

Contents

1	Introduction to Digital Computers and Bio-molecular Computer	1
1.1	The Behaviors of a Digital Computer	1
1.2	The Behaviors of Bio-molecular Computer	2
1.3	Introduction for a Digital Computer of the von Neumann Architecture	4
1.4	The von Neumann Architecture for Bio-molecular Computer	5
1.5	Summary	6
1.6	Bibliographical Notes	6
1.7	Exercises	7
	References	7
2	Data Representation on Bio-molecular Computer	9
2.1	Introduction to Data Types	9
2.2	Data Representation for Bio-molecular Computer	10
2.3	Hexadecimal Notation	11
2.4	Octal Notation	12
2.5	Summary	13
2.6	Bibliographical Notes	13
2.7	Exercises	13
	References	14
3	Introduction for Bio-molecular Operations on Bio-molecular Computer	15
3.1	Introduction to Bio-molecular Operations	15
3.2	Introduction to the Append Operation	16
3.3	Introduction to the Amplify Operation	18
3.4	Introduction to the Merge Operation	18
3.5	Introduction to the Rest of Bio-molecular Operations	20
3.6	The Construction of a Parity Counter of N Bits	22
3.7	The Power for a Parity Counter of N Bits	23

3.8	Introduction for the Parity Generator of Error-Detection Codes on Digital Communication.	24
3.9	Introduction for the Parity Checker of Error-Detection Codes on Digital Communication.	26
3.10	Summary	28
3.11	Bibliographical Notes	29
3.12	Exercises.	29
	References	32
4	Introduction for Number Representation on Bio-molecular Computer	33
4.1	Introduction to Decimal and Binary	33
4.2	Conversion for Between Decimal and Binary	34
4.3	Integer Representation on Bio-molecular Computer	35
4.3.1	Introduction for Unsigned Integer Format.	36
4.3.2	Introduction for Sign-and-Magnitude Integer Format	38
4.3.3	Introduction for One's Complement Integer Format	39
4.3.4	Introduction for Two's Complement Integer Format	41
4.4	Introduction for Floating-Point Representation.	43
4.4.1	Introduction for Single Precision of Floating-Point Numbers.	44
4.4.2	Introduction for Double Precision of Floating-Point Numbers.	46
4.5	Summary	48
4.6	Bibliographical Notes	49
4.7	Exercises.	49
	References	51
5	Introduction to Arithmetic Operations on Bits on Bio-molecular Computer	53
5.1	Introduction to Arithmetic Operations on Bio-molecular Computer	55
5.2	Introduction to Addition on Unsigned Integers on Bio-molecular Computer	55
5.2.1	The Construction of a Parallel One-bit Adder on Unsigned Integers on Bio-molecular Computer.	56
5.2.2	The Construction for a Parallel Adder of N Bits on Unsigned Integers on Bio-molecular Computer.	58
5.2.3	The Power for a Parallel Adder of N Bits on Unsigned Integers on Bio-molecular Computer	60
5.3	Introduction to Subtraction on Unsigned Integers on Bio-molecular Computer	80

5.3.1	The Construction of a Parallel One-bit Subtractor on Unsigned Integers on Bio-molecular Computer	80
5.3.2	The Construction of a Parallel N -bits Subtractor on Unsigned Integers on Bio-molecular Computer	82
5.3.3	The Power for a Parallel N -bits Subtractor on Unsigned Integers on Bio-molecular Computer	84
5.4	Summary	102
5.5	Bibliographical Notes	103
5.6	Exercises.	103
	References	106
6	Introduction to Logic Operations on Bits on Bio-molecular Computer	109
6.1	Introduction to NOT Operation on Bio-molecular Computer	109
6.1.1	The Construction for the Parallel NOT Operation of a Bit on Bio-molecular Computer	110
6.1.2	The Construction for the Parallel NOT Operation of N Bits on Bio-molecular Computer	111
6.1.3	The Power for the Parallel NOT Operation of N Bits on Bio-molecular Computer	112
6.2	Introduction to OR Operation on Bio-molecular Computer	119
6.2.1	The Construction for the Parallel OR Operation of a Bit on Bio-molecular Computer	120
6.2.2	The Construction for the Parallel OR Operation of N Bits on Bio-molecular Computer	122
6.2.3	The Power for the Parallel OR Operation of N Bits on Bio-molecular Computer	123
6.3	Introduction to AND Operation on Bio-molecular Computer	132
6.3.1	The Construction for the Parallel AND Operation of a Bit on Bio-molecular Computer	133
6.3.2	The Construction for the Parallel AND Operation of N Bits on Bio-molecular Computer	134
6.3.3	The Power for the Parallel AND Operation of N Bits on Bio-molecular Computer	135
6.4	Introduction for NOR Operation on Bio-molecular Computer	144
6.4.1	The Construction for the Parallel NOR Operation of a Bit on Bio-molecular Computer	145
6.4.2	The Construction for the Parallel NOR Operation of N Bits on Bio-molecular Computer	146
6.4.3	The Power for the Parallel NOR Operation of N Bits on Bio-molecular Computer	147

