

Contents

1	The Heat Equation.	1
1.1	Separation of Variables	2
1.2	Vector Spaces and Linear Operators	4
1.3	Inner Product Spaces	8
1.4	Convergence of Fourier Series	10
1.5	Maximum Principle	16
1.6	Exercises	17
	References	20
2	Metric Spaces	21
2.1	Maximum Principle	29
2.2	Exercises	30
3	Banach Spaces	31
3.1	Normed Linear Spaces	31
3.2	Bounded Linear Operators	34
3.3	Finite Dimensional Normed Linear Spaces	35
3.4	Completeness	38
3.5	Duality	41
3.6	Riesz Representation Theorem	42
3.7	The Hahn-Banach Theorem	45
3.8	Exercises	48
4	Power Series	51
4.1	Cauchy-Riemann Equations	57
4.2	Exercises	59
	References	59
5	The R^2 Dirichlet Problem.	61
5.1	Exercises	66
	References	68

6	The R^N Dirichlet Problem	69
6.1	Exercises	76
	References	76
	Bibliography	77
	Index	79

Foundations of the Complex Variable Boundary Element
Method

Hromadka, T.; Whitley, R.

2014, XII, 80 p., Softcover

ISBN: 978-3-319-05953-2
