold Nanoparticles	116
4.3.6	Hybrid Gold Nanorods	118
4.4	Applications.	123
4.5	Conclusions	126
	References	128
5	Photoresponsive Chiral Liquid Crystal Materials: From 1D Helical Superstructures to 3D Periodic Cubic Lattices and Beyond	135
	Yannian Li and Quan Li	
5.1	Introduction	136
5.2	Chiral Liquid Crystals.	136
5.2.1	Chiral Nematic Phase	137
5.2.2	Chiral Smectic C Phase.	138
5.2.3	Blue Phase.	140
5.3	Photoresponsive Chiral LCs.	140

5.4	Photoresponsive Cholesteric LCs	143
5.4.1	Azobenzene-Based CLCs	143
5.4.2	Overcrowded Alkene-Based CLCs	153
5.4.3	Diarylethene-Based CLCs	156
5.4.4	Other CLC Systems Based on Photochromic Molecules	159
5.5	Photoresponsive Chiral Smectic LCs	160
5.6	Photoresponsive Blue Phase LCs	164
5.7	Conclusions and Outlook	169
	References	170
6	Glassy Liquid Crystals as Self-Organized Films for Robust Optoelectronic Devices	179
	H.-M. Philp Chen, Jane J. Ou and Shaw H. Chen	
6.1	Concept and Relevance of Glassy Liquid Crystals	180
6.2	Prior Empirical Approaches to GLCs	181
6.3	Modular Approaches to GLCs	181
6.4	Optical Properties of Cholesteric LC Films	185
6.5	Synthesis of Core-Pendant Cholesteric GLCs	185
6.5.1	Statistical Synthesis	186
6.5.2	Deterministic Synthesis	186
6.6	Hairy Rods for Preparation of Conjugated GLC Films	188
6.7	Optoelectronic Devices Utilizing GLCs	188
6.7.1	Circular Polarizers, Optical Notch Filters and Reflectors	189
6.7.2	Modulating Circular Polarization and Reflective Coloration	189
6.7.3	Circularly Polarized Fluorescence	192
6.7.4	Photoswitchable Nematic GLC Film	193
6.7.5	Photoswitchable Cholesteric GLC Film	194
6.7.6	Linearly Polarized Fluorescent Organic Light-Emitting Diodes	195
6.7.7	Linearly Polarized Phosphorescent Organic Light-Emitting Diodes	198
6.7.8	Circularly Polarized Fluorescent Organic Light-Emitting Diodes	199
6.7.9	Cholesteric GLC Film as Robust Solid-State Laser	200
6.7.10	Spatially Resolved Lasing from a Cholesteric GLC Film	202
6.8	Solvent-Vapor Annealing of Conjugated Oligomers	203
6.9	Conclusions	204
	References	206

7	Directing Self-Organized Columnar Nanostructures of Discotic Liquid Crystals for Device Applications	209
	Hari Krishna Bisoyi and Quan Li	
7.1	Introduction	209
7.2	Homeotropic Columnar Orientation	213
7.2.1	Thermal Alignment Method	214
7.2.2	Chemical Structure Modification	218
7.2.3	Surface Modification of Substrates	221
7.2.4	Electric Field	223
7.2.5	Infrared Irradiation	224
7.2.6	Other Methods	226
7.3	Homogeneous (Planar) Columnar Orientation	228
7.3.1	Mechanical Shearing	228
7.3.2	Magnetic Field	230
7.3.3	Polytetrafluoroethylene Alignment Layer	232
7.3.4	Langmuir-Blodgett Technique	233
7.3.5	Zone Casting	237
7.3.6	Zone Melting	238
7.3.7	Other Methods	239
7.4	Alignment of DLCs in Micro- and Nanopores and Channels	241
7.5	Conclusions and Outlook	245
	References	246
8	Discotic Liquid Crystalline Blends for Nano-Structure Formation Toward Bulk Heterojunction Active Layer in Organic Photovoltaics	257
	Yo Shimizu	
8.1	Introduction	257
8.2	Miscibility and Phase Separation in Liquid Crystals	260
8.3	Liquid Crystalline Blends Toward Semiconductors	263
8.4	Liquid Crystalline Blends in Organic Photovoltaics	268
8.5	Summary	275
	References	276
9	Ion-Based Liquid Crystals: From Well-Defined Self-Organized Nanostructures to Applications	281
	Hiromitsu Maeda	
9.1	Introduction	281
9.2	Solid-State Ion-Based Assembled Structures	283
9.3	Thermotropic Liquid Crystals Based on Planar Receptor–Anion Complexes and Appropriate Cations	285

