

Contents

1	Introduction	1
1.1	Motivation: Li–Co–Mn–Ni Oxide Materials	1
1.2	Layered and Spinel Structures	3
1.3	The Li–Co–Mn–O Face of the Pyramid	5
1.4	The Li–Mn–Ni–O Face of the Pyramid	9
1.4.1	Li–Mn–Ni–O Spinel Solid Solutions	11
1.4.2	Li–Mn–Ni–O Layered Solid Solutions	11
1.4.3	The Coexistence Region Between the Spinel and Layered Structures	14
1.5	Structure of this Thesis	16
2	Experimental and Theoretical Considerations	19
2.1	Sample Preparation	19
2.1.1	Synthesis of Combinatorial Samples	19
2.1.2	Synthesis of Bulk Samples	22
2.2	X-Ray Diffraction	23
2.2.1	High Throughput X-Ray Diffraction (XRD) of Combinatorial Samples	23
2.2.2	X-Ray Diffraction of Bulk Samples	24
2.3	Fitting of Combinatorial X-Ray Diffraction Patterns	24
2.4	Methods to Generate the Phase Diagrams	28
2.5	Electrochemical Tests	29
2.6	Thermo-Gravimetric Analysis	30
2.7	Elemental Analysis	30
2.8	Scanning Electron Microscopy	31
2.9	Redox Titration	31
2.10	X-Ray Absorption Spectroscopy	32
2.11	Helium Pycnometry	33
2.12	Monte Carlo Simulations	33

3	Optimization of the Synthesis of Combinatorial Samples	35
3.1	Experimental Design	35
3.2	Thermo-Gravimetric Analyzer (TGA) Results for Lithium Loss During Synthesis	38
3.3	X-Ray Diffraction (XRD) Results of Lithium Loss	40
3.3.1	Combinatorial Samples	40
3.3.2	Combinatorial Samples During Synthesis	42
3.4	Conclusions Regarding Synthesis of Combinatorial Samples	47
4	Combinatorial Studies in the Li–Co–Mn–O System	49
4.1	Experimental Design	49
4.2	Spinel–Layered Coexistence Region	51
4.3	LiCoO_2 – Li_2MnO_3	53
4.4	Monte Carlo Simulation	57
4.5	Conclusions Regarding the Formation of Layered–Layered Composites in the Li–Co–Mn–O System	59
5	Combinatorial Studies of the Spinel and Rocksalt Regions in the Li–Mn–Ni–O System	61
5.1	Experimental Design	61
5.2	Spinel Single-Phase Region	61
5.3	Rocksalt Single-Phase Region	66
5.4	Mn_2O_3 –Spinel Coexistence Region	71
5.5	Spinel–Ordered Rocksalt Coexistence Region	73
5.6	Conclusions Regarding Spinel and Rocksalt Li–Mn–Ni Oxides	76
6	Combinatorial Studies of Compositions Containing Layered Phases in the Li–Mn–Ni–O System	77
6.1	Experimental Design	77
6.2	Single-Phase Layered Region	77
6.3	Two-Phase Layered–Spinel Region	78
6.4	Two-Phase Layered–Layered Region	82
6.5	The R, N, S, and M phases	83
6.6	Three-Phase Regions, Quenched	85
6.7	Three-Phase Regions, Slow-Cooled	88
6.8	The Upper Boundary of the Layered Region	91
6.9	Conclusions Regarding Combinatorial Studies of Li–Mn–Ni–O Materials	92
7	Investigations of Bulk Li–Mn–Ni–O Samples to Confirm the Combinatorial Studies	95
7.1	Motivation	95
7.2	Experimental Design	96
7.3	Structural Results	97
7.4	Electrochemistry of the R, M and N Phases	101
7.5	Conclusions Based on Bulk Li–Mn–Ni–O Samples	104

8	Layered Materials with Metal Site Vacancies	105
8.1	Motivation for the Study of Samples near Li_2MnO_3	105
8.2	Experimental Design	106
8.3	Monte Carlo Results	108
8.4	Vacancy Measurements	109
8.5	$\text{Li}[\text{Ni}_{1/6}\square_{1/6}\text{Mn}_{2/3}]\text{O}_2$	113
8.6	Conclusions Regarding Metal Site Vacancies in Li–Mn–Ni–O Materials	116
9	Materials Near the Layered Boundary	117
9.1	Motivation for Studying $\text{LiNi}_{0.5}\text{Mn}_{0.5}\text{O}_2$	117
9.2	Experimental Design	119
9.3	Structural Results	120
9.4	Monte Carlo Simulation Results	123
9.5	Electrochemical Measurements	124
9.6	$\text{Li}_{1+x}[\text{Ni}_{0.5}\text{Mn}_{0.5}]_{1-x}\text{O}_2$ Series with $0 \leq x \leq 0.24$	126
9.7	Conclusions Regarding Layered–Layered Nano-Composites	129
10	Conclusions and Future Works	133
10.1	The Li–Co–Mn–Ni–O Pseudo-Quaternary System	133
10.2	Resolving Points of Confusion	134
10.3	Future Work	137
	References	139
