

Contents

1	Introduction	1
1.1	Proteins: Function, Structure and Dynamics	1
1.2	NMR Methods to Study Protein Dynamics	2
1.3	Outline of the Present Thesis	5
	References	6
2	Theoretical Principles	9
2.1	The Bloch Equations	9
2.1.1	Equations Describing Spin Dynamics in the Absence of Relaxation	9
2.1.2	Empirical Description of NMR Relaxation	11
2.2	Chemical Exchange Effects	13
2.3	Bloch-Wangsness-Redfield Theory	14
2.3.1	The Master Equation	14
2.3.2	Interference Between Relaxation Mechanisms	20
2.3.3	Relaxation in the Rotating Frame	20
2.3.4	Spectral Density Functions	21
2.3.5	Relaxation Mechanisms	24
2.4	Average Hamiltonian Theory	26
2.5	Average Liouvillian Theory	28
	References	31
3	Analytical Models for Relaxation Dispersion Experiments	33
3.1	Exchange Contributions to Relaxation in the Absence of ν_f Fields	33
3.1.1	Effects in Single-Quantum Spectroscopy	33
3.1.2	Effects in Multiple-Quantum Spectroscopy	34
3.2	Relaxation During CPMG Echo Trains	35
3.2.1	Relaxation of Single-Quantum Coherences	35
3.2.2	Relaxation of Multiple-Quantum Coherences	35
3.3	Relaxation During $R_{1\rho}$ Experiments	37

3.4	Evolution and Relaxation of Multiple-Quantum Coherences Under Heteronuclear Double Resonance Irradiation	38
3.4.1	Relationship Between ΔR_{MQ} and the Cross-Relaxation Rate of Multiple-Quantum Coherences	38
3.4.2	Preservation of Relaxation Pathways	39
3.4.3	Effect of the HDR Irradiation on Relaxation	41
3.4.4	Relaxation of Multiple-Quantum Coherences Under HDR Irradiation	42
	References	53
4	Experimental Methods	55
4.1	Nitrogen-15 NMR Relaxation Experiments	55
4.2	Fitting of Dispersion Profiles to Analytical Models	57
	References	62
5	Experimental Results	65
5.1	Internal Dynamics in Human Ubiquitin	65
5.1.1	Identifying Chemical Exchange from the Relaxation of Single-Quantum Coherences	66
5.1.2	Identifying Chemical Exchange from the Relaxation of Multiple-Quantum Coherences	67
5.1.3	Identifying Chemical Exchange from the Temperature Dependence of the Relaxation Rates of Multiple-Quantum Coherences	68
5.1.4	Control of Temperature Variations During HDR Irradiation	68
5.1.5	Quantifying Chemical Exchange by HDR Relaxation Dispersion	69
5.2	Internal Dynamics in KIX	75
5.2.1	Identifying Chemical Exchange from the Relaxation of Multiple-Quantum Coherences	76
5.2.2	Quantifying Chemical Exchange by Multiple-Quantum CPMG Relaxation Dispersion	77
5.2.3	Quantifying Chemical Exchange by HDR Relaxation Dispersion	77
5.3	Internal Dynamics in Engrailed 2	78
5.3.1	Identifying Chemical Exchange from the Relaxation of Single-Quantum Coherences	81
5.3.2	Quantifying Chemical Exchange by $R_{1\rho}$ Relaxation Dispersion	85
	References	87
6	Conclusions	91

Appendix A: Explicit Forms of the Functions Approximated in Section 3.4	95
Appendix B: Implementation of Numerical Simulations	99
Appendix C: Implementation of Minimization Algorithms	103
Publications	109

Dynamic Studies Through Control of Relaxation in NMR
Spectroscopy

Salvi, N.

2014, XIX, 110 p. 41 illus., 10 illus. in color., Hardcover

ISBN: 978-3-319-06169-6
