1	Introduction	1
	References	4
2	Properties of Influenza Viruses	7
	References	11
3	Replication Cycle of Influenza Viruses	15
3.1	Viral Entry into the Host Cell	16
3.2	Transcription and Replication of the Viral Genome	17
3.3	Entry into and Exit of RNPs from Nucleus	23
3.4	Translation of mRNAs into Proteins	24
3.5	RNP Packaging, Assembly and Budding of Influenza Viruses	24
	References	25
4	Evolution of Influenza Viruses	31
4.1	Evolution of Haemagglutinin Gene of Influenza Viruses	32
4.2	Role of Receptor Specificity in the Evolution of Influenza Viruses	34
4.3	Role of Antigenic Drift and Antigenic Shift in the Evolution of Influenza Viruses	35
4.4	Role of ‘Mixing Vessels’ in the Evolution of Influenza Viruses	41
4.5	Role of Recombination in the Evolution of Influenza Viruses	42
4.6	Role of ‘Host Species Jumping’ in the Evolution of Influenza Viruses	43
4.7	Evolution of the Highly Pathogenic H5N1 AIVs: Concept of Virus Clades	45
4.8	H17N10: A New Subtype of Influenza Viruses of Bat	48
4.9	Evolution of H7N9 Influenza A Virus	50
	References	52

5	Epidemiology of Influenza Viruses	65
5.1	Avian Influenza (Bird Flu)	67
5.1.1	Important Historical Events	70
5.1.2	HPAI Disease Outbreaks	70
5.2	Swine Influenza.	73
5.3	Equine Influenza	74
5.4	Canine and Feline Influenza	74
5.5	Human Influenza (Flu).	75
	References	78
6	Role of Migratory Birds in Spreading Influenza Viruses	87
6.1	Intercontinental Spread of Avian Influenza via Migratory Birds.	94
6.2	Bridge Species	95
6.3	International Scientific Task Force on Avian Influenza and Wild Birds	95
	References	96
7	Clinical Features of Influenza Viruses.	103
7.1	Clinical Signs and Lesions of Avian/Bird Flu Viruses in Chickens/Poultry Birds.	104
7.1.1	Highly Pathogenic Avian Influenza.	104
7.2	Clinical Signs and Lesions of Swine Influenza Viruses in Pigs	105
7.3	Clinical Signs and Lesions Equine Influenza Viruses in Equines	106
7.4	Clinical Signs and Lesions of Influenza Viruses in Dogs and Cats.	108
7.5	Clinical Signs and Lesions of Influenza Viruses in Humans	109
7.5.1	Bird Flu in Humans	109
7.5.2	Swine Flu in Humans	110
	References	111
8	Pathogenesis and Pathogenicity of Influenza Viruses	115
8.1	Pathogenesis	115
8.2	Pathogenicity	118
	References	124
9	Public Health Importance and Pandemic Potentials/Threats of Influenza Viruses	133
9.1	Public Health Significance	136
9.1.1	Avian/Bird Flu	136
9.1.2	H7N9: The Recently Emerged Avian Flu Virus	138
9.1.3	Pandemic Threat of Bird Flu Virus	138

9.1.4	Swine Flu Human Pandemic (Novel Reassortant H1N1 Virus) (2009–2013)	141
9.1.5	Human Influenza	142
9.2	Opportunities for Emergence and Spread of Influenza Viruses.	144
	References	146
10	Diagnosis of Influenza Viruses	151
	References	156
11	Prevention and Control of Influenza Viruses.	163
11.1	Control of Avian Influenza Viruses	164
11.1.1	Biosecurity Principles	166
11.1.2	Disease Management for Preventing the ‘Bird Flu’ Outbreaks.	167
11.1.3	Salient Precautionary Measures for General Public	168
11.1.4	Protection Zone	169
11.1.5	Surveillance Zone	169
11.1.6	Vaccination as Part of a Control Strategy of Avian Influenza Viruses.	170
11.1.7	Role of Economic Indicators, Poultry Density and Veterinary Services on Control of HPAI in Poultry.	177
11.1.8	HPAI Control via Greater Awareness of Policy Issues	179
11.1.9	Poultry Sector Restructuring.	180
11.2	Control of Swine Influenza Viruses	180
11.3	Control of Equine Influenza Viruses	181
11.4	Control of Human Influenza Viruses	182
11.4.1	Vaccines for Human Influenza Viruses	182
11.4.2	Universal Influenza Virus Vaccine and Universal Antibodies-Based Flu Therapies	184
11.5	Treatment.	190
11.5.1	Treatment for Human Influenza Viruses	190
11.6	Pandemic Preparedness	193
11.7	Seasonal Influenza.	197
