Contents

1 Introduction 1
1.1 Introduction 1
1.2 Outline 4
References 5

2 Recent Advances in Wireless Communications 7
2.1 OFDM/OFDMA Preliminary 7
2.1.1 OFDM Basis 7
2.1.2 OFDMA Basis 9
2.2 PHY-Layer Assist Communication Paradigms 10
2.3 Review of Classic Problems in Wireless Networks 10
2.3.1 Coordination Approaches for Wireless Communications 11
2.3.2 Multichannel Allocation Problem 11
2.3.3 Hidden and Exposed Terminal Problems 12
References 13

3 Attachment Transmission 17
3.1 Overview and Design Challenges 17
3.2 Attachment Modulation and Demodulation 18
3.2.1 Attachment Modulation 18
3.3 Attachment Demodulation 19
3.4 Attachment Cancelation and Data Recovery 20
3.5 Theoretical Analysis 21
3.5.1 Reliability of Data Transmission 22
3.5.2 Feasibility of Attachment Transmission 23
3.6 Performance Evaluation 24
3.6.1 System Implementation 24
3.6.2 Reliability of Data Transmission 25
3.6.3 Feasibility of Attachment Transmission 27
References 28

4 Applications to Classic Problems 29
4.1 Harmless Attachment for Multiple Access in WLANs 29
4.1.1 Harmless Attachment Overview 30
4.1.2 System Architecture 30
4.1.3 Points of Discussion 31
4.1.4 Performance Evaluation 32
4.2 Attachment Learning for Multichannel Allocation 34
4.2.1 Attachment Learning Overview 35
4.2.2 Resource Allocation Game 36
4.2.3 System Architecture 40
4.2.4 Performance Evaluation 43
4.3 Attachment Sense for Hidden and Exposed Terminals 46
4.3.1 Attachment Sense Overview 47
4.3.2 Attachment Format 48
4.3.3 System Architecture 49
4.3.4 Points of Discussion 50
4.3.5 Performance Evaluation 51
4.4 Performance Evaluation for Variable Bit-Rates 55
References 56

5 Conclusion and Future Work 59
5.1 Conclusion 59
5.2 More Opportunities in Attachment Transmission 60
5.2.1 Attachment Transmission for QoS Control 60
5.2.2 Attachment Transmission for Coordination in CRNs 60
References 61