6.5	Introduction for NAND Operation on Bio-molecular Computer	157
6.5.1	The Construction for the Parallel NAND Operation of a Bit on Bio-molecular Computer	157
6.5.2	The Construction for the Parallel NAND Operation of N Bits on Bio-molecular Computer	159
6.5.3	The Power for the Parallel NAND Operation of N Bits on Bio-molecular Computer	160
6.6	Introduction for Exclusive-OR Operation on Bio-molecular Computer	169
6.6.1	The Construction for the Parallel XOR Operation of a Bit on Bio-molecular Computer	170
6.6.2	The Construction for the Parallel XOR Operation of N Bits on Bio-molecular Computer	171
6.6.3	The Power for the Parallel XOR Operation of N Bits on Bio-molecular Computer	172
6.7	Introduction for Exclusive-NOR Operation on Bio-molecular Computer	182
6.7.1	The Construction for the Parallel XNOR Operation of a Bit on Bio-molecular Computer	184
6.7.2	The Construction for the Parallel XNOR Operation of N Bits on Bio-molecular Computer	185
6.7.3	The Power for the Parallel XNOR Operation of N Bits on Bio-molecular Computer	186
6.8	Summary	196
6.9	Bibliographical Notes	197
6.10	Exercises.	197
	References	201
7	Introduction to Comparators and Shifters and Increase and Decrease and Two Specific Operations on Bits on Bio-molecular Computer	203
7.1	Introduction to Comparators on Bio-molecular Computer	204
7.1.1	The Construction for the Parallel Comparator of a Bit on Bio-molecular Computer	205
7.1.2	The Construction for the Parallel Comparator of N Bits on Bio-molecular Computer	206
7.1.3	The Power for the Parallel Comparator of N Bits on Bio-molecular Computer	208
7.2	Introduction to Left Shifters on Bio-molecular Computer	217
7.2.1	The Construction for the Parallel Left Shifter on Bio-molecular Computer	218
7.2.2	The Power for the Parallel Left Shifters of N Bits on Bio-molecular Computer	220

7.3	Introduction to Right Shifters on Bio-molecular Computer	228
7.3.1	The Construction for the Parallel Right Shifter on Bio-molecular Computer	229
7.3.2	The Power for the Parallel Right Shifters of N Bits on Bio-molecular Computer	230
7.4	Introduction to the Increase Operation on Bio-molecular Computer	237
7.4.1	The Construction for the Parallel Operation of Increase on Bio-molecular Computer	238
7.4.2	The Power for the Parallel Operation of Increase on Bio-molecular Computer	240
7.5	Introduction to the Decrease Operation on Bio-molecular Computer	247
7.5.1	The Construction for the Parallel Operation of Decrease on Bio-molecular Computer	247
7.5.2	The Power for the Parallel Operation of Decrease on Bio-molecular Computer	250
7.6	Introduction for Finding the Maximum and Minimum Numbers of One on Bio-molecular Computer	256
7.6.1	The Construction for Finding the Maximum and Minimum Numbers of One on Bio-molecular Computer	257
7.6.2	The Power for Finding the Maximum and Minimum Numbers of One on Bio-molecular Computer	258
7.7	Summary	263
7.8	Bibliographical Notes	264
7.9	Exercises.	264
	References	267
Index	269

Molecular Computing

Towards a Novel Computing Architecture for Complex
Problem Solving

Chang, W.-L.; Vasilakos, A.V.

2014, XIII, 271 p. 229 illus., Hardcover

ISBN: 978-3-319-05121-5
