

Contents

1	Introduction	1
1.1	Historical Overview	1
1.1.1	Quantum Field Theory	1
1.1.2	Statistical Mechanics	2
1.2	Wilson-Kadanoff Renormalization Group	4
1.2.1	Definition of a Renormalization Group Transformation	4
1.2.2	Renormalization Group in Field Theory and Statistical Mechanics	7
1.2.3	Applications of Renormalization Group in Mathematical Physics	9
	References	13
 Part I Equilibrium Statistical Mechanics: Coulomb Gas		
2	d-Dimensional Coulomb Gas	17
2.1	Introduction	17
2.1.1	Renormalization Group Methodologies	18
2.2	Functional Integral	20
2.2.1	Lattice Model	20
2.2.2	Continuum Limit	21
2.3	Mean-Field Approximation	23
	References	25
3	Renormalization Group Analysis	27
3.1	Coarse-Graining of the Partition Function	27
3.2	Differential Scale Transformations	32
3.3	Recursion Relations and Fixed Points	33
3.3.1	$d = 1$	33
3.3.2	$d = 2$	35
3.3.3	$d = 3$	36
3.4	Conclusions and Remarks	38
	References	38

Part II Non-Equilibrium Statistical Mechanics: Randomly Stirred Magnetohydrodynamics

4	Turbulent Flows	43
4.1	Introduction	43
4.2	Mathematical Formulation	44
4.3	Methods to Study Turbulence	47
4.3.1	Closure Modeling	48
4.3.2	Direct Numerical Simulations	49
4.3.3	Analytical Studies	50
4.4	Application of Renormalization Group to Hydrodynamic and Magnetohydrodynamic Turbulence	56
4.4.1	Hydrodynamics	56
4.4.2	Magnetohydrodynamics	59
4.5	Functional Integral	60
4.5.1	Elsasser Transformation	60
4.5.2	Functional Integral Formulation	64
4.5.3	Jacobian of the Transformation	67
4.6	Free Theory	75
4.7	Renormalization Group Transformations	78
4.7.1	Coarse Graining	78
4.7.2	Rescaling	80
4.7.3	Differential RG Equations	81
4.7.4	Consistency Check	82
	References	83
5	Recursion Relations and Fixed Point Analysis	85
5.1	Hydrodynamics	85
5.1.1	Model A	85
5.1.2	Galilean Invariance	90
5.1.3	Relevant, Marginal and Irrelevant Variables	98
5.2	Magnetohydrodynamics	102
5.2.1	RG Equations	102
5.2.2	The Problem of Marginal Variables	108
5.2.3	Non-perturbative Methods	109
5.2.4	Future Research	113
	References	119
6	Conclusion	121
6.1	Coulomb Gas	121
6.2	Randomly Stirred Fluids	121
	References	123

Appendix A: Integral Identities	125
Appendix B: Second Order Loop Integrals.	131
Appendix C: Third Order Loop Integrals	143
Appendix D: Transformation of the RG Corrections to Original Variables.	155
Appendix E: Rescaling and Differential RG Equations	161

Renormalization Group Analysis of Equilibrium and
Non-equilibrium Charged Systems

Barkhudarov, E.

2014, XV, 163 p. 28 illus., 10 illus. in color., Hardcover
