

Contents

- 1 Introduction: What Landmarks Are, and Why They Are Important** 1
 - 1.1 What Landmarks Are 1
 - 1.1.1 An Extensional Approach 4
 - 1.1.2 A Cognitive Semantics Approach..... 5
 - 1.1.3 An Intensional Approach 7
 - 1.1.4 An Artificial Intelligence Approach 11
 - 1.2 Related Concepts..... 13
 - 1.2.1 Places 14
 - 1.2.2 Points of Interest 16
 - 1.2.3 Icons 18
 - 1.2.4 Metaphorical Landmarks 19
 - 1.3 Why Landmarks Challenge Intelligent Systems 19
 - 1.4 Summary 23
 - References 24
- 2 Landmarks: A Thought Experiment** 27
 - 2.1 Experiment 27
 - 2.1.1 The Void..... 28
 - 2.1.2 Adding a Landmark..... 28
 - 2.1.3 Adding Structure..... 30
 - 2.1.4 Filling with Further Landmarks 36
 - 2.2 Summary 37
 - References 38
- 3 Cognitive Aspects: How People Perceive, Memorize, Think and Talk About Landmarks** 41
 - 3.1 Spatial Cognition..... 41
 - 3.1.1 Spatial Abilities 44
 - 3.1.2 Orientation and Wayfinding 48
 - 3.1.3 What We Have Learned About Landmarks from Orientation and Wayfinding 50

3.2	The Role of Perception	53
3.2.1	Landmarks Grab Attention	53
3.2.2	Properties That Grab Attention	55
3.2.3	What We Have Learned About Landmarks from Perception	60
3.3	Mental Spatial Representations.....	60
3.3.1	The Brain.....	61
3.3.2	The Mind.....	65
3.3.3	What We Have Learned About Landmarks from Mental Spatial Representations	77
3.4	Externalization of Mental Spatial Representations	77
3.4.1	The Externalized Message	80
3.4.2	Sketches	84
3.4.3	Verbal Descriptions	86
3.4.4	Understanding External Spatial Representations.....	94
3.4.5	What We Have Learned About Landmarks from Externalizations of Mental Spatial Representations	96
3.5	Summary	96
	References	98
4	Conceptual Aspects: How Landmarks Can Be Described in Data Models	109
4.1	The Purpose of Modelling Landmarks	109
4.2	Towards a Landmark Model	112
4.2.1	Properties.....	112
4.2.2	An Algebraic Landmark Model	114
4.2.3	Formal Models for Elements of the City	122
4.2.4	Formal Models for Place References	123
4.2.5	Formal Models for Hierarchies	124
4.3	Landmarks in Geographic Data Structures	128
4.3.1	POI Data: Substitutes for Landmarks	128
4.3.2	Landmarks in OpenStreetMap	129
4.3.3	Landmarks in OpenLS.....	130
4.4	Summary	131
	References	132
5	Computational Aspects: How Landmarks Can Be Observed, Stored, and Analysed	137
5.1	Computing a Landmark.....	137
5.2	Landmark Identification	138
5.2.1	Computing Salience	139
5.2.2	Data Mining Salience.....	146
5.3	Landmark Integration	151
5.3.1	Landmark Integration in Routing Algorithms	157
5.4	A Comparison of Landmark Identification and Landmark Integration Approaches	162

5.5	Criticisms of Existing Approaches	166
5.5.1	Data Challenge	166
5.5.2	Taxonomies	167
5.5.3	Crowdsourcing as an Alternative Approach	167
5.6	Summary	169
	References	170
6	Communication Aspects: How Landmarks Enrich the Communication Between Human and Machine	175
6.1	Landmarks in Human-Computer Interaction	175
6.1.1	Requirements for Machine Spatial Communication	177
6.2	Producing Landmarks.....	179
6.2.1	Producing Verbal Landmark References	179
6.2.2	Producing Graphical Landmark References	185
6.3	Understanding Landmarks.....	188
6.3.1	Understanding Verbal Landmarks	188
6.3.2	Understanding Graphical Landmarks.....	192
6.4	Evaluating Landmark-Based Human-Computer Interaction	195
6.5	Summary	199
	References	199
7	Conclusions: What Is Known and What Is Still Challenging About Landmarks	205
7.1	What We Know: A Short Summary	205
7.2	What We Aim for: Intelligent Geospatial Systems	206
7.3	What We Need to Know: Human-Computer Interaction	207
	References	211
	Author Index.....	213
	Subject Index	221

Landmarks

GIScience for Intelligent Services

Richter, K.-F.; Winter, S.

2014, XV, 223 p. 47 illus., Hardcover

ISBN: 978-3-319-05731-6
