

Contents

Calibration Weighting When Model and Calibration Variables Can Differ	1
Phillip S. Kott	
M-Quantile Small Area Models for Measuring Poverty at a Local Level	19
Monica Pratesi	
Use of Zero Functions for Combining Information from Multiple Frames	35
A.C. Singh and F. Mecatti	
The Analysis of Survey Data Using the Bootstrap	53
Jean-François Beaumont	
Empirical Likelihood Confidence Intervals: An Application to the EU-SILC Household Surveys	65
Yves G. Berger and Omar De La Riva Torres	
Responsive Design for Economic Data in Mixed-Mode Panels	85
Annamaria Bianchi and Silvia Biffignandi	
Comparing the Efficiency of Sample Plans for Symmetric and Non-symmetric Distributions in Auditing	103
Paola M. Chiodini and Mariangela Zenga	
Implementing the First ISTAT Survey of Homeless Population by Indirect Sampling and Weight Sharing Method	119
Claudia De Vitiis, Stefano Falorsi, and Francesca Inglese	
Modelling Measurement Errors by Object-Oriented Bayesian Networks: An Application to 2008 SHIW	139
Daniela Marella and Paola Vicard	

Sampling Theory and Geostatistics: A Way of Reconciliation	151
Giorgio E. Montanari and Giuseppe Cicchitelli	
Optimal Regression Estimator for Stratified Two-Stage Sampling	167
Nuanpan Nangsue and Yves G. Berger	
Spatial Sampling for Agricultural Data	179
Federica Piersimoni, Paolo Postiglione, and Roberto Benedetti	
A Multi-proportion Randomized Response Model Using the Inverse Sampling.....	199
Marcella Poliscchio and Francesco Porro	
A Modified Extended Delete a Group Jackknife Variance Estimator Under Random Hot Deck Imputation in Business Surveys	219
Paolo Righi, Stefano Falorsi, and Andrea Fasulo	

Contributions to Sampling Statistics

Mecatti, F.; Conti, P.L.; Ranalli, M.G. (Eds.)

2014, VIII, 233 p. 17 illus., 9 illus. in color., Hardcover
