Part I Tsunami as a Known Hazard

1 Introduction	3
1.1 Introduction	3
1.2 Five Stories	4
1.2.1 An Aboriginal Legend	4
1.2.2 The Kwenaitchechat Legend, Pacific Northwest	5
1.2.3 Krakatau, August 27, 1883	5
1.2.4 Burin Peninsula, Newfoundland, November 18, 1929	6
1.2.5 Papua New Guinea, July 17, 1998	7
1.3 Scientific Fact or Legends?	7
1.4 Causes of Tsunami	9
1.5 Distribution and Fatalities	10
1.5.1 Mediterranean Sea	10
1.5.2 Caribbean Sea	11
1.5.3 Pacific Ocean Region (including Indonesia)	11
1.5.4 New Zealand and Australia	14
1.5.5 Bays, Fjords, Inland Seas, and Lakes	15
1.6 Meteorological Phenomena, Freak Waves and Storm Surges	16
References	17
2 Tsunami Dynamics	19
2.1 Introduction	19
2.2 Tsunami Characteristics	19
2.3 Tsunami Wave Theory	21
2.3.1 Resonance	23
2.4 Modeling Tsunami	24
2.5 Run-Up and Inundation	25
2.5.1 Run-Up	25
2.5.2 Inland Penetration and Velocity	30
References	31

Part II Tsunami-Formed Landscapes

3 Signatures of Tsunami in the Coastal Landscape	35
3.1 Introduction	35
3.2 Depositional Signatures of Tsunami	37
3.2.1 Buried Sand or Anomalous Sediment Layers	37
3.2.2 Foraminifera and Diatoms	39

3.2.3	Boulder Floaters in Sand	39
3.2.4	Mounds, Domes and Ridges	42
3.2.5	Chevrons	43
3.2.6	Dune Bedforms.	44
3.2.7	Smear Deposits.	45
3.2.8	Large Boulders and Piles of Imbricated Boulders	45
3.2.9	Turbidites.	50
3.3	Erosional Signatures of Tsunami	51
3.3.1	Small-Scale Features	51
3.3.2	Large-Scale Features	54
3.3.3	Flow Dynamics.	56
	References	59
4	Coastal Landscape Evolution	63
4.1	Introduction	63
4.2	Catastrophism Versus Uniformitarianism	63
4.3	Tsunami Versus Storms	64
4.3.1	The Nature of Tsunami Versus Storm Deposits	65
4.3.2	Movement of Boulders	66
4.4	Types of Coastal Landscapes Created by Tsunami.	67
4.4.1	Sandy Barrier Coasts.	68
4.4.2	Deltas and Alluvial Plains	69
4.4.3	Rocky Coasts	70
4.4.4	Atolls	71
4.4.5	Island Landscapes	72
4.5	Paleo-Landscapes: Australia	75
4.5.1	South Coast of New South Wales	75
4.5.2	Cairns Coast, Northeast Queensland	77
4.5.3	Northwest West Australia	78
	References	81
 Part III Causes of Tsunami		
5	Earthquake-Generated Tsunami.	85
5.1	Introduction	85
5.1.1	Seismic Waves	85
5.2	Magnitude Scales for Earthquakes and Tsunami	85
5.2.1	Earthquake Magnitude Scales.	85
5.2.2	Tsunami Earthquakes.	86
5.2.3	Tsunami Magnitude Scales.	87
5.3	How Earthquakes Generate Tsunami	88
5.3.1	Types of Faults.	88
5.3.2	Seismic Gaps and Tsunami Occurrence	90
5.3.3	Anomalies	91
5.3.4	Linking Tsunami Run-Up to Earthquake Magnitude	91
5.4	Events of the 1990s.	92
5.4.1	Slow Nicaraguan Tsunami Earthquake of September 2, 1992.	92
5.4.2	Flores, December 12, 1992.	95
5.4.3	The Hokkaido Nansei-Oki Tsunami of July 12, 1993	96
5.4.4	Papua New Guinea, July 17, 1998	98
	References	100

6	Great Earthquake-Generated Events	103
6.1	Introduction	103
6.2	Lisbon, November 1, 1755	103
6.3	Chile, May 22, 1960	106
6.4	Alaska, March 27, 1964	110
6.5	The Indian Ocean Tsunami December 26, 2004	114
6.6	Japanese Tōhoku Tsunami March 11, 2011	120
	References	126
7	Great Landslides	131
7.1	Introduction	131
7.2	Causes of Submarine Landslides	131
7.3	How Submarine Landslides Generate Tsunami	134
7.4	Historical Tsunami Attributable to Landslides	135
7.4.1	The Lituya Bay Landslide of July 9, 1958	136
7.4.2	Grand Banks Tsunami, November 18, 1929	138
7.5	Geological Events	139
7.5.1	Hawaiian Landslides	139
7.5.2	The Canary Islands	142
7.5.3	The Storegga Slide of 7,950 BP	143
7.6	Bristol Channel, United Kingdom, January 30, 1607	148
7.7	The Risk in the World's Oceans	153
7.7.1	Other Volcanic Islands	153
7.7.2	Other Topography	154
	References	155
8	Volcanic Eruptions	159
8.1	Introduction	159
8.2	Causes of Volcano-Induced Tsunami	159
8.3	Krakatau, August 26–27, 1883	162
8.4	Santorini, Around 1470 BC	164
	References	167
9	Comets and Asteroids	169
9.1	Introduction	169
9.2	Near Earth Objects	169
9.2.1	What Are They?	169
9.2.2	How Frequent Have Comet and Asteroid Impacts Been?	171
9.3	How Do Extraterrestrial Objects Generate Tsunami?	172
9.3.1	Mechanisms for Generating Tsunami	172
9.3.2	Size of Tsunami	173
9.4	Geological Events	176
9.4.1	Hypothesized Frequency	176
9.4.2	Chicxulub, the Cretaceous–Tertiary (K/T) Extinction Event	178
9.4.3	Other Events	180
9.5	Events Based upon Legends	181
9.5.1	Introduction	181
9.5.2	<i>Deluge Comet</i> Impact Event 8200 ± 200 Years Ago	181
9.5.3	<i>Burckle Flood Comet</i> Event, 4800 Years Ago	181
9.5.4	The <i>Mahuika Comet</i> Event and Eastern Australia	183
9.5.5	An Event in the Kimberley, Western Australia	187

9.5.6 Gulf of Carpentaria	190
9.6 Historical Evidence for an Impact Event	190
9.7 Criticisms of Legendary Events	191
References	192

Part IV Modern Risk of Tsunami

10 Risk and Avoidance	197
10.1 Introduction	197
10.2 What Locations Along a Coast Are at Risk from Tsunami?	198
10.3 Warning Systems	202
10.3.1 The Pacific Tsunami Warning Center	202
10.3.2 Flaws in Regional Warning Systems	205
10.3.3 Localized Tsunami Warning Systems	206
10.4 How Long Have You Got?	209
10.5 Where Should You Go if There Is a Tsunami Warning?	210
References	212
11 Epilogue	213
11.1 Five Stories	213
11.1.1 An Unassuming Earthquake	213
11.1.2 The Next Big One	213
11.1.3 A Submarine Landslide	215
11.1.4 A Volcanic Eruption	216
11.1.5 An Asteroid Impact with the Ocean	216
11.2 Concluding Comments	217
References	217
Index	219

Tsunami

The Underrated Hazard

Bryant, E.

2014, XXXI, 222 p. 149 illus., 8 illus. in color., Hardcover

ISBN: 978-3-319-06132-0
