

Contents

1 Basic Chatter Theory	1
1.1 Introduction	1
1.2 Arnold or Type B Chatter	5
1.3 Regenerative Chatter	7
1.3.1 Cutting Force Model	9
1.3.2 Instantaneous Oscillating Force	9
1.3.3 Machine Response	12
1.3.4 Graphical Approach	14
1.3.5 Experimental Stability Charts	21
1.4 Conclusions	24
References	25
2 Extension of Chatter Theory	27
2.1 Introduction	27
2.2 Multiple Modes of Vibration	27
2.3 Vibration Direction	29
2.4 Mode Direction	32
2.5 Turning, Boring, Drilling and Milling	35
2.5.1 Turning	37
2.5.2 Boring	38
2.5.3 Drilling	39
2.5.4 Milling	42
2.5.5 Face Milling	47
2.6 Mode-Coupling Chatter	48
2.7 Conclusions	53
References	55
3 Chatter-Resistant Multi-Tooth Cutters	57
3.1 Introduction	57
3.2 Alternating Pitch Cutters	58
3.3 Strasman (Ripping or Roughing) Cutters	65
3.4 Trapezoidal Cutters	71
3.5 Bi-helix Cutters	76

3.5.1	Theoretical Stability Chart for Broaching.	82
3.5.2	Theoretical Stability Chart for Milling.	86
3.5.3	Tunable Alternating Pitch Effect.	91
3.5.4	Experimental Results.	91
3.6	Conclusions	97
	References	97
4	Structural Modifications.	99
4.1	Introduction	99
4.2	Spindle Design	100
4.2.1	Receptances of Shafts, Including Shear and Rotary Inertia	100
4.2.2	Radial and Tilt Characteristics of Bearings	105
4.2.3	Subsystem Addition	111
4.2.4	Predicted Responses and Q Factors	115
4.3	Vibration Absorbers.	119
4.3.1	Classical Absorber	120
4.3.2	Clamped/Free Bar with an Absorber	121
4.3.3	A Second Bar as an Absorber.	123
4.3.4	An Absorber for a Spindle	126
4.3.5	Practical Examples	126
4.4	Flexible Tools.	129
4.5	Conclusions	133
	References	133
5	Grinding	135
5.1	Introduction	135
5.2	Grinding Force	140
5.3	Chatter Models	142
5.3.1	The Simplest Grinding Model	143
5.3.2	Growth Rates	145
5.3.3	Contact Stiffness.	149
5.3.4	Flexible Grinding Wheels	153
5.3.5	Inclined Mode	155
5.3.6	Torsional Effects.	159
5.3.7	Double Regeneration.	163
5.3.8	Non-regenerative Chatter?	167
5.3.9	Review of Assumptions.	172
5.4	Experimental Results	173
5.4.1	Flexible Grinding Wheels	174
5.4.2	Torsional Flexibility	179
5.5	Centreless Grinding	180
5.6	Conclusions	183
	References	184

6	Conclusions	187
6.1	Introduction	187
6.2	Time-Domain Modelling	187
6.3	Varying Speed	188
6.4	Active Control	189
6.5	Final Conclusions	189
	References	190
	Appendix A: Basic Vibration Theory	193
	Appendix B: Two-Degrees-of-Freedom Vibration	219
	Appendix C: A Systems Approach Using Receptances	237
	About the Author	251
	List of Computer Programs Included in extras.springer.com	253
	Index	257

Chatter and Machine Tools

Stone, B.

2014, XVI, 260 p. 209 illus. With online files/update.,

Hardcover

ISBN: 978-3-319-05235-9
