

Contents

1	Techno-Economic Analysis of Second-Generation Ethanol in Brazil: Competitive, Complementary Aspects with First-Generation Ethanol	1
	Anuj Kumar Chandel, Tassia Lopes Junqueira, Edvaldo Rodrigo Morais, Vera Lucia Reis Gouveia, Otavio Cavalett, Elmer Ccopa Rivera, Victor Coelho Geraldo, Antonio Bonomi and Silvio Silvério da Silva	
2	An Assessment of Brazilian Government Initiatives and Policies for the Promotion of Biofuels Through Research, Commercialization, and Private Investment Support	31
	Luís Augusto Barbosa Cortez, Gláucia Mendes Souza, Carlos Henrique de Brito Cruz and Rubens Maciel	
3	Renewable Liquid Transportation Fuels: The Cornerstone of the Success of Brazilian Bioenergy Program	61
	Veronica de Araujo Bruno and Adilson Roberto Gonçalves	
4	Socio-Economic and Ambient Impacts of Sugarcane Expansion in Brazil: Effects of the Second Generation Ethanol Production	69
	André Luis Squarize Chagas	
5	Integrated Production of 1G–2G Bioethanol and Bioelectricity from Sugarcane: Impact of Bagasse Pretreatment Processes	85
	Caliane Bastos Borba Costa, Felipe Fernando Furlan, Antonio José Gonçalves Cruz, Raquel de Lima Camargo Giordano and Roberto de Campos Giordano	
6	Potential Biomass Resources for Cellulosic Ethanol Production in Brazil: Availability, Feedstock Analysis, Feedstock Composition, and Conversion Yields	97
	Boutros F. Sarrouh, Júlio C. dos Santos, Mário Antônio A. Cunha and Ricardo F. Branco	

7	Advances in Methods to Improve the Sugarcane Crop as “Energy Cane” for Biorefinery: An Appraisal.	125
	Francis Julio Fagundes Lopes and Viviane Guzzo de Carli Poelkin	
8	The Essential Role of Plant Cell Wall Degrading Enzymes in the Success of Biorefineries: Current Status and Future Challenges	151
	Marcos Henrique Luciano Silveira, Matti Siika-aho, Kristiina Kruus, Leyanis Mesa Garriga and Luiz Pereira Ramos	
9	Mapping of Cell Wall Components in Lignified Biomass as a Tool to Understand Recalcitrance	173
	André Ferraz, Thales H. F. Costa, Germano Siqueira and Adriane M. F. Milagres	
10	Dilute Acid Pretreatment and Enzymatic Hydrolysis of Sugarcane Bagasse for Ethanol Production	203
	Paula J. Esteves, Celso Santi Jr. and Walter Carvalho	
11	Scale-up Pretreatment Studies on Sugarcane Bagasse and Straw for Second-Generation Ethanol Production.	225
	George Jackson de Moraes Rocha, Viviane Marcos Nascimento, Vinicius Fernandes Nunes da Silva and Anuj Kumar Chandel	
12	Novel Yeast Strains from Brazilian Biodiversity: Biotechnological Applications in Lignocellulose Conversion into Biofuels.	255
	Raquel Miranda Cadete, César Fonseca and Carlos Augusto Rosa	
13	Trends in Biodiesel Production: Present Status and Future Directions.	281
	Victor H. Perez, Euripedes G. Silveira Junior, Diana C. Cubides, Geraldo F. David, Oselys R. Justo, Maria P. P. Castro, Marcelo S. Sthel and Heizir F. de Castro	
14	Critical Technological Analysis for Enzymatic Biodiesel Production: An Appraisal and Future Directions.	303
	Marcelle Alves Farias and Maria Alice Z. Coelho	
15	Critical Analysis of Feedstock Availability and Composition, and New Potential Resources for Biodiesel Production in Brazil.	331
	Betania F. Quirino, Bruno S. A. F. Brasil, Bruno G. Laviola, Simone Mendonça and João R. M. Almeida	

16	Techno-Economic and Life Cycle Analysis of Biodiesel Production: Perception of Land Use, Climate Change, and Sustainability Measurements	351
	Donato A. G. Aranda, Cecilia M. Soares and Neyda Om Tapanes	
17	Microalgal Feedstock for Bioenergy: Opportunities and Challenges	367
	Cristiano Eduardo Rodrigues Reis, Mateus de Souza Amaral, Carla Cristina Almeida Loures, Patrícia Caroline Molgero da Rós, Bo Hu, Hécio José Izário Filho, Heizir Ferreira de Castro, Sônia Maria Flores Giancesella and Messias Borges Silva	
18	Technological Advancements in Biohydrogen Production and Bagasse Gasification Process in the Sugarcane Industry with Regard to Brazilian Conditions	393
	Jose Luz Silveira, Celso Eduardo Tuna, Daniel Travieso Pedroso, Marcio Evaristo da Silva, Einara Blanco Machin, Lúcia Bollini Braga and Valdisley José Martinelli	
19	Nonconventional Renewable Sources in Brazil and Their Impact on the Success of Bioenergy	413
	Luís Cláudio Oliveira-Lopes and Cláudio H. Ferreira da Silva	

Biofuels in Brazil

Fundamental Aspects, Recent Developments, and
Future Perspectives

da Silva, S.S.; Chandel, A.K. (Eds.)

2014, XVI, 435 p. 109 illus., 56 illus. in color., Hardcover

ISBN: 978-3-319-05019-5