9.4	Thermotropic Liquid Crystals Based on Planar Ion Pairs.	294
9.5	Summary.	296
	References	296
10	Nanotechnology and Nanomaterials in Photodeformable	
	Liquid Crystalline Polymers	301
	Li Yu, Haifeng Yu and Quan Li	
10.1	Introduction	301
10.2	Mechanism of Photoinduced Deformation in LCPs.	302
10.3	Application of Nanotechnology and Nanomaterials in Photo-Driven Actuators of LCPs	303
	10.3.1 Template for Alignment of Mesogens.	304
	10.3.2 Nanomaterials for Wavelength Regulation.	307
10.4	Soft Actuators Based on Nanomaterials Functionalized LCPs	310
	10.4.1 Optically Controlled Switching	311
	10.4.2 IR-Triggered Artificial Arm.	312
	10.4.3 Inchworm Walker Devices.	313
10.5	Conclusions and Outlook.	314
	References	315
11	Self-Assembled Liquid Crystalline Conjugated Polymers: Synthesis, Development, and Their Advanced	
	Electro-Optical Properties	319
	Benedict A. San Jose and Kazuo Akagi	
11.1	Introduction	319
11.2	Hierarchical Self-assembly of Liquid Crystalline Conjugated Polymers	321
	11.2.1 Whisker Morphology Consisting of Hierarchically Self-assembled Polymer Helices.	322
	11.2.2 Macroscopic Alignment of the Self-assembled Polymer Helix by a Magnetic Field	324
11.3	Helical π -Stacked Self-assemblies of Liquid Crystalline Conjugated Polymers Showing Circularly Polarized Luminescence with High Dissymmetry Factors	329
	11.3.1 Lyotropic Di-substituted Polyacetylenes that Exhibit High Dissymmetry Factors in Circularly Polarized Luminescence Through the Chiral Nematic Liquid Crystal Phase.	330
	11.3.2 Helically π -Stacked Thiophene-based Copolymers that Exhibit RGB and White Circularly Polarized Luminescence	334

11.4	Dynamic Switching Functionalities of Liquid Crystalline Conjugated Polymers	338
11.4.1	Ferroelectric Liquid Crystalline Poly(meta-phenylene)	339
11.4.2	Dynamic Switching of Linearly and Circularly Polarized Luminescence of Liquid Crystalline Photoresponsive Conjugated Polymers . . .	343
11.5	Summary	349
	References	350
12	Solubilization and Delivery of Drugs from GMO-Based Lyotropic Liquid Crystals	355
	Nissim Garti, Dima Libster and Abraham Aserin	
12.1	Characterization and Structural Considerations	356
12.1.1	Introduction	356
12.1.2	The Amphiphiles	357
12.1.3	Cubic Phases	358
12.1.4	The Reverse Hexagonal Mesophase	359
12.1.5	The Lamellar Mesophase	360
12.1.6	Phase Behavior	361
12.1.7	H _{II} Mesophase Composed of GMO/Triglyceride/Water as Drug Delivery Systems	363
12.1.8	Molecular Interactions of LLCs with Proteins and Nucleotides	367
12.1.9	Solubilization and Delivery of Biomacromolecules . . .	371
12.2	LLC as Drug Delivery Vehicles	375
12.2.1	Monoolein and Phytantriol: Main Building Blocks of Lipids Mesophases	378
12.2.2	Hexagonal and Cubic Mesophases and Their Dispersions as Carriers of Hydrophilic Drugs Cubosomes, Hexosomes and Micellosomes	378
12.2.3	Oral Administration Using LLC	379
12.2.4	Transdermal Delivery from LLC	381
12.2.5	Delivery of Lipophilic Drugs from LLC Systems . . .	383
12.2.6	Administration of an Amphiphilic Drug	392
12.2.7	Release of Proteins as Drugs	393
12.2.8	Specific Utilization of Penetration Enhancers for Delivery of Hydrophilic Drugs from LLC	399
12.2.9	Probable Mechanisms of Delivery	407
12.3	Conclusions	408
