

# Contents

<b>1</b>	<b>Introduction</b>	1
	References	4
<b>2</b>	<b>Drift-Diffusion and Ballistic Transport</b>	5
2.1	Drift-Diffusion Transport	5
2.1.1	Drude's Model	5
2.1.2	Drift-Diffusion Model	8
2.1.3	Current-Voltage Characteristic and Chemical Potential	10
2.1.4	Range of Validity	14
2.2	Ballistic (Thermionic) Transport	14
2.2.1	Nondegenerate Case	15
2.2.2	Electron Tunneling	19
2.2.3	Degenerate Case	21
2.2.4	Interface Resistances and Chemical Potential	22
	References	23
<b>3</b>	<b>Prototype Thermoballistic Model</b>	25
3.1	Probabilistic Approach to Carrier Transport	25
3.1.1	Net Electron Current	26
3.1.2	Mean Free Path	27
3.2	Prototype Thermoballistic Model: Concept and Implementation	28
3.2.1	Ballistic Configurations	29
3.2.2	Averaging Over Ballistic Configurations	31
3.2.3	Electron Tunneling	34
3.2.4	Degenerate Case	36
3.2.5	Chemical Potential	37
3.3	Prototype Thermoballistic Model: Examples	39
3.3.1	Single Potential Energy Barrier	39
3.3.2	Double Barrier	42
3.3.3	Arbitrary Number of Barriers	43
3.3.4	Chemical Potential for Field-Driven Transport	47
	References	48

<b>4 Thermoballistic Approach: Concept</b>	49
4.1 Electron Densities at Local Thermodynamic Equilibrium	50
4.1.1 Spin-Resolved Densities.	51
4.1.2 Average Chemical Potential and Spin Accumulation Function	53
4.2 Ballistic Spin-Polarized Transport	55
4.2.1 Ballistic Currents	55
4.2.2 Ballistic Densities	58
4.2.3 Spin Balance Equation.	59
4.2.4 Net Ballistic Currents and Joint Ballistic Densities	62
4.3 Thermoballistic Spin-Polarized Transport	64
4.3.1 Thermoballistic Currents and Densities	64
4.3.2 Drift-Diffusion Regime	68
4.3.3 Ballistic Limit	73
4.3.4 Thermoballistic Energy Dissipation.	75
4.4 Synopsis of the Thermoballistic Concept	78
4.4.1 Ingredients and Physical Content	78
4.4.2 Merits and Weaknesses	80
References	82
<b>5 Thermoballistic Approach: Implementation</b>	83
5.1 Physical Conditions Determining the Dynamical Functions	83
5.1.1 Determination of the Mean Spin Function	83
5.1.2 Determination of the Spin Accumulation Function	85
5.2 Average Chemical Potential	86
5.2.1 The Resistance Functions.	86
5.2.2 Resistance Functions for Constant Spin Splitting	90
5.2.3 Thermoballistic Average Chemical Potential	92
5.2.4 Sharvin Interface Resistance.	95
5.2.5 Current-Voltage Characteristic and Magnetoresistance.	96
5.3 Spin Accumulation Function.	97
5.3.1 Integral Equation	98
5.3.2 Differential Equation for Field-Driven Transport	99
5.4 Current and Density Spin Polarizations	104
5.4.1 Spin Polarizations in the Semiconductor	104
5.4.2 Current Spin Polarization in the Contacts.	105
5.4.3 Matching the Current Spin Polarization at the Interfaces	108
References	109
<b>6 Examples</b>	111
6.1 Homogeneous Semiconductors	111
6.1.1 Low-Field Transport	111
6.1.2 Field-Driven Transport: Numerical Results.	116

6.2	FM/NMS/FM Heterostructures . . . . .	118
6.2.1	Low-Field Spin Polarizations . . . . .	118
6.2.2	Injected Spin Polarizations for Field-Driven Transport . . . . .	120
6.2.3	Injected Current Spin Polarization in the Low-Field Regime . . . . .	125
6.3	DMS/NMS/DMS Heterostructures . . . . .	127
6.3.1	Low-Field Current Spin Polarization . . . . .	127
6.3.2	Magnetoresistance . . . . .	132
6.3.3	Drift-Diffusion and Ballistic Regimes . . . . .	133
	References . . . . .	136
<b>7</b>	<b>Summary and Outlook . . . . .</b>	<b>139</b>
	<b>Appendix A: Useful Formulae for Numerical Calculations . . . . .</b>	<b>143</b>
A.1	Resistance Functions . . . . .	143
A.2	Spin Accumulation Function . . . . .	144
	<b>Index . . . . .</b>	<b>147</b>

The Thermoballistic Transport Model  
A Novel Approach to Charge Carrier Transport in  
Semiconductors

Lipperheide, R.; Wille, U.

2014, XI, 150 p. 7 illus., Hardcover

ISBN: 978-3-319-05923-5
